1. INTRODUCTION

The Chemical Hazards Response Information System (CHRIS) is designed to provide information needed for decision-making by responsible Coast Guard personnel during emergencies that occur during the water transport of hazardous chemicals. CHRIS also provides much information that can be used by the Coast Guard in its efforts to achieve better safety procedures and so prevent accidents.

CHRIS consists of a handbook or manual, a hazard assessment computer system (HACS), and technical support personnel located at Coast Guard headquarters. These components and their relations to one another are described in Section 2 of this manual.

2. COMPONENTS OF CHRIS

2.1 HAZARDOUS CHEMICAL DATA

This manual is the cornerstone of CHRIS. For each substance, it lists the specific chemical, physical, and biological data needed for the preparation and use of the other components of the system. The manual can also be used after the initial response action, when there is sufficient time to use more detailed information.

The Hazardous Chemical Data Manual is intended for use primarily by the On-Scene Coordinator (OSC) and by Regional Response Teams for devising, evaluating, and carrying out response plans.

2.2 HAZARD ASSESSMENT COMPUTER SYSTEM

The Hazard Assessment Computer System (HACS) permits trained specialists to obtain very detailed hazard evaluations quickly, when requested by OSC personnel, and can be accessed through the National Response Center.

3. EXPLANATION OF TERMS

This section explains the special terms used in the data sheets, gives the sources of specific items, and includes other information that will be useful to the reader in interpreting the data. The paragraphs below are keyed to the relevant portions by the subheading and number used in the data sheets.

The expression “**Not pertinent**” means that the data item either has no real meaning (such as the flash point of a nonflammable chemical) or is not required for assessing a hazardous situation. The expression “**Currently not available**” means that the information sought was not found in the general or specialized data sources listed in Section 10 of this manual. In a few cases where important data were not available, values were estimated by usually reliable procedures; all such values are labeled “**(est.)**”. If more accurate values for those items are found, they will be included in later revisions.

The **name** used for each of the chemicals included in the CHRIS manuals is either (1) that specified in the Code of Federal Regulations, Title 46, Part 151 or (2) a common name for those chemicals not now regulated by Sub chapters O and D but known to be hazardous during shipment. The data sheets are arranged in alphabetic order by chemical name, not by the 3-letter code.

The **3-letter code** is designed to facilitate correct identification of chemicals in oral or written communication. The code should be used only *in addition* to the compound name; it should not be used alone. For transmitting the code, use the phonetic alphabet given in the “International Code of Signals.”

1. RESPONSE TO DISCHARGE

In every case of a discharge or leak, it is obvious that an effort should be made to reduce, stop, or contain the flow of material at its source if this can be done safely. The purpose of the terms used in this section is to describe in a general way the cautionary and corrective responses that are described in greater detail in the Response Methods Handbook.

- “*Issue warning*” is used when the chemical is a *poison*, has a *high flammability*, is a *water contaminant*, is an *air* contaminant (so as to be hazardous to life), is an *oxidizing* material, or is *corrosive*.
- “*Restrict access*” is used only for those chemicals that are unusually and immediately hazardous to personnel unless they are protected properly by respirators, protective clothing, etc.
- “*Evacuate area*” is used primarily for unusually poisonous chemicals or those that ignite easily.
- “*Mechanical containment*” is used for water-insoluble chemicals that float and do not evaporate readily.

- “*Should be removed*” is used for chemicals that cannot be allowed to disperse because of their harmful effect on humans or on the ecological system in general. The term is not used unless there is a reasonable chance of preventing dispersal, after a discharge or leak, by chemical and physical treatment.
- “*Chemical and physical treatment*” is recommended for chemicals that can be removed by skimming, pumping, dredging, burning, neutralization, absorption, coagulation, or precipitation. The corrective response may also include the use of dispersing agents, sinking agents, and biological treatment.
- “*Disperse and flush*” is used for chemicals that can be made non-hazardous to humans by simple dilution with water. In a few cases the response is indicated even when the compound reacts with water because, when proper care is taken, dilution is still the most effective way of removing the primary hazard.

2. CHEMICAL DESIGNATIONS

2.1 Coast Guard Compatibility Classification - An entry is made when the chemical has been assigned to one of the 43 cargo groups listed in Code of Federal Regulations, Title 46, Part 150, “Compatibility of Cargoes.” Appropriate parts of these regulations are included in this manual. Chemicals included in the regulation were assigned to a group by the Cargo and Hazardous Materials Standards Division, Coast Guard Headquarters. If the chemical is not a liquid carried in bulk in ships' tanks, this data item is “Not listed.”

2.2 Chemical Formula - This has been limited to a commonly used one-line formula. In the case of some organic compounds it has not been possible to represent chemical structure within such a limitation.

2.3 IMO/United Nations Numerical Designation - The designation is that of the “International Maritime Dangerous Goods Code” published by the International Maritime Organization (IMO), London, 1977.

2.4 Department of Transportation Identification Number - This is an identification number assigned by the Department of Transportation to aid in categorizing hazards and recommended responses. The ID's can be located in the Hazardous Materials Table, part 172.101 of 49 CFR.

2.5 Chemical Abstracts Services Registry Number - The unique identification number assigned each compound registered with the Chemical Abstracts Service (CAS) is listed to aid in quick identification of the compound.

2.6 NAERG Guide Number – The number of the guide in the North American Emergency Response Guidebook listing specific emergency response actions for a particular CHRIS chemical. The 1996 edition of the guidebook was used in the preparation of this edition of the CHRIS manual.

2.7 Standard Industrial Trade Classification – The five digit code identifying the chemical's commodity category per revision 3 of the subject classification. These codes are compatible with the International Harmonized System codes used in foreign trade.

3. HEALTH HAZARDS

3.1 Personal Protective Equipment - The items listed are those recommended by (a) manufacturers, either in technical bulletins or in Material Safety Data Sheets, (b) the Chemical Manufacturers Association, or (c) the National Safety Council, for use by personnel while responding to fire or accidental discharge of the chemical. They are intended to protect the lungs, eyes, and skin. Safety showers and eyewash fountains are considered to be important protective equipment for the handling of almost all chemicals; they are not usually listed.

3.2 Symptoms Following Exposure - These are brief descriptions of the effects observed in humans when the vapor (gas) is inhaled, when the liquid or solid is ingested (swallowed), and when the liquid or solid comes in contact with the eyes or skin.

3.3 Treatment for Exposure - "First-aid" procedures are recommended. They deal with exposure to the vapor (gas), liquid, or solid and include inhalation, ingestion (swallowing) and contact with eyes or skin. The instruction "Do NOT induce vomiting" is given if an unusual hazard is associated with the chemical being sucked into the lungs (aspiration) while the patient is vomiting. "Seek medical attention" or "Call a doctor" is recommended in those cases where only competent medical personnel can treat the injury properly. In all cases of human exposure, seek medical assistance as soon as possible.

3.4 Threshold Limit Value – Time Weighted Average -The Threshold Limit Value Time Weighted Average (TLV-TWA) is usually expressed in units of parts per million (ppm) - i.e., the parts of vapor (gas) per million parts of contaminated air by volume at 25°C (77°F) and one atmosphere pressure. For a chemical that forms a fine mist or dust, the concentration is given in milligrams per cubic meter (mg/m³). The TLV is defined as the concentration of the substance in air that can be breathed for five consecutive eight-hour workdays (40-hour work week) by most people without adverse effect (American Conference of Governmental Industrial Hygienists, "Threshold Limit Values for Substance in Workroom Air, Adopted by ACGIH"). As some people become ill after exposure to concentrations lower than the TLV, this value cannot be used to define exactly what is a "safe" or "dangerous" concentration.

No entry appears when the chemical is a mixture; it is possible to calculate the TLV for a mixture only when the TLV for each component of the mixture is known and the composition of the mixture by weight is also known.

3.5 Threshold Limit Value - Short-Term Exposure Limits - The parts of vapor (gas) per million parts of contaminated air by volume at 25°C (77°F) and one atmosphere pressure is given. The limits are given in milligrams per cubic meter

for chemicals that can form a fine mist or dust. The values given are the maximum permissible average exposures for the time periods specified.

3.6 Threshold Limit Value – Ceiling Value – The parts of vapor (gas per million parts of contaminated air by volume at 25°C (77°F) and one atmosphere pressure is given. The limits are given in milligrams per cubic meter for chemicals that can form a fine mist or dust. The values given are for a concentration that is not to be exceeded at any time.

3.7 Toxicity by Ingestion - The Grade and corresponding LD₅₀ value are those defined by the National Academy of Sciences, Committee on Hazardous Materials, "Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals, A Tentative Guide," Washington, D.C., 1972. Data were also collected from other sources and converted to the appropriate Grade before entry in this manual. The term LD₅₀ signifies that about 50% of the animals given the specified dose by mouth will die. Thus, for a Grade 4 chemical (below 50 mg/kg) the toxic dose for 50% of animals weighing 70 kg (150 lb) is 70 X 50 = 3500 mg = 3.5 g, or less than 1 teaspoonful; it might be as little as a few drops. For a Grade 1 chemical (5 to 15g/kg), the LD₅₀ would be between a pint and a quart for a 150-lb man. All LD₅₀ values have been obtained using small laboratory animals such as rodents, cats, and dogs. The substantial risks taken in using these values for estimating human toxicity are the same as those taken when new drugs are administered to humans for the first time.

3.8 Toxicity by Inhalation – Similar to the Toxicity by Ingestion entry, except that the route of exposure is inhalation instead of ingestion. Units and definition of units are the same.

3.9 Chronic Toxicity - Where there is evidence that the chemical can cause cancer, mutagenic effects, teratogenic effects, or a delayed injury to vital organs such as the liver or kidney, a qualitative description of the effect is given.

3.10 Vapor (Gas) Irritant Characteristics - The most appropriate of five statements listed below is given. Source: National Academy of Sciences, Committee on Hazardous Materials, "Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals, A Tentative Guide," Washington, D.C., 1972.)

- (1) Vapors are nonirritating to eyes and throat.
- (2) Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary.
- (3) Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary.
- (4) Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations.
- (5) Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations.

3.11 Liquid or Solid Irritant Characteristics - The most appropriate of the following five statements is given (same source as 5.8 above):

- (1) No appreciable hazard. Practically harmless to the skin.
- (2) Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of skin.
- (3) Causes smarting of the skin and first-degree burns on short exposure; may cause second-degree burns on long exposure.
- (4) Fairly severe skin irritant. May cause pain and second-degree burns after a few minutes' contact.
- (5) Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes.

3.12 Odor Threshold - This is the lowest concentration in air that most humans can detect by smell. The value cannot be relied on to prevent over-exposure, because human sensitivity to odors varies over wide limits, some chemicals cannot be smelled at toxic concentrations, odors can be masked by other odors, and some compounds rapidly deaden the sense of smell.

3.13 IDLH Value - The Immediately Dangerous to Life and Health Value - This concentration represents a maximum level from which one could escape within 30 minutes without any escape-impairing symptoms or any irreversible health effects. The concentrations are reported in either parts per million (ppm) or milligrams per cubic meter (mg/m^3).

3.14 OSHA Permissible Exposure Limit – Time Weighted Average – Similar to the definition of the TLV-TWA above, except that this limit has been promulgated by the Occupational Safety and Health Agency.

3.15 OSHA Permissible Exposure Limit – Short Term Exposure Limit – Similar to the definition of the TVL-STEL above, except that this limit has been promulgated by the Occupational Safety and Health Agency.

