DEPARTMENT OF TUE ARMY SUPPLY BULLETIN

HERBICIDES, PEST CONTROL AGENTS, AND DISINFECTANTS

Headquarters, Department of the Army, Washington, D.C. 18 September 1968 Here are excerpts from Army Supply Bulletin

SB 3-40

These rules and stock numbers apply to all service branches

 Purpose. This bulletin furnishes guidance for Army facilities, other units and troops in the requisitioning of pesticides, rodenticides, fungicides, herbicides, disinfectants, and various sewer treatment compounds.

2. definitions. a. Herbicides are materials which will destroy, prevent, or mitigate the activity of plant life. Selective herbicides will kill undesirable plants without serious injury to desirablable types growing in the same area. Nonselective herbicides will destroy all forms of plant life. Soil sterilants make the soil incapable of supporting plant growth.

3. (1) Herbicides. CONUS Army Commands, Military District of Washington, or the U.S. Army Materiel Command (acting upon recommendation of the staff agronomist and with the concurrence of the command surgeon); all other installations, including overseas, will obtain, through appropriate channels, prior approval from the Chief of Engineers, ATTN: ENGMCFB.

5. <u>Herbicides.</u> To be issued as required for use by the installation engineer and under the supervision of personnel trained in their proper use.

Federal Stock No.	Item	Unit Package
6840-926-9094	Herbicide, Cacodylic Acid (Phytar 560G) (blue)	55 gal drum
6840-926-9093	Herbicide, Picloram-Silvex Salt (Tordon 101) (White)	55 gal drum
6840-926-9095	Herbicide, 2,4-D and 2,4,5-T (orange)	55 gal drum
6840-577-4201	Herbicide, 2,4,5-T	55 gal drum
6840-577-4195	Herbicide, 2,4-D	55 gal drum
6840-825-7792	Herbicide, 2,4-D, 2,4,5-T mixture	55 gal drum
6840-882-4810	Herbicide, Silvex	5 gal drum

Excerpt From Page 196 of the Operation Ranch Hand Report:

"None of the herbicides used in Southeast Asia were of a new or experimental nature. They had all been used for several years in commercial agriculture both in the United States and in other countries."

0641 5 *SB 3.4

DEPARTMENT OF THE ARMY SUPPLY BULLETIN

HERBICIDES, PEST CONTROL AGENTS, AND DISINFECTANTS

Headquarters, Department of the Army, Washington, D.C. 18 September 1968

1. Purpose. This bulletin furnishes guidance for Army facilities, other units and troops in the requisitioning of pesticides, rodenticides, fungicides, herbicides, disinfectants, and various sewer treatment compounds.

2. Definitions. a. Herbicides are materials which will destroy, prevent, or mitigate the activity of plant life. Selective herbicides will kill undesirable plants without serious injury to desirable types growing in the same area. Nonselective herbicides will destroy all forms of plant life. Soil sterilants make the soil incapable of supporting plant growth.

b. Pesticides are materials having the ability to destroy, or to mitigate the activity of, insects (insecticides), rodents (rodenticides), fugi (fungicides), nematodes, and other pests. Included under this definition are repellents, which prevent pest attack or damage by making unattractive to those pests the areas under treatment.

÷.

c. Disinfectants are materials which destroy disease germs or other harmful microorganisms.

d. Sewer treatment compounds are materials used for removing grease and controlling odors and root growth in sewer systems.

3. Scope. a. Supplies listed herein will normally be utilized at Department of the Army installations and for troop supply. Prior approval of the appropriate commands listed below will be obtained by the installations thereunder for local purchase of items to be substituted for the items listed in this bulletin.

(1) Herbicides. CONUS Army Commands, Military District of Washington, or the U.S. Army Materiel Command (acting upon recom-

*This Bulletin supersedes SB 3-40, 20 May 1963.

mendation of the staff agronomist and with the concurrence of the command surgeon); all other installations, including overseas, will obtain, through appropriate channels, prior approval from the Chief of Engineers, ATTN: ENGMC-FB.

(2) Pesticides. major commands or major subordinate commands.

b. Requisitions for items not included in this bulletin will have indicated on them the approval of the appropriate command as listed in a above.

c. Requisitions for all items other than FSNs 6840-823-7945 and 6840-864-5430 will be forwarded to Defense General Supply Center, Richmond, Va., routing identifier S9G, from all CONUS installations. Requisitions for FSNs 6840-823-7945 and 6840-864-5430 will be forwarded to Headquarters, U.S. Army Petroleum Center, Cameron Station, Alexandria, Va., routing identifier A95, from all CONUS installations. Oversea installations will utilize appropriate channels. For pesticides, the normal supply should be adequate for operations for a period of 60 days; major commands may issue directives authorizing requisition in accordance with requirements. The supply level of herbicides at installations will be approved by the engineer. The need for any of these items may vary seasonally and within geographic subdivisions of commands.

d. Service schools, laboratories, and other such agencies of the Army are authorized to requisition pesticides as needed for educational and training purposes.

4. Pesticides. a. Insecticides.