3.16 OSHA Permissible Exposure Limit – Ceiling – Similar to the definition of the TVL-Ceiling above, except that this limit has been promulgated by the Occupational Safety and Health Agency.

3.17 EPA AEGL – Acute Exposure Guideline information from the Environmental Protection Agency for the specific compound listed in the manual.

4. FIRE HAZARDS

4.1 Flash Point - This is defined as the lowest temperature at which vapors above a volatile combustible substance will ignite in air when exposed to a flame. Depending on the test method used, the values given are either Tag closed cup (C.C.) (ASTM D56) or Cleveland open cup (O.C.) (ASTM D93). The values, along with those in 6.2 and 6.7 below, give an indication of the relative flammability of the chemical. In general, the open cup value is about 10° to 15°F higher than the closed cup value.

4.2 Flammable Limits in Air - The percent concentration in air (by volume) is given for the lower (LFL) and upper (UFL) limit. The values, along with those in 6.1 and 6.7, give an indication of the relative flammability of the chemical. The limits are sometimes referred to as “lower explosive limit” (LEL) and “upper explosive limit” (UEL).

4.3 Fire Extinguishing Agents - The agents are listed in decreasing order of importance. The general capabilities of all agents are described in section 6, “Fire Protection Handbook,” 18th ed., National Fire Protection Association, Boston, Mass., 1997.

4.4 Fire Extinguishing Agents Not to be Used - The agents listed must not be used because they react with the chemical and create an additional hazard. In some cases they are listed because they are ineffective in putting out the fire.

4.5 Special Hazards of Combustion Products - Some chemicals decompose or burn to give off toxic and irritating gases. Such gases may also be given off by chemicals that vaporize in the heat of a fire without either decomposing or burning. If no entry appears, the combustion products are thought to be similar to those formed by the burning of oil, gasoline, or alcohol; they include carbon monoxide (poisonous), carbon dioxide, and water vapor. The specific combustion products are usually not well known over the wide variety of conditions existing in fires; some may be hazardous.

4.6 Behavior in Fire - Any characteristic behavior that might increase significantly the hazard involved in a fire is described. The formation of dense smoke or flammable vapor clouds, and the possibility of polymerization and explosions is stated. Unusual difficulty in extinguishing the fire is also noted.

4.7 Ignition Temperature - This is the minimum temperature at which the material will ignite without a spark or flame being present. Along with the values in 6.1 and 6.2 above, it gives an indication of the relative flammability of the chemical. It is sometimes called the “autoignition temperature.” The method of measurement is given in ASTM D-2155.

4.8 Electrical Hazard - The ease with which the chemical is ignited by electrical equipment is indicated by the Group and Class assignment made in the National Fire Protection Association, “Hazardous Chemicals Data,” Boston, Mass., 1994 and in “Classification of Gases, Liquids, and Volatile Solids

Relative to Explosion-Proof Electrical Equipment,” National Academy of Sciences, 1982. This information is available for relatively few chemicals, so an absence of data does not necessarily mean that the substance is not hazardous in the presence of electrical equipment.

4.9 Burning Rate - The value is the rate (in millimeters per minute) at which the depth of a pool of liquid decreases as the liquid burns. Details of measurement are given by D.S. Burgess, A. Strasser, and J. Grumer, “Diffusive Burning of Liquid Fuels in Open Trays,” Fire Research Abstracts and Reviews, 3, 177 (1961).

4.10 Adiabatic Flame Temperature - The value is the temperature in degrees Fahrenheit of the flame when the material is burned under adiabatic conditions.

4.11 Stoichiometric Air to Fuel Ratio - The value is the ratio of air to the compound in question required for stoichiometric combustion. Since it is a ratio, the value is dimensionless.

4.12 Flame Temperature - The value is the temperature in degrees Fahrenheit of the flame produced by burning the compound under stoichiometric conditions without any rate controls.

4.13 Molar Ratio (Reactant to Product) – The number of moles of products formed, assuming complete combustion of a single mole of the chemical reactant. These ratios were calculated assuming there was sufficient oxygen available and that combustion did, in fact, go to completion.

4.14 Minimum Oxygen Concentration for Combustion (MOCC) – Information from NFPA-69 regarding the minimum percentage of oxygen required to support combustion of the subject compound. The results are reported for oxygen diluted with nitrogen (N₂) and/or carbon dioxide (CO₂).

5. CHEMICAL REACTIVITY

5.1 Reactivity with Water - The term “No reaction” means that no hazard results when the chemical reacts or mixes with water. Where a hazard does result, it is described.

5.2 Reactivity with Common Materials - This is limited to hazardous reactions with fuels and with common materials of construction such as metal, wood, plastics, cement, and glass. The nature of the hazard, such as severe corrosion or formation of a flammable gas, is described.

5.3 Stability During Transport - The term “Stable” means that the chemical will not decompose in a hazardous manner under the conditions of temperature, pressure, and mechanical shock that are normally encountered during shipment; the term does not apply to fire situations. Where there is a possibility of hazardous decomposition, an indication of the conditions and the nature of the hazard is given.

5.4 Neutralizing Agents for Acids and Caustics - In all cases involving accidental discharge, dilution with water may be followed by use of the agent specified, particularly if the material cannot be flushed away; the agent specified need not necessarily be used.

5.5 Polymerization - A few chemicals can undergo rapid polymerization to form sticky, resinous materials, with the liberation of much heat. The containers may explode. For these chemicals the conditions under which the reaction can occur are given. See Section 12.16 for quantitative data.

5.6 Inhibitor of Polymerization - The chemical names and concentrations of inhibitors added by the manufacturer to prevent polymerization are given.

6. WATER POLLUTION

6.1 Aquatic Toxicity - The form of data presentation used by the Environmental Protection Agency's "Oil and Hazardous Material-Technical Assistance Data System (OHM-TADS)" is used here. Reading from left to right and separated by slashes (/) are the following data:

Concentration in parts per million by weight (or milligrams per liter)
at which the chemical was tested;
Time of exposure in hours;
Name of the aquatic species studied;
Effect observed; LC_{50} means that approximately 50% of the fish will die under the conditions of concentrations and time given. TL_m (Median Tolerance Limit) means that approximately 50% of the fish will show abnormal behavior (including death) under the conditions of concentrations and time given; the term EC_{50} (Effective Concentration₅₀) is used sometimes instead of TL_m ;
The kind of water used in the test (fresh or salt)

Some chemicals have been tested with many species of fish. Where the data were available, the data sheet cites one illustrative test in fresh water and one in salt water.

6.2 Waterfowl Toxicity - Very little information is available. In a few cases there is entered the LD_{50} value, which indicates the dose (in milligrams per kilogram of body weight) that is lethal to about half the waterfowl tested.

6.3 Biological Oxygen Demand (BOD) - Also called "biochemical oxygen demand," this is a standard way of describing how much oxygen dissolved in water is consumed by biological oxidation of the chemical during the stated period of time. The unit lb/lb indicates the pounds of oxygen consumed by each pound of chemical during the time stated. When given in percent, the values indicate the pounds of oxygen consumed by each 100 pounds of chemical during the time stated. If the percentage is followed by "(theor.)", it indicates the

pounds of oxygen theoretically required to completely oxidize 100 pounds of the chemical.

6.4 Food Chain Concentration Potential - If the chemical is consumed by fish, marine plants, waterfowl, etc., that are in turn eaten by other species, the substance may accumulate and ultimately be consumed by humans. Where this occurs, an indication of the potential hazard and its significance is given.

6.5 GESAMP Hazard Profile – A composite list of hazard profiles evaluated by the Joint Group of Experts on the Scientific Aspects of Marine Environmental Protection (GESAMP). A summary of the legends used in the profile follows.

Bioaccumulation and Tainting

+	Bioaccumulated to significant extent and known to produce a hazard to aquatic life or human health.
Z	Bioaccumulated with attendant risk to aquatic organisms or human health, however, with short retention of the order of one week or less.
T	Liable to produce tainting of seafood.
O	No evidence to support one of the above ratings (+, Z, T)

Damage to Living Resources

96 hr LC₅₀

5	Extremely toxic	less than 0.01 mg/l
4	Highly toxic	less than 1 mg/l
3	Moderately toxic	1-10 mg/l
2	Slightly toxic	10-100 mg/l
1	Practically nontoxic	100-1000 mg/l
0	Non-hazardous	greater than 1000 mg/l
D	Substance likely to blanket the sea-bed	
BOD	Substance with oxygen demand	

Hazard to Human Health by Oral Intake

LD₅₀

4	Highly hazardous	less than 5 mg/kg
3	Moderately hazardous	5-50 mg/kg
2	Slightly hazardous	50-500 mg/kg
1	Practically non-hazardous	500-5000 mg/kg
0	Non-hazardous	greater than 5000 mg/kg

Hazard to Human Health by Skin and Eye Contact or Inhalation

II	Hazardous (severe irritation, strong sensitizer, lung injury, percutaneous toxicity, carcinogenic, or other specific long-term
----	--

adverse health effect.

- I Slightly hazardous (mild irritation, weak sensitizer)
- 0 Non-hazardous (non-irritant, not a sensitizer)

Reduction of Amenities

- XXX Highly objectionable because of persistency, smell or poisonous or irritant characteristics; as a result contaminated beaches liable to be closed; also used when there is clear evidence that the substance is a human carcinogen or that the substance has the potential to produce other serious specific long-term adverse health effects in humans.
- XX Moderately objectionable because of the above characteristics, but short-term effects leading only to temporary interference with use of beaches; also used when there is credible scientific evidence that the substance is an animal carcinogen but where there is no clear evidence to indicate that the material has caused cancer in humans, or when there is evidence from laboratory studies that the substance could have the potential to produce other serious specific long-term adverse health effects.
- X Slightly objectionable, non-interference with use of beaches.
- 0 No problem.

Ratings in brackets, (), indicate insufficient data available to the GESAMP experts on specific substances, hence extrapolation was required.

N – Not applicable (e.g. if gases)

— Indicates data were not available to the GESAMP Working Group.

7. SHIPPING INFORMATION

7.1 Grades or Purity - The grades USP (United States Pharmacopoeia) and CP (chemically pure) are quite pure. Where “Technical” or “Commercial” grades are given, the percent by weight of the pure chemical present is usually indicated. In a few cases the identity of the major impurities is given. If the properties of the less pure grades differ significantly from those of the pure substance, the differences in properties are described in general terms.

7.2 Storage Temperature - The range of temperatures at which the chemical is normally shipped in bulk by water transport is given. “Ambient” means the temperature of the surroundings.

7.3 Inert Atmosphere - The terms used are “inerted,” “padded,” “ventilated (forced),” “ventilated (natural),” and “no requirement.” They are given when found in the Code of Federal Regulations, Title 46, beginning in Part 151.05.

7.4 Venting - The terms used are “open,” “pressure-vacuum,” and “safety relief” (same source as 9.3 above).

7.5 IMO Pollution Category – pollution classification applied to this compound by the International Maritime Organization.

7.6 Ship Type – The data entry refers to construction and containment requirements for ships being used to transport the chemical in question. The information is taken from the Code of Federal Regulations, Title 46, Part 154.

7.7 Barge Hull Type – The data entry refers to structural requirements for barge hulls being used to transport the chemical in question. The information is taken from the Code of Federal Regulations, Title 46, part 151.

8. HAZARD CLASSIFICATIONS

8.1 49 CFR Category - This is the hazard category specified in the Hazardous Materials Table, Part 172.101, Title 49 of the Code of Federal Regulations. The October 1, 1996 edition was used to prepare this version of the CHRIS.

8.2 49 CFR Class – The hazard class as specified in the Hazardous Materials Table, Title 49, Part 172.101 of the Code of Federal Regulations. The October 1, 1996 edition was used to prepare this version of the CHRIS.

8.3 49 CFR Package Group – The packaging group assigned to this chemical in the Hazardous Materials Table, Title 49, Part 172.101 of the Code of Federal Regulations. The October 1, 1996 edition was used to prepare this version of the CHRIS. Note that the packaging group is often dependent upon toxicity or flash point of the chemical. In those cases the reported packaging group is based upon the data value reported in CHRIS for that specific compound. The packaging group could be different if the purity of the material varies from that reported in CHRIS.

8.4 Marine Pollutant – This is a “Yes” or “No” entry, depending upon whether the chemical is listed in “List of Marine Pollutants”, Appendix B to Part 172.101, Title 49 of the Code of Federal Regulations.

8.5 NFPA Hazard Classifications - The indicated ratings are given in “Fire Protection Guide on Hazardous Materials,” 7th ed., National Fire Protection Association, Boston, Mass., 1978. The classifications are defined in Table 1 below. The symbol used in conjunction with these ratings is illustrated in Section 4.2.

8.6 EPA Reportable Quantity – The minimum quantity, in pounds, that must be reported to EPA in the event of a spill. This value is taken from “A List of Hazardous Substances and Reportable Quantities”, Appendix A to Part 172.101, Title 49 of the Code of Federal Regulations.

8.7 EPA Pollution Category – An alphabetic descriptor identifying the potential pollution impact of the chemical. This descriptor is based upon the reportable quantity from category 8.6 above.

8.8 RCRA Waste Number – The 4 character identification number assigned to this chemical, if it is a waste, under the Resources Conservation and Recovery Act. This waste number was reported if the chemical is specifically listed.

8.9 EPA FWPCA List – A “Yes” or “No” entry depending upon whether the chemical is listed in the Federal Water Pollution Control Act.

TABLE 1
EXPLANATION OF NFPA HAZARD CLASSIFICATIONS

Health Hazard (blue)		Definition
4		Materials which on very short exposure could cause death or major residual injury even though prompt medical treatment were given
3		Materials which on short exposure could cause serious temporary or residual injury even though prompt medical treatment were given.
2		Materials which on intense or continued exposure could cause temporary incapacitation or possible residual injury unless prompt medical treatment is given.
1		Materials which on exposure would cause irritation but only minor residual injury even if no treatment is given.
0		Materials which on exposure under fire conditions would offer no hazard beyond that of ordinary combustible material.
Flammability (red)		
4		Materials which will rapidly or completely vaporize at atmospheric pressure and normal ambient temperature, or which are readily dispersed in air and which will burn readily.
3		Liquids and solids that can be ignited under almost all ambient temperature conditions
2		Materials that must be moderately heated or exposed to relatively high ambient temperatures before ignition can occur.
1		Materials that must be preheated before ignition can occur.
0		Materials that will not burn.
Reactivity (yellow)		
4		Materials which in themselves are readily capable of detonation or explosive decomposition or reaction at normal temperatures and pressures.
3		Materials which in themselves are capable of detonation or explosive reaction but require a strong initiating source or which must be heated under confinement before initiation or which react explosively with water.
2		Materials which in themselves are normally unstable and readily undergo violent chemical change but do not detonate. Also materials which may react violently with water or which may form potentially explosive mixtures with water.
1		Materials which in themselves are normally stable, but which can become unstable at elevated temperatures and pressures or which may react with water with some release of energy but not violently.
0		Materials which in themselves are normally stable, even under fire exposure conditions, and which are not reactive with water.
Other (white)		
W		Materials which react so violently with water that a possible hazard results when they come in contact with water, as in a fire situation. Similar to Reactivity Classification 2.
Oxy		Oxidizing material; any solid or liquid that readily yields oxygen or other oxidizing gas, or that readily reacts to oxidize combustible materials.

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Physical State at 15°C and 1 atm - The statement indicates whether the chemical is a solid, liquid, or gas after it has reached equilibrium with its surroundings at “ordinary” conditions of temperature and pressure.

9.2 Molecular Weight - The value given is the weight of a molecule of the chemical relative to a value of 12 for one atom of carbon.

The molecular weight is useful in converting from molecular units to weight units and in calculating the pressure, volume and temperature relationships for gaseous materials. The ratio of the densities of any two gases is approximately equal to the ratio of their molecular weights (see 9.10).

The molecular weights of mixtures can be calculated if both the identity and quantity of each component of the mixture are known. Because the composition of mixtures described in this manual is not known exactly, or because it varies from one shipment to another, no molecular weights are given for such mixtures.

9.3 Boiling Point at 1 atm - The value is the temperature of a liquid when its vapor pressure is 1 atm. For example, when water is heated to 100°C (212°F) its vapor pressure rises to 1 atm and the liquid boils.

The boiling point at 1 atm indicates whether a liquid will boil and become a gas at any particular temperature and sea-level atmospheric pressure.

9.4 Freezing Point - The freezing point is the temperature at which a liquid changes to a solid. For example, liquid water changes to solid ice at 0°C (32°F). Some liquids solidify very slowly even when cooled below their freezing point. When liquids are not pure (for example, salt water) their freezing points are lowered slightly.

9.5 Critical Temperature - The maximum temperature at which a liquid can exist, no matter what the pressure on it, is called the critical temperature. For example, the critical temperature of water is 372°C (705°F). The value can be used to estimate many properties whose values are not immediately available.

9.6 Critical Pressure - The vapor pressure of a chemical at the critical temperature (see 9.5) is called the critical pressure. For example, the critical pressure of water is 218 atm. Values are given in pounds per square inch absolute, atmospheres, and meganewtons per square meter. The value can be used for estimating many property values that are not immediately available.

9.7 Specific Gravity - The specific gravity of a chemical is the ratio of the weight of the solid or liquid to the weight of an equal volume of water at 4°C (or at some other specified temperature).

If the specific gravity is less than 1.0 (or less than 1.03 in seawater) the chemical will float; if higher, it will sink. Where the change in the value with temperature is important, more data are found in 9.20.

9.8 Liquid Surface Tension - This property is a measure of the tensile force at the surface of a liquid that tends to shape liquid fragments into spherical drops. Values are expressed in dynes per centimeter and newtons per meter. Liquids with high surface tensions show less tendency to spread. Water has a surface tension of about 73 dynes/cm; seawater has a slightly higher value.

9.9 Liquid-Water Interfacial Tension - The value is a measure of the tensile forces existing at the interface between a liquid and water. Approximately, it is the difference between the individual surface tension of the liquid and that of water. Low values of the interfacial tension indicate that the chemical spreads readily on a water surface. The units are the same as in 9.8.

9.10 Vapor (Gas) Specific Gravity - The value is the ratio of the weight of vapor to the weight of an equal volume of dry air at the same conditions of temperature and pressure. Buoyant vapors have a vapor specific gravity less than one. The value may be approximated by the ratio $M/29$, where M is the molecular weight of the chemical (see 9.2).

In some cases the vapor may be at a temperature different from that of the surrounding air. For example, the vapor from a container of boiling methane at -172°F sinks in warm air, even though the vapor specific gravity of methane at 60°F is about 0.6.

For the effect of temperature on vapor density, see 9.26.

9.11 Ratio of Specific Heats of Vapor (Gas) - This property is the ratio of the specific heat at constant pressure (C_p) to the specific heat at constant volume (C_v); its value is always greater than one. In most cases it was calculated by use of the expression:

$$\frac{C_p}{C_v} = \frac{C_p}{(C_p - R)}$$

where R is the Universal Gas Constant.

The ratio varies slightly with temperature; the value given is at 20°C (68°F). The ratio is often of value in estimating temperature changes when gases are compressed or expanded. Higher values of the ratio lead to larger temperature changes for a given pressure change.

9.12 Latent Heat of Vaporization - The value is the heat that must be added to the specified weight of a liquid before it can change to vapor (gas). It varies with temperature; the value given is that at the boiling point at 1 atm (see 9.3). The units used are Btu per pound, calories per gram, and joules per kilogram.

No value is given for chemicals with very high boiling points at 1 atm, because such substances are considered essentially nonvolatile.

9.13 Heat of Combustion - The value is the amount of heat liberated when the specified weight is burned in oxygen at 25°C. The products of combustion, including water, are assumed to remain as gases; the value given is usually referred to as the “lower heat value.” The negative sign before the value indicates that heat is given off when the chemical burns. Units are the same as in 9.12.

9.14 Heat of Decomposition - The value is the amount of heat liberated when the specified weight decomposes to more stable substances. The value is given for very few chemicals, because most are stable and do not decompose under the conditions of temperature and pressure encountered during shipment. The negative sign before the value simply indicates that heat is given off during the decomposition. The value does not include heat given off when the chemical burns. Units are the same as in 9.12.

9.15 Heat of Solution - The value represents the heat liberated when the specified weight of chemical is dissolved in a relatively large amount of water at 25°C (“infinite dilution”). A negative sign before the value indicates that heat is given off, causing a rise in temperature. (A few chemicals absorb heat when they dissolve, causing the temperature to fall.) Units are the same as in 9.12.

In those few cases where the chemical reacts with water and the reaction products dissolve, the heat given off during the reaction is included in the heat of solution.

9.16 Heat of Polymerization - The value is the heat liberated when the specified weight of the compound (usually called the monomer) polymerizes to form the polymer. In some cases the heat liberated is so great that the temperature rises significantly, and the material may burst its container or catch fire. The negative sign before the value indicates that heat is given off during the polymerization reaction. Units are the same as in 9.12.

9.17 Heat of Fusion - The value is the number of Btu needed to change one pound of solid to liquid with no change in temperature.

9.18 Limiting Value - A chemical specific concentration in water in mole fraction units below which the contribution to the evolution of toxic or flammable vapor at the water surface can be assumed to be negligible.

9.19 Reid Vapor Pressure - The value is the equilibrium pressure exerted by vapor over the liquid at 100°F., expressed as pounds per square inch absolute, as defined in 46 CFR 30.10-59.

Items 9.20 through 12.27 consist of tables. The temperature is given in one column followed by the appropriate data value in the next column.

9.20 Saturated Liquid Density - The value is the weight (in pounds) of one cubic foot of liquid that is in equilibrium with its vapor. Liquid densities decrease slightly with an increase in temperature; where literature data or reliable estimation methods were applicable, a table shows this effect.

9.21 Liquid Heat Capacity - The value is the heat (in Btu) required to raise the temperature of one pound of the liquid one degree Fahrenheit at constant pressure. For example, it requires almost 1 Btu to raise the temperature of 1 pound of water from 68°F to 69°F. The value is useful in calculating the increase in temperature of a liquid when it is heated, as in a fire. The value increases slightly with an increase in temperature; the table shows this effect.

9.22 Liquid Thermal Conductivity - The value is a measure of the ability of a liquid to conduct heat. It represents the number of Btu per hour that pass through an area of liquid one square foot in cross-section when the temperature gradient is 1°F per inch of depth. Higher values indicate that the liquid conducts heat more readily.

Liquid thermal conductivities decrease slightly with an increase in temperature. Where applicable, the table shows this effect.

A basic law of heat conduction states that the energy flow per unit area per unit time is proportional to the gradient in temperature. The constant of proportionality is the liquid thermal conductivity.

9.23 Liquid Viscosity - The value (in centipoise) is a measure of the ability of a liquid to flow through a pipe or hole; higher values indicate that the liquid flows less readily under a fixed pressure head. For example, heavy oils have higher viscosities (i.e., are more viscous) than gasoline.

Liquid viscosities decrease rapidly with an increase in temperature. In some cases a table is given to show the effect. In other cases only a single data point was found in the literature.

A basic law of fluid mechanics states that, for most fluids, the force per unit area needed to shear a fluid is proportional to the velocity gradient. The constant of proportionality is the viscosity.

9.24 Solubility in Water - The value represents the pounds of a chemical that will dissolve in 100 pounds of pure water. Solubility usually increases when the temperature increases; where the change has been measured, a table is given to show the effect. The following terms are used when numerical data are either unavailable or not applicable:

The term "Miscible" means that the chemical mixes with water in all proportions. The term "Reacts" means that the substance reacts chemically with water; thus, its solubility has no real meaning. "Insoluble" usually means that very little of the chemical dissolves in 100 pounds of water. (Weak solutions of "Insoluble" materials may still be hazardous to humans, fish, and waterfowl, however.)

9.25 Saturated Vapor Pressure - The value is the pressure (in pounds per square inch absolute) of the vapor in equilibrium with the liquid form at the specified temperature. Vapor pressure values can be used to estimate the relative volatility of chemicals at a given temperature, and to calculate the pressure over a liquid that is shipped in a closed container.

The vapor pressure increases as temperature increases; a table is given to show this effect. Note that the vapor pressure scale is logarithmic.

9.26 Saturated Vapor Density - The value is the weight (in pounds) of one cubic foot of vapor that is in equilibrium with the liquid form.

If it is assumed that the vapor behaves as an ideal gas, the relation pM/RT holds, where p is the vapor pressure, M is the molecular weight, R is the gas constant, and T is the temperature (in absolute units).

Since the vapor pressure varies with temperature (see 9.25), the saturated vapor density also varies with temperature, as shown on the table.

9.27 Ideal Gas Heat Capacity - The value is the number of Btu needed to raise the temperature of one pound of gas by 1° Fahrenheit. The property can be used only when the pressure of the gas is less than about 10 atm. The ideal gas heat capacity is not a function of pressure (below about 10 atm), but it does increase with temperature, and a table is given to show the effect.

4. OTHER INFORMATION SYSTEMS

4.1 CHEMICAL TRANSPORTATION EMERGENCY CENTER (CHEMTREC)

The Manufacturing Chemists Association operates CHEMTREC 24 hours a day. By calling the appropriate toll-free number listed below, one can consult experts on chemicals and spill response.

Continental United States, Alaska,	
Hawaii, and Canada	800-424-9300
District of Columbia	202-483-7616

4.2 NATIONAL FIRE PROTECTION ASSOCIATION (NFPA)

The NFPA's "Recommended System for the Identification of the Fire Hazards of Materials" (NFPA No. 704M) provides basic warning information to fire fighter in industrial plants and storage facilities. This system uses a diamond-shaped warning symbol. The top, left, and right boxes refer to flammability, health, and reactivity hazards respectively and contain a number from 0 to 4. The exact meaning of each number is explained in Section 3 (para 12.3) of this manual, and the applicable number for each chemical are listed in Section 11 under "NFPA Hazard Classifications." The bottom box is used for special hazards; the most common of these is a warning against the use of water, indicated by the symbol W.

4.3 INTERNATIONAL MARITIME ORGANIZATION (IMO)

Foreign vessels using U.S. waterways generally utilize, in addition to U.S. requirements, an international labeling system developed by IMO. This system consists of 15 diamond-shaped labels. Each identifies a particular hazard by a descriptive picture, a word, and a distinctive color.

The number at the bottom of each diamond identifies the class to which IMO has assigned the chemical and is the same as the first digit in the IMO/UN numerical designation, one of the items given under "Chemical Designations" in Section 11 of this manual.

4.4 DEPARTMENT OF TRANSPORTATION (DOT)

The "1996 North American Emergency Response Guidebook" was developed by DOT as a guide for initial actions to be taken when handling incidents involving hazardous materials. The guidebook identifies the most significant potential hazards and gives information and guidance for initial actions to be taken based upon the material involved. Information can be located in the guidebook based upon chemical name or DOT Identification Number.

4.5 OHM-TADS (EPA)

The Oil and Hazardous Materials Technical Assistance Data System (OHM-TADS) has been developed by the Environmental Protection Agency (EPA) to provide information on physical and chemical properties, hazards, pollution characteristics, and shipping information for over 1200 hazardous materials. OHM-TADS consists of a computerized data base which can be accessed from terminals at the 10 EPA Regional Offices, from EPA Headquarters in Washington, D.C., and from Coast Guard Marine Safety Offices. The System can provide either information on specifically requested properties for a material, or it can print all the information in its files for that material.

Some of the same information appears in both this manual and OHM-TADS, but each contains some information not found in the other.

4.6 POISON CONTROL CENTERS

Throughout the country, local Poison Control Centers are maintained at hospitals. These Centers can provide information on the chemical composition, appearance, and toxicity of common poisonous materials as well as information on the symptoms of exposure and on the emergency procedures recommended in the event of exposure. The information available at these centers deals mainly with common household materials.

Poison Control Centers are coordinated through the Department of Health and Human Services in Washington, D.C., but information should be requested through the local centers.

The telephone number of the local Poison Control Center can be found in a local telephone directory.

4.7 ASSOCIATION OF AMERICAN RAILROADS (AAR)

The AAR has developed emergency action guides for 134 various commodities. The guides are contained in a single binder and provide technical information as well as response guidance.

6. SELECTED PROPERTIES OF FRESH WATER, SEA WATER, ICE AND AIR

The following properties are useful for engineering calculations described in the Hazard Assessment Handbook. The values for fresh water are those recorded for pure water. The values for the water of lakes and streams differ somewhat from those of pure water, but since no "standard" fresh water has ever been defined, the values for pure water must be used.

A "standard" sea water has been defined as one containing 35 grams of salts per kilogram of solution. The values for the water of tidal estuaries differ somewhat from those of "standard" sea water because the water has a salinity somewhere between those of fresh and sea waters.

The value for the density of air was derived from the ideal gas law; the air is assumed to be dry and at 1 atmosphere pressure.

6.1 FREEZING POINT

Fresh Water	0°C	32°F
Sea Water	-1.91°C	28.6°F

6.2 LATENT HEAT OF FUSION OF ICE

7. GUIDE TO COMPATIBILITY OF CHEMICALS

The Guide is based in part upon information provided to the Coast Guard by the National Academy of Sciences - U.S. Coast Guard Advisory Committee on Hazardous Materials and represents the latest information available to the Coast Guard on chemical compatibility.

The accidental mixing of one chemical cargo with another can in some cases be expected to result in a vigorous and hazardous chemical reaction. The generation of toxic gases, the heating, overflow, and rupture of cargo tanks, and fire and explosion are possible consequences of such reactions.

The purpose of the Compatibility Chart is to show chemical combinations believed to be dangerously reactive in the case of accidental mixing. It should be recognized, however, that the Chart provides a broad grouping of chemicals with an extensive variety of possible binary combinations. Although one group, generally speaking, can be considered dangerously reactive with another group where an "X" appears on the Chart, there may exist between the groups some combinations which would not dangerously react. The Chart should therefore not be used as an infallible guide. It is offered as an aid in the safe loading of bulk chemical cargoes, with the recommendation that proper safeguards be taken to avoid accidental mixing of binary mixtures for which an "X" appears on the Chart. Proper safeguards would include consideration of such factors as avoidance of the use of common cargo and vent lines and carriage in adjacent tanks having a common bulkhead.

The following procedure explains how the Guide should be used in determining compatibility information:

- (1) Determine the reactivity group of a particular product by referring to the alphabetical list in Table 7.1.
- (1) Enter the Chart with the reactivity group. Proceed across the page. An "X" indicates a reactivity group that forms an unsafe combination with the product in question.

For example, crotonaldehyde is listed in Table 7.1 as belonging in Group 19 (Aldehydes) and also has a notation, (2), which is explained in the footnotes to Table 7.1. The Compatibility Chart shows that chemicals in group 19 should be segregated from sulfuric and nitric acids, caustics, ammonia, and all types of amines (aliphatic, alkanol, and aromatic). Footnote (2), refers the user to Table 7.3 where exceptions to the Compatibility Chart are listed. Here, crotonaldehyde is listed as also being incompatible with Group 1, non-oxidizing acids.

It is recognized that there are wide variations in the reaction rates of individual chemicals within the broad groupings shown reactive by the Compatibility Chart. Some individual materials in one group will react violently with some of the materials in another group and cause great hazard; others will react slowly, or not at all. Accordingly, a useful addition to the Guide would be the identification of specific materials which might not follow the characteristic reactivities of the rest of the materials in its Group. A few such combinations are listed in Table 7.3; as other exceptions to the Chart become known, they will be listed in subsequent revisions of this manual.

FIGURE 1 – COMPATIBILITY CHART

[X indicates incompatible groups]

(containing Zinc salts			

FOOTNOTES TO TABLE

Items with an asterisk (*) are changes per CGD 92-100.

¹ Because of very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (G-MSO), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001. Telephone (202) 267-1577.

² See Table 7.3 - Exceptions to the Chart.

TABLE 7.2
REACTIVITY GROUPS

0. UNASSIGNED CARGOES

Acetone cyanohydrin^{1,2}
 Alkylbenzenesulfonic acid^{1,2}
 Aluminum chloride, Hydrochloric acid solution
 Ammonium hydrogen phosphate solution¹
 Ammonium nitrate solution¹
 Ammonium thiocyanate, Ammonium thiosulfate solution¹
 Benzenesulfonyl chloride^{1,2}
 gamma-Butyrolactone^{1,2}
 Chlorine¹
 Chlorosulfonic acid¹
 Decyloxytetrahydro-thiophene dioxide²
 2,4-Dichlorophenoxyacetic acid, Dimethylamine salt solution^{1,2}
 Dimethylamine salt of 2,4-dichlorophenoxyacetic acid solution^{1,2}
 Diphenylol propane-Epichlorohydrin resins¹
 Dodecylbenzenesulfonic acid^{1,2}
 Dodecylhydroxypropyl sulfide²
 Ethylene oxide¹
 Fluorosilicic acid
 2-Hydroxyethyl acrylate^{1,2}
 Lactic acid²
 Long chain alkaryl sulfonic acid (C16-C60)²
 Magnesium chloride solution^{1,2}
 Molasses residue¹
 Motor fuel anti-knock compounds containing lead alkyls¹
 Naphthalene sulfonic acid-formaldehyde copolymer, sodium salt solution¹
 Nitrating acid¹
 Nitric acid (Greater than 70%)¹
 o-Nitrophenol^{1,2}
 Noxious Liquid Substance, n.o.s. (NLS's)¹
 Oleum^{1,2}
 Phosphorus¹
 Phthalate based polyester polyol²
 Potassium polysulfide, potassium thiosulfide solution (41% or less)
 Sodium chlorate solution^{1,2}
 Sodium dichromate solution^{1,2}
 Sodium hydrogen sulfide, Sodium carbonate solution^{1,2}
 Sodium sulfide, hydrosulfide solution^{1,2}
 Sodium thiocyanate solution^{1,2}
 Sulfur¹
 Tall oil fatty acid, barium salt²

Urea, Ammonium mono- and di-hydrogen phosphate, Potassium chloride solution

1. NON-OXIDIZING MINERAL ACIDS

Di-(2-ethylhexyl)phosphoric acid
 Ferric chloride solution
 Fluorosilicic acid
 Hydrochloric acid
 Phosphoric acid
 Polyaluminum chloride solution

2. SULFURIC ACIDS

Sulfuric acid²
 Sulfuric acid, spent
 Titanium tetrachloride

3. NITRIC ACID

Ferric nitrate, Nitric acid solution
 Nitric acid (70% or less)

4. ORGANIC ACIDS

Acetic acid²
 Acrylic acid²
 Butyric acid
 Cashew nut shell oil (untreated)
 Chloroacetic acid solution
 Chloropropionic acid
 Citric acid
 Decanoic acid
 2,2-Dichloropropionic acid
 2,2-Dimethyloctanoic acid
 2-Ethylhexanoic acid
 Formic acid²
 Glyoxylic acid
 n-Heptanoic acid
 Hexanoic acid
 2-Hydroxy-4-(methylthio)butanoic acid
 Methacrylic acid
 Naphthenic acids
 Neodecanoic acid
 Nonanoic acid
 Nonanoic, tridecanoic acid mixture
 Octanoic acid
 Pentanoic acid
 Propionic acid

Trimethylacetic acid
Undecanoic acid

5. CAUSTICS

Ammonium sulfide solution
Calcium hypochlorite solutions
Caustic potash solution²
Caustic soda solution²
Cresylate spent caustic
Cresylic acid, sodium salt solution
Kraft black liquor
Kraft pulping liquors
Mercaptobenzothiazol, sodium salt solution
Potassium hydroxide solution²
Sodium acetate, glycol, water mixture
(containing sodium hydroxide)
Sodium aluminate solution
Sodium borohydride, sodium hydroxide solution
Sodium carbonate solutions
Sodium cyanide solution
Sodium hydrosulfide solution²
Sodium hydrosulfide, Ammonium sulfide
solution²
Sodium hydroxide solution²
Sodium hypochlorite solution
Sodium 2-mercaptobenzothiazol solution
Sodium naphthenate solution
Sodium nitrite solution
Triphenylborane, caustic soda solution
Trisodium phosphate solution
Vanillin black liquor

6. AMMONIA

Ammonia, anhydrous
Ammonia, aqueous
Ammonium hydroxide (28% or less ammonia)
Ammonium nitrate-urea solution (containing
ammonia)
Urea, Ammonium nitrate solution (containing
Ammonia)

7. ALIPHATIC AMINES

N-Aminoethyl piperazine
Butylamine
Calcium long chain alkyl phenolic amine (C8-
C40)
Cyclohexylamine
Dibutyl amine
Diethylamine²
Diethylenetriamine
Diisobutylamine
Diisopropylamine
Dimethylamine

Dimethylamine solution
N,N-Dimethylcyclohexylamine
Di-n-propylamine
Diphenylamine, reaction product with 2,2,4-
trimethylpentene
Diphenylamines, alkylated
Dodecylamine, tetradecylamine mixture²
Dodecylmethylamine, tetradecyldimethylamine
mixture
Ethylamine²
Ethylamine solution
N-Ethyl-n-butylamine
N-Ethylcyclohexylamine
Ethylenediamine²
2-Ethylhexylamine
Hexamethylenediamine solution
Hexamethylenetetramine
Hexamethylenetetramine solutions
Hexamethylenimine
Isophorone diamine
Long chain polyetheramine in alkyl (C2-C4)
benzenes
Metam sodium solution
Methylamine solution
Morpholine²
Pentaethylenehexamine
Pentaethylenehexamine,
Tetraethylenepentamine mixture
Polyalkyl methacrylate (C1-C20)
Polyolefin amide alkeneamine (C28+)
Polyolefin amide alkeneamine/Molybdenum
oxysulfide mixture
Polyethylene polyamines²
Polyolefin amide alkeneamine polyol
Polyolefinamine in alkyl (C2-C4) benzenes
Polyolefin phenolic amine (C28-C250)
Propanil, mesityl oxide, isophorone mixture
Propyl amine
Sulfohydrocarbon, long chain (C18+) alkylamine
mixture
Tetraethylenepentamine
Triethylamine
Triethylenetetramine²
Trimethylamine solution
Trimethylhexamethylenediamine (2,2,4- and
2,4,4-)

8. ALKANOLAMINES

2-(2-Aminoethoxy)ethanol
Aminoethyldiethanolamine,
Aminoethylethanolamine solution
Aminoethylethanolamine
2-Amino-2-methyl-1-propanol
Diethanolamine
Diethylaminoethanol

Diethylethanolamine
Diisopropanolamine
Dimethylethanolamine
Ethanolamine
Propanolamine
Triethanolamine²
Triisopropanolamine

9. AROMATIC AMINES

Aniline
4-Chloro-2-methylphenoxyacetic acid,
Dimethylamine salt solution
2,6-Diethylaniline
Dimethylamine salt of 4-Chloro-2-
methylphenoxyacetic acid solution
2,6-Dimethylaniline
2-Ethyl-6-methyl-N-(1'-methyl-2-
methoxyethyl)aniline
2-Methyl-6-ethyl aniline
2-Methyl-5-ethyl pyridine
Methylpyridine
3-Methylpyridine
N-Methyl pyrrolidone
Pyridine
Pyridine bases
Toluenediamine
p-Toluidine

10. AMIDES

Acrylamide solution
Alkenyl (C11+) amide
N,N-Dimethylacetamide
N,N-Dimethylacetamide solution
Dimethylformamide
Formamide
Octadecenoamide

11. ORGANIC ANHYDRIDES

Acetic anhydride
Alkenylsuccinic anhydride
Maleic anhydride
Phthalic anhydride
Polyolefin anhydride
Propionic anhydride

12. ISOCYANATES

Diphenylmethane diisocyanate
Isophorone diisocyanate
Polymethylene polyphenyl isocyanate
Toluene diisocyanate
Trimethylhexamethylene diisocyanate (2,2,4-
and 2,4,4-)

13. VINYL ACETATE

Vinyl acetate
Vinyl ethyl ether
Vinyl neodecanoate
Vinyl toluene

14. ACRYLATES

Butyl acrylate
Butyl methacrylate
Butyl methacrylate, decyl methacrylate, cetyl
eicosyl methacrylate mixture
Cetyl eicosyl methacrylate mixture
Decyl acrylate
Dodecylmethacrylate
Dodecyl, pentadecyl methacrylate mixture
Ethyl acrylate
2-Ethylhexyl acrylate
Ethyl methacrylate
Methacrylic resin in ethylene dichloride
Methyl acrylate
Methyl methacrylate
Nonyl methacrylate
Polyalkyl (C18 - C22) acrylate in Xylene
Polyalkyl methacrylate (C1-C20)

15. SUBSTITUTED ALLYLS

Acrylonitrile²
Allyl alcohol²
Allyl chloride
1,3-Dichloropropene
Dichloropropene, dichloropropane mixture
Methacrylonitrile

16. ALKYLENE OXIDES

Butylene oxide
Ethylene oxide, Propylene oxide mixture
Propylene oxide

17. EPICHLOROHYDRIN

Chlorohydrins
Epichlorohydrin

18. KETONES

Acetone²
Acetophenone
Amyl methyl ketone
Butyl heptyl ketone
Camphor oil
Cyclohexanone

Cyclohexanone, cyclohexanol mixture²
 Diisobutyl ketone
 Epoxy resin
 Ethyl amyl ketone
 Isophorone²
 Ketone residue
 Mesityl oxide²
 Methyl amyl ketone
 Methyl butyl ketone
 Methyl diethenolamine
 Methyl ethyl ketone²
 Methyl heptyl ketone
 Methyl isoamyl ketone
 Methyl isobutyl ketone²
 Methyl propyl ketone
 Trifluralin in xylene

19. ALDEHYDES

Acetaldehyde
 Acrolein²
 Butyraldehyde
 Crotonaldehyde²
 Decaldehyde
 Ethylhexaldehyde
 2-Ethyl-3-propylacrolein²
 Formaldehyde solution²
 Formaldehyde, Methanol mixtures²
 Furfural
 Glutaraldehyde solution
 Glyoxal solutions
 3-Methyl butyraldehyde
 Methylolureas
 Octyl aldehyde
 Paraldehyde
 Pentyl aldehyde
 Propionaldehyde
 Valeraldehyde

20. ALCOHOLS, GLYCOLS

Acrylonitrile-Styrene copolymer dispersion in
 Polyether polyol
 Alcoholic beverages
 Alcohol polyethoxylates
 Alcohol polyethoxylates, secondary
 Alcohols (C13 and above)
 Amyl alcohol
 Behenyl alcohol
 Brake fluid base mixtures
 Butyl alcohol²
 Butylene glycol²
 Cetyl-stearyl alcohol
 Choline chloride solutions
 Cyclohexanol
 Decyl alcohol²

Diacetone alcohol²
 Diisobutylcarbinol
 2,2-Dimethylpropane-1,3-diol
 Dodecanol
 Dodecyl alcohol
 Ethoxylated alcohols, C11-C15
 2-Ethoxyethanol
 Ethyl alcohol²
 Ethyl butanol
 Ethylene chlorohydrin
 Ethylene cyanohydrin
 Ethylene glycol²
 2-Ethylhexanol
 Furfuryl alcohol²
 Glycerine²
 Glycerine, dioxanedimethanol mixture
 Glycerol monooleate
 Heptanol
 Hexamethylene glycol
 Hexanol
 Hexylene glycol
 Hydroxy terminated polybutadiene
 Lauryl polyglucose (50% or less)
 3-Methoxy-1-butanol
 Methyl alcohol²
 Methyl amyl alcohol
 Methyl butenol
 Methylbutynol
 2-Methyl-2-hydroxy-3-butyne
 Methyl isobutyl carbinol
 3-Methyl-3-methoxybutanol
 Molasses
 Nonyl alcohol²
 Octanol²
 Octyl alcohol²
 Pentadecanol
 Polyalkylene oxide polyol
 Polybutadiene, hydroxyl terminated
 Polyglycerol
 Polyglycerine, sodium salts solution (containing
 less than 3% sodium hydroxide)²
 Propyl alcohol²
 Propylene glycol²
 Rum
 Sorbitol solutions
 Stearyl alcohol
 Tallow fatty alcohol
 Tetradecanol
 Tridecanol
 Trimethylol propane polyethoxylate
 Undecanol
 Undecyl alcohol

21. PHENOLS, CRESOLS

Benzyl alcohol

Carbolic oil
 Creosote²
 Cresols
 Cresylic acid
 Cresylic acid dephenolized
 Cresylic acid, tar
 2,4-Dichlorophenol
 Dodecyl phenol
 o-Ethyl phenol
 Long chain alkylphenate/phenol sulfide mixture
 Nonylphenol
 Octyl phenol
 Phenol
 Xlenols

22. CAPROLACTAM SOLUTIONS

Caprolactam solution

23-29. UNASSIGNED

30. OLEFINS

Amylene
 Aryl polyolefin (C11-C50)
 Butadiene
 Butadiene, Butylene mixtures (cont. Acetylenes)
 Butene
 Butene oligomer
 Butylene
 1,5,9-Cyclododecatriene
 1,3-Cyclopentadiene dimer
 Cyclopentene
 Decene
 Dicyclopentadiene
 Diisobutylene
 Dipentene
 Dodecene
 Ethylene
 Ethylene-propylene copolymer
 Ethylidene norbornene²
 1-Heptene
 Hexene
 Isoprene
 Latex (ammonia (1% or less) inhibited)
 Methyl acetylene, propadiene mixture
 Methylcyclopentadiene dimer
 2-Methyl-1-pentene
 4-Methyl-1-pentene
 alpha-Methyl styrene
 Myrcene
 Nonene
 1-Octadecene
 Octene
 Olefin mixtures
 alpha-Olefins (C6 - C18) mixtures

alpha-Olefins (C13 and above)
 1,3-Pentadiene
 Pentene
 Pentene, Miscellaneous hydrocarbon mixture²
 alpha-Pinene
 beta-Pinene
 Polybutene
 Poly(4+)isobutylene
 Polyolefin (molecular weight 300+)
 Polypropylene
 Poly(5+)propylene
 Propylene
 Propylene butylene polymer
 Propylene dimer
 Propylene tetramer
 Propylene trimer
 Styrene
 Tetradecene
 Tridecene
 Triisobutylene
 Tripropylene
 Turpentine
 Undecene

31. PARAFFINS

Alkanes (C6-C9)
 n-Alkanes (C10+)
 iso- & cyclo- Alkanes (C10-C11)
 iso- & cyclo- Alkanes (C12+)
 Butane
 Cycloheptane
 Cyclohexane
 Cyclopentane
 Decane
 Dodecane
 Ethane
 Ethyl cyclohexane
 Heptane
 Hexane²
 Methane
 Methylcyclohexane
 2-Methyl pentane
 Nonane
 Octane
 Pentane
 Propane
 iso-Propylcyclohexane
 Tridecane
 Waxes: Paraffin

32. AROMATIC HYDROCARBONS

Alkyl (C3-C4) benzenes
 Alkyl (C5-C8) benzenes
 Alkyl (C9+) benzenes

Alkyl acrylate-Vinyl pyridine copolymer in
 Toluene
 Alkylbenzene, alkylindane, alkylindene mixture
 (each C12-C17)
 Benzene
 Benzene, Hydrocarbon mixture (10% benzene
 or more)
 Benzene, Toluene, Xylene mixture
 Butylbenzene
 Butyl phenol, Formaldehyde resin in Xylene
 Butyl toluene
 Cumene
 Cymene
 Decylbenzene
 Dialkyl(C10 - C14) benzenes
 Diethylbenzene
 Diisopropylbenzene
 Diisopropyl naphthalene
 Diphenyl
 Dodecylbenzene
 Dodecylxylene
 Ethyl benzene
 Ethyl toluene
 Isopropylbenzene
 Methyl naphthalene
 Naphthalene
 1-Phenyl-1-xylyl ethane
 Poly(2+)cyclic aromatics
 Propylbenzene
 Pseudocumene
 Tetradecylbenzene
 Tetrahydronaphthalene
 1,2,3,5-Tetramethylbenzene
 Toluene
 Tridecylbenzene
 Triethylbenzene
 Trimethylbenzene
 Undecylbenzene
 Xylene

33. MISCELLANEOUS HYDROCARBON MIXTURES

Alachlor technical
 Alkylbenzenesulfonic acid, sodium salt solutions
 Alkyl dithiothiadiazole (C6-C24)
 Asphalt blending stocks: roofers flux
 Asphalt blending stocks: straight run residue
 Aviation alkylates
 Calcium sulfonate, Calcium carbonate,
 Hydrocarbon solvent mixture
 Coal tar
 Coal tar pitch
 Decahydronaphthalene
 Diphenyl, Diphenyl ether
 Distillates: flashed feed stocks

Distillates: straight run
 Drilling mud (low toxicity) (if flammable or
 combustible)
 Gas oil: cracked
 Gasoline blending stocks: alkylates
 Gasoline blending stocks: reformates
 Gasolines:
 Automotive (not over 4.23 grams lead per
 gal.)
 Aviation (not over 4.86 grams lead per gal.)
 Casinghead (natural)
 Polymer
 Straight run
 Jet Fuels:
 JP-4
 JP-5
 JP-8
 Kerosene
 Mineral spirits
 Naphtha:
 Coal tar solvent
 Petroleum
 Solvent
 Stoddard solvent
 Varnish Makers' and Painters'
 Oil, fuel:
 No. 1
 No. 1-D
 No. 2
 No. 2-D
 No. 4
 No. 5
 No. 6
 Oil, misc:
 Aliphatic
 Aromatic
 Clarified
 Coal
 Crude
 Diesel
 Gas, high pour
 Heartcut distillate
 Linseed
 Lubricating
 Mineral
 Mineral seal
 Motor
 Neatsfoot
 Penetrating
 Pine
 Rosin
 Sperm
 Spindle
 Turbine
 Residual
 Road

Transformer
 Oxyalkylated alkyl phenol formaldehyde
 Petrolatum
 Pine oil
 Sodium petroleum sulfonate
 Sulfohydrocarbon (C3-C88)
 Waxes: Petroleum
 White Spirit (low(15-20%) aromatic)

34. ESTERS

Alkane (C14-C17) sulfonic acid, sodium salt solution
 Alkyl(C8+)amine, Alkenyl (C12+) acid ester mixture
 Alkyl ester copolymer (C6-C18)
 Alkyl (C7-C9) nitrates²
 Alkyl phenol sulfide (C8-C40)
 Amyl acetate
 Animal and fish oils, n.o.s.
 Animal and fish acid oils and distillates, n.o.s.
 Barium long chain alkaryl sulfonate (C11-C50)
 Barium long chain alkyl (C8-C14) phenate sulfide
 Benzene tricarboxylic acid, trioctyl ester
 Benzylacetate
 Butyl acetate
 Butyl benzyl phthalate
 n-Butyl butyrate
 Butyl formate
 iso-Butyl isobutyrate
 n-Butyl propionate
 Calcium alkyl(C9)phenol sulfide, polyolefin phosphorosulfide mixture
 Calcium long chain alkaryl sulfonate (C11-C50)
 Calcium long chain alkyl phenate (C8-C40)
 Calcium long chain alkyl phenate sulfide (C8-C40)
 Calcium long chain alkyl salicylate (C13+)
 Calcium nitrate, Magnesium nitrate, Potassium chloride solution
 Cobalt naphthenate in solvent naphtha
 Coconut oil, fatty acid
 Cottonseed oil, fatty acid
 Cyclohexyl acetate
 Decyl acetate
 Dialkyl(C7 - C13) phthalates
 Dibutyl hydrogen phosphonate
 Dibutyl phthalate
 Diethylene glycol butyl ether acetate
 Diethylene glycol ethyl ether acetate
 Diethylene glycol methyl ether acetate
 Diethylene glycol phthalate
 Di-(2-ethylhexyl)adipate
 Di-(2-ethylhexyl)phthalate
 Diethyl phthalate

Diethyl sulfate
 Diheptyl phthalate
 Dihexyl phthalate
 Di-n-hexyl adipate
 Diisobutyl phthalate
 Diisodecyl phthalate
 Diisononyl adipate
 Diisononyl phthalate
 Diisooctyl phthalate
 Dimethyl adipate
 Dimethylcyclicsiloxane hydrolyzate
 Dimethyl glutarate
 Dimethyl hydrogen phosphite²
 Dimethyl naphthalene sulfonic acid, sodium salt solution²
 Dimethyl phthalate
 Dimethylpolysiloxane
 Dimethyl succinate
 Dinonyl phthalate
 Dioctyl phthalate
 Dipropylene glycol dibenzoate
 Ditridecyl phthalate
 2-Dodecenylsuccinic acid, dipotassium salt solution
 Diundecyl phthalate
 2-Ethoxyethyl acetate
 Ethyl acetate
 Ethyl acetoacetate
 Ethyl butyrate
 Ethylene carbonate
 Ethylene glycol acetate
 Ethylene glycol butyl ether acetate
 Ethylene glycol diacetate
 Ethylene glycol ethyl ether acetate
 Ethylene glycol methyl ether acetate
 Ethyl-3-ethoxypropionate
 Ethyl hexyl phthalate
 Ethyl propionate
 Fatty acids (saturated, C13+)
 Glycerol polyalkoxylate
 Glyceryl triacetate
 Glycidyl ester of C10 trialkyl acetic acid
 Glycidyl ester of tridecylacetic acid
 Heptyl acetate
 Hexyl acetate
 Lauric acid
 Lecithin (soyabean)
 Magnesium long chain alkaryl sulfonate (C11-C50)
 Magnesium long chain alkyl phenate sulfide (C8-C20)
 Magnesium long chain alkyl salicylate (C11+)
 3-Methoxybutyl acetate
 1-Methoxy-2-propyl acetate
 Methyl acetate
 Methyl acetoacetate

Methyl amyl acetate
 Methyl butyrate
 Methyl formate
 3-Methyl-3-methoxybutyl acetate
 Methyl salicylate
 Metolachlor
 Naphthalene sulfonic acid, sodium salt solution
 (40% or less)
 Nonyl acetate
 n-Octyl acetate
 Octyl decyl adipate
 Oil, edible:
 Beechnut
 Castor
 Cocoa butter
 Coconut²
 Cod liver
 Corn
 Cottonseed
 Fish²
 Groundnut
 Hazelnut
 Lard
 Lanolin
 Nutmeg butter
 Olive
 Palm²
 Palm kernel
 Peanut
 Poppy
 Poppy seed
 Raisin seed
 Rapeseed
 Rice bran
 Safflower
 Salad
 Sesame
 Soya bean
 Sunflower
 Sunflower seed
 Tucum
 Vegetable
 Walnut
 Oil, misc.:
 Animal
 Coconut oil, fatty acid methyl ester
 Cotton seed oil, fatty acid
 Lanolin
 Palm kernel oil, fatty acid methyl ester
 Palm oil, methyl ester
 Pilchard
 Perilla
 Soapstock
 Soyabean (epoxidized)
 Tall
 Tall, fatty acid²

Tung
 Olefin/alkyl ester copolymer (molecular weight
 2000+)
 Oleic acid
 Palm kernel acid oil
 Palm kernel acid oil, methyl ester
 Palm stearin
 n-Pentyl propionate
 Poly(2-8)alkylene glycol monoalkyl(C1-C6) ether
 acetate
 Polydimethylsiloxane
 Polyferric sulfate solution
 Polymethylsiloxane
 Poly(20)oxyethylene sorbitan monooleate
 Polysiloxane
 Polyolefin amide alkeneamine borate (C28-
 C250)
 Polyolefin ester (C28-C250)
 Polyolefin phosphorosulfide, barium derivative
 (C28-C250)
 Potassium oleate
 Propyl acetate
 Propylene carbonate
 Propylene glycol methyl ether acetate
 Sodium acetate, glycol, water mixture (not
 containing sodium hydroxide)²
 Sodium acetate solution
 Sodium benzoate solution
 Sodium dimethyl naphthalene sulfonate solution²
 Sodium long chain alkyl salicylate (C13+)
 Sodium naphthalene sulfonate solution
 Soyabean oil (epoxidized)
 Stearic acid
 Tall oil
 Tallow²
 Tallow fatty acid²
 Tributyl phosphate
 Tricresyl phosphate
 Tridecanoic acid
 Tridecyl acetate
 Triethylene glycol di-(2-ethylbutyrate)
 Triethyl phosphate
 Triethyl phosphite²
 Triisooctyl trimellitate²
 Triisopropylated phenyl phosphates
 2,2,4-Trimethyl-1,3-pentanediol diisobutyrate
 2,2,4-Trimethyl-1,3-pentanediol-1-isobutyrate
 2,2,4-Trimethyl-3-pentanol-1-isobutyrate
 Trimethyl phosphite²
 Trisodium nitrilotriacetate
 Trixylyl phosphate
 Trixylenyl phosphate
 Vegetable acid oils and distillates, n.o.s.
 Vegetable oils, n.o.s.
 Waxes: Carnauba
 Zinc alkaryl dithiophosphate (C7-C16)

Zinc alkyl dithiophosphate (C3-C14)

35. VINYL HALIDES

Vinyl chloride
Vinylidene chloride

36. HALOGENATED HYDROCARBONS

Benzyl chloride
Carbon tetrachloride
Chlorinated paraffins (C10 - C13)
Chlorinated paraffins (C14 - C17)
Chlorobenzene
Chlorodifluoromethane
Chloroform
Chlorotoluene
Dichlorobenzene
Dichlorodifluoromethane
1,1-Dichloroethane
1,6-Dichlorohexane
2,2'-Dichloroisopropyl ether
Dichloromethane
Dichloropropane
Ethyl chloride
Ethylene dibromide
Ethylene dichloride²
Methyl bromide
Methyl chloride
Monochlorodifluoromethane
n-Propyl chloride
Pentachloroethane
Perchloroethylene
1,1,2,2-Tetrachloroethane
1,2,4-Trichlorobenzene
1,1,1-Trichloroethane²
1,1,2-Trichloroethane
Trichloroethylene²
1,2,3-Trichloropropane
1,1,2-trichloro-1,2,2-trifluoroethane

37. NITRILES

Acetonitrile
Adiponitrile
Lactonitrile solution
Propionitrile
Tallow nitrile

38. CARBON DISULFIDE

Carbon disulfide

39. SULFOLANE

Sulfolane

40. GLYCOL ETHERS

Diethylene glycol²
Diethylene glycol butyl ether
Diethylene glycol dibutyl ether
Diethylene glycol diethyl ether
Diethylene glycol ethyl ether
Diethylene glycol methyl ether
Diethylene glycol n-hexyl ether
Diethylene glycol phenyl ether
Diethylene glycol propyl ether
Dipropylene glycol
Dipropylene glycol butyl ether
Dipropylene glycol methyl ether
Ethoxy triglycol
Ethylene glycol hexyl ether
Ethylene glycol methyl butyl ether
Ethylene glycol monoalkyl ethers
Ethylene glycol tert-butyl ether
Ethylene glycol butyl ether
Ethylene glycol dibutyl ether
Ethylene glycol ethyl ether
Ethylene glycol isopropyl ether
Ethylene glycol methyl ether
Ethylene glycol phenyl ether
Ethylene glycol phenyl ether, Diethylene glycol phenyl ether mixture
Ethylene glycol propyl ether
Hexaethylene glycol
Methoxy triglycol
Nonyl phenol (ethoxylated)
Nonyl phenol poly(4-12)ethoxylates
Polyalkylene glycol butyl ether
Polyalkylene glycols, Polyalkylene glycol monoalkyl ethers mixtures
Polyethylene glycols
Polyethylene glycol dimethyl ether
Poly(2-8)alkylene glycol monoalkyl(C1-C6) ether
Polyethylene glycol monoalkyl ether
Polypropylene glycols
Polypropylene glycol methyl ether
n-Propoxypropanol
Propylene glycol monoalkyl ether
Propylene glycol ethyl ether
Propylene glycol methyl ether
Propylene glycol n-butyl ether
Propylene glycol phenyl ether
Propylene glycol propyl ether
Tetraethylene glycol
Triethylene glycol
Triethylene glycol butyl ether
Triethylene glycol butyl ether mixture
Triethylene glycol ether mixture
Triethylene glycol ethyl ether
Triethylene glycol methyl ether

Tripropylene glycol
Tripropylene glycol methyl ether

41. ETHERS

Alkaryl polyether (C9-C20)
Butyl ether
2,2-Dichloroethyl ether
Diethyl ether
Diglycidyl ether of Bisphenol F
Diglycidyl ether of bisphenol A
Dimethyl furan
1,4-Dioxane
Diphenyl ether
Diphenyl ether, Diphenyl phenyl ether mixture
Ethyl ether
Long chain alkaryl polyether (C11-C20)
Methyl tert-butyl ether²
Propyl ether
Tetrahydrofuran
1,3,5-Trioxane
Polyether (molecular weight 2000+)

42. NITROCOMPOUNDS

o-Chloronitrobenzene
Dinitrotoluene
Nitrobenzene
Nitroethane
Nitropropane
Nitropropane, Nitroethane mixture
Nitrotoluene

43. MISCELLANEOUS WATER SOLUTIONS

Aluminum sulfate solution²
2-Amino-2-hydroxymethyl-1,3-propanediol solution
Ammonium bisulfite solution²
Ammonium nitrate-urea solution (not containing ammonia)
Ammonium polyphosphate solution
Ammonium sulfate solution
Ammonium thiosulfate solution
Sulfonated polyacrylate solutions²
Calcium bromide solution
Calcium chloride solution
Clay slurry
Corn syrup
Dextrose solution
2,4-Dichlorophenoxyacetic acid, Diethanolamine salt solution
2,4-Dichlorophenoxyacetic acid, Triisopropanolamine salt solution²
Diethanolamine salt of 2,4-Dichlorophenoxyacetic acid solution

Diethylenetriamine pentaacetic acid, pentasodium salt solution
Dodecyl diphenyl ether disulfonate solution
Drilling brine (containing Calcium, Potassium or Sodium salts)
Drilling brine (containing Zinc salts)
Drilling mud (low toxicity) (if non-flammable or non-combustible)
Ethylenediaminetetracetic acid, tetrasodium salt solution
Ethylene, Vinyl acetate copolymer emulsion
Ferric hydroxyethylethylenediaminetriacetic acid, trisodium salt solution²
Fish solubles (water based fish meal extracts)
Fructose solution
Fumaric adduct of Rosin, water dispersion
Hexamethylenediamine adipate solution
N-(Hydroxyethyl)ethylenediaminetriacetic acid, trisodium salt solution
Kaolin clay slurry
Latex, liquid synthetic
Lignin liquor
Liquid streptomyces solubles
N-Methylglucamine solution
N-Methylglucamine solution (70% or less)
Naphthenic acid, sodium salt solution
Potassium chloride solution
Potassium thiosulfate solution
Rosin soap (disproportionated) solution
Sewage sludge, treated
Sodium alkyl sulfonate solution
Sodium hydrogen sulfite solution
Sodium polyacrylate solution²
Sodium salt of Ferric hydroxyethylethylenediamine triacetic acid solution
Sodium silicate solution²
Sodium sulfide solution
Sodium sulfite solution
Sodium tartrates, Sodium succinates solution
Sulfonated polyacrylate solutions²
Tall oil soap (disproportionated) solution
Tetrasodium salt of EDTA solution
Triisopropanolamine salt of 2,4-Dichlorophenoxyacetic acid solution
Urea, Ammonium nitrate solution (not containing Ammonia)
Urea, Ammonium phosphate solution
Urea solution
Vegetable protein solution (hydrolysed)
Water

FOOTNOTES TO TABLE

¹ Because of very high reactivity or unusual conditions of carriage or potential compatibility problems, this product is not assigned to a specific group in the Compatibility Chart. For additional compatibility information, contact Commandant (G-MTH), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001. Telephone (202) 267-1577.

² See Table 7.3 - Exceptions to the Chart.

TABLE 7.3
EXCEPTIONS TO THE CHART

1. The binary combinations listed below have been tested as prescribed in Appendix III and found not to be dangerously reactive. These combinations are exceptions to the Compatibility Chart (Figure 1) and may be stowed in adjacent tanks.

Member of Reactive Group	Compatible with	Tetradecylamine mixture (7) Ethylenediamine (7)	
Acetone (18)	Diethylenetriamine (7)		Butyl alcohol (20)
Acetone cyanohydrin (0)	Acetic acid (4)		tert-Butyl alcohol (20)
Acrylonitrile (15)	Triethanolamine (8)		Butylene glycol (20)
1,3-Butylene glycol (20)	Morpholine (7)		Creosote (21)
1,4-Butylene glycol (20)	Ethylamine (7)		Diethylene glycol (40)
	Triethanolamine (8)		Ethyl alcohol (20)
Gamma-Butyrolactone(0)	N-Methyl-2-pyrrolidone (9)		Ethylene glycol (20)
Caustic potash, 50% or less (5)	Isobutyl alcohol (20)		Ethyl hexanol (20)
	Ethyl alcohol (20)		Glycerine (20)
	Ethylene glycol (20)		Isononyl alcohol (20)
	Isopropyl alcohol (20)		Isophorone (18)
	Methyl alcohol (20)		Methyl butyl ketone (18)
	iso-Octyl alcohol (20)		Methyl isobutyl ketone (18)
Caustic soda, 50% or less (5)	Butyl alcohol (20)		Methyl ethyl ketone (18)
	tert-Butyl alcohol, Methanol mixtures		Propyl alcohol (20)
	Decyl alcohol (20)		Propylene glycol (20)
	Iso-Decyl alcohol	Oleum (0)	Hexane (31)
	Diacetone alcohol (20)		Dichloromethane (36)
	Diethylene glycol (40)		Perchloroethylene (36)
	Ethyl alcohol (40%, whiskey) (20)	1,2-Propylene glycol (20)	Diethylenetriamine (7)
	Ethylene glycol (20)		Polyethylene polyamines (7)
	Ethylene glycol, Diethylene glycol mixture (20)		Triethylenetetramine (7)
	Ethyl hexanol (Octyl alcohol) (20)	Sodium dichromate, 70% (0)	Methyl alcohol (20)
	Methyl alcohol (20)	Sodium hydrosulfide solution (5)	Iso-Propyl alcohol (20)
	Nonyl alcohol (20)	Sulfuric acid (2)	Coconut oil (34)
	iso-Nonyl alcohol (20)		Coconut oil acid (34)
	Propyl alcohol (20)		Palm oil (34)
	Propylene glycol (20)		Tallow (34)
	Sodium chlorate (0)	Sulfuric acid, 98% or less (2)	Choice white grease tallow (34)
	iso-Tridecanol (20)		
Dodecyl and	Tall oil, fatty acid (34)		

2. The binary combinations listed below have been determined to be dangerously reactive, based on either data obtained in the literature or on laboratory testing which has been carried out in accordance with procedures prescribed in Appendix III. These combinations are exceptions to the Compatibility Chart (Figure 1) and may not be stowed in adjacent tanks.

Acetone cyanohydrin (0) is not compatible with Groups 1-12, 16, 17 and 22.

Acrolein (19) is not compatible with Group 1, Non-Oxidizing Mineral Acids.

Acrylic acid (4) is not compatible with Group 9, Aromatic Amines.

Acrylonitrile (15) is not compatible with Group 5 (Caustics)

Alkylbenzenesulfonic acid (0) is not compatible with Groups 1-3, 5-9, 15, 16, 18, 19, 30, 34, 37, and strong oxidizers.

Allyl alcohol (15) is not compatible with Group 12, Isocyanates.

Alkyl (C7-C9) nitrates (34) is not compatible with Group 1, Non-oxidizing Mineral Acids.

Aluminum sulfate solution (43) is not compatible with Groups 5-11.

Ammonium bisulfite solution (43) is not compatible with Groups 1, 3, 4, and 5.

Benzenesulfonyl chloride (0) is not compatible with Groups 5-7, and 43.

1,4-Butylene glycol (20) is not compatible with Groups 1-9.

gamma-Butyrolactone (0) is not compatible with Groups 1-9.

Caustic soda solution, 50% or less (5) is not compatible with 1,4-Butylene glycol (20).

Crotonaldehyde (19) is not compatible with Group 1, Non-Oxidizing Mineral Acids.

Cyclohexanone, Cyclohexanol mixture (18) is not compatible with Group 12, Isocyanates.

2,4-Dichlorophenoxyacetic acid, Triisopropanolamine salt solution (43) is not compatible with Group 3, Nitric acid.

2,4-Dichlorophenoxyacetic acid, Dimethylamine salt solution (0) is not compatible with Groups 1-5, 11, 12, and 16.

Dimethyl hydrogen phosphite (34) is not compatible with Groups 1 and 4.

Dimethyl naphthalene sulfonic acid, sodium salt solution (34) is not compatible with Group 12, Formaldehyde, and strong oxidizing agents.

Dodecylbenzenesulfonic acid (0) is not compatible with oxidizing agents and Groups 1, 2, 3, 5, 6, 7, 8, 9, 15, 16, 18, 19, 30, 34, and 37.

Ethylenediamine (7) is not compatible with Ethylene dichloride (36).

Ethylene dichloride (36) is not compatible with Ethylenediamine (7).

Ethylidene norbornene (30) is not compatible with Groups 1-3 and 5-8.

2-Ethyl-3-propylacrolein (19) is not compatible with Group 1, Non-Oxidizing Mineral Acids.

Ferric hydroxyethylethylenediamine triacetic acid, Sodium salt solution (43) is not compatible with Group 3, Nitric acid.

Fish oil (34) is not compatible with Sulfuric acid (2).

Formaldehyde (over 50%) in Methyl alcohol (over 30%) (19) is not compatible with Group 12, Isocyanates.

Formic acid (4) is not compatible with Furfural alcohol (20).

Furfuryl alcohol (20) is not compatible with Group 1, Non-Oxidizing Mineral Acids and Formic acid (4).

2-Hydroxyethyl acrylate is not compatible with Groups 2, 3, 5-8 and 12.

Isophorone (18) is not compatible with Group 8, Alkanolamines.

Magnesium chloride solution (0) is not compatible with Groups 2, 3, 5, 6 and 12.

Mesityl oxide (18) is not compatible with Group 8, Alkanolamines.

Methacrylonitrile (15) is not compatible with Group 5 (Caustics).

Methyl tert-butyl ether (41) is not compatible with Group 1, Non-oxidizing Mineral Acids.

Naphtha, cracking fraction (33) is not compatible with strong acids, caustics or oxidizing agents.

o-Nitrophenol (0) is not compatible with Groups 2, 3, and 5-10.

Octyl nitrates (all isomers) see Alkyl (C7-C9) nitrates.

Oleum (0) is not compatible with Sulfuric acid (2) and 1,1,1-Trichloroethane (36).

Phthalate based polyester polyol (0) is not compatible with group 2, 3, 5, 7 and 12.

Pentene, Miscellaneous hydrocarbon mixtures (30) are not compatible with strong acids or oxidizing agents.

Polyglycerine, Sodium salts solution (20) is not compatible with Groups 1, 4, 11, 16, 17, 19, 21, and 22.

Sodium acetate, Glycol, Water mixture (1% or less Sodium hydroxide) (34) is not compatible with Group 12 (Isocyanates).

Sodium chlorate solution (50% or less) (0) is not compatible with Groups 1-3, 5, 7, 8, 10, 12, 13, 17, and 20.

Sodium dichromate solution (70% or less) (0) is not compatible with Groups 1-3, 5, 7, 8, 10, 12, 13, 17, and 20.

Sodium dimethyl naphthalene sulfonate solution (34) is not compatible with Group 12, Formaldehyde and strong oxidizing agents.

Sodium hydrogen sulfide, Sodium carbonate solution (0) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium hydrosulfide (5) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium hydrosulfide, Ammonium sulfide solution (5) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium polyacrylate solution (43) is not compatible with Group 3, Nitric Acid.

Sodium salt of Ferric hydroxyethylethylenediamine triacetic acid solution (43) is not compatible with Group 3, Nitric acid.

Sodium silicate solution (43) is not compatible with Group 3, Nitric acid.

Sodium sulfide, hydrosulfide solution (0) is not compatible with Groups 6 (Ammonia) and 7 (Aliphatic amines).

Sodium thiocyanate (56% or less) (0) is not compatible with Groups 1-4.

Sulfonated polyacrylate solution (43) is not compatible with Group 5 (Caustics).

Sulfuric acid (2) is not compatible with Fish oil (34), or Oleum (0).

Tallow fatty acid (34) is not compatible with Group 5, Caustics.

1,1,1-Trichloroethane (36) is not compatible with Oleum (0).

Trichlorethylene (36) is not compatible with Group 5, Caustics.

Triethyl phosphite (34) is not compatible with Groups 1 and 4.

Trimethyl phosphite (34) is not compatible with Groups 1 and 4.

1,3,5-Trioxane (41) is not compatible with Group 1 (Non-oxidizing mineral acids) and Group 4 (Organic acids).

8. INDEX OF SYNONYMS

SYNONYM	COMPOUND NAMES
300° oil	= Oils, miscellaneous: mineral seal
Aatrex herbicide	= Atrazine
Absorbent oil	= Oils, miscellaneous: absorption
Accelerator HX	= N-Ethylcyclohexylamine
Acetal	= Acetal
Acetaldehyde diethylacetal	= Acetal
Acetaldehyde, chloro-	= Chloroacetaldehyde
Acetaldehyde, trichloro	= Trichloroacetaldehyde
Acetaldehyde	= Acetaldehyde
p-Acetaldehyde	= Paraldehyde
Acetate C-7	= Heptyl acetate
Acetate C-9	= Nonyl acetate
Bis (Acetate) dioxouranium	= Uranyl acetate
(Acetato-o) phenyl mercury	= Phenylmercuric acetate
Acetatophenylmercury	= Phenylmercuric acetate
Acetic acid anhydride	= Acetic anhydride
Acetic acid n-amyl ester	= Amyl acetate (all isomers)
Acetic acid, 3-methoxybutyl ester	= 3-Methoxybutyl acetate
Acetic acid, ammonium salt	= Ammonium acetate
Acetic acid, benzyl ester	= Benzyl acetate
Acetic acid, chromium salt	= Chromic acetate
Acetic acid, cupric salt	= Copper acetate
Acetic acid, cyclohexyl ester	= Cyclohexyl acetate
Acetic acid, dimethylamide	= Dimethylacetamide
Acetic acid, dimethylamide	= N,N-Dimethyl acetamide solution (40% or less)
Acetic acid, ethyl ester	= Ethyl acetate
Acetic acid, fluoro-, sodium salt	= Sodium fluoroacetate
Acetic acid, heptyl ester	= Heptyl acetate
Acetic acid, hexyl ester	= Hexyl acetate
Acetic acid, isobutyl ester	= Isobutyl acetate
Acetic acid, isopropyl ester	= Isopropyl acetate
Acetic acid, methyl ester	= Methyl acetate
Acetic acid, n-butyl ester	= n-Butyl acetate
Acetic acid, n-nonyl ester	= Nonyl acetate
Acetic acid, n-propyl ether	= n-Propyl acetate
Acetic acid, nickel (II) salt	= Nickel acetate
Acetic acid, phenylmethyl ester	= Benzyl acetate
Acetic acid, sec-butyl ester	= sec-Butyl acetate
Acetic acid, tert-butyl ester	= tert-Butyl acetate
Acetic acid, thallium (I) salt	= Thallium acetate
Acetic acid, thallous salt	= Thallium acetate
Acetic acid, zinc salt	= Zinc acetate
Acetic acid	= Acetic acid
Acetic aldehyde	= Acetaldehyde
Acetic anhydride	= Acetic anhydride
Acetic ester	= Ethyl acetate
Acetic ether	= Ethyl acetate
Acetoacetic acid, ethyl ester	= Ethyl acetoacetate
Acetoacetic acid, methyl ester	= Methyl acetoacetate
Acetoacetic ester	= Ethyl acetoacetate

SYNONYM	COMPOUND NAMES
Acetocyanohydrin	= Lactonitrile solution (80% or less)
Acetone cyanohydrin	= Acetone cyanohydrin
Acetone	= Acetone
Acetonitrile	= Acetonitrile
Acetonyl bromide	= Bromoacetone
Acetophenone	= Acetophenone
alpha-Acetoxytoluene	= Benzyl acetate
Acetyl bromide	= Acetyl bromide
Acetyl chloride	= Acetyl chloride
Acetyl hydroperoxide	= Peracetic acid
Acetyl oxide	= Acetic anhydride
Acetyl peroxide solution	= Acetyl peroxide solution
Acetylacetone	= Acetylacetone
Acetylbenzene	= Acetophenone
Acetylene dichloride	= 1,2-Dichloroethylene
Acetylene tetrachloride	= Tetrachloroethane
Acetylene	= Acetylene
Acetylenogen	= Calcium carbide
Acetylmethyl bromide	= Bromoacetone
Acid ammonium carbonate	= Ammonium bicarbonate
Acid ammonium fluoride	= Ammonium bifluoride
Acraldehyde	= Acrolein
Acridine	= Acridine
Acrolein	= Acrolein
Acrylaldehyde	= Acrolein
Acrylamide solution	= Acrylamide solution
Acrylic acid amide (50%)	= Acrylamide solution
Acrylic acid, 2-ethylhexylester	= 2-Ethylhexyl acrylate
Acrylic acid, decyl ester	= n-Decyl acrylate
Acrylic acid, ethyl ester	= Ethyl acrylate
Acrylic acid, isobutyl ester	= iso-butyl acrylate
Acrylic acid, methyl ester	= Methyl acrylate
Acrylic acid, n-butyl ester	= n-Butyl acrylate
Acrylic acid	= Acrylic acid
Acrylic aldehyde	= Acrolein
Acrylic amide 50%	= Acrylamide solution
Acrylonitrile	= Acrylonitrile
Activated charcoal	= Charcoal
Adacene-12	= 1-Dodecene
Adipic acid, bis (2-ethylhexyl) ester	= Di-(2-ethylhexyl) adipate
Adipic acid, bis (2-ethylhexyl) ester	= Dioctyl adipate
Adipic acid, dimethyl ester	= Dimethyl adipate
Adipic acid	= Adipic acid
Adipinic acid	= Adipic acid
Adipol 2EH	= Dioctyl adipate
Adiponitrile	= Adiponitrile
Adronal	= Cyclohexanol
Aerosol surfactant	= Dioctyl sodium sulfosuccinate
Aerothene	= Trichloroethane
AIP	= Aluminum phosphide
Alaninol	= 2-Propanolamine
Albone	= Hydrogen peroxide
Albus	= Mercuric ammonium chloride
Alcohol C-10	= n-Decyl alcohol

SYNONYM	COMPOUND NAMES
Alcohol C-11 (undecylic)	= Undecanol
Alcohol C-8	= Octanol
Alcohol	= Ethyl alcohol
Aldehyde-collidine	= Methylethylpyridine
Aldehyde C-10	= Decaldehyde
Aldehydine	= Methylethylpyridine
Aldifen	= 2,4-Dinitrophenol
Aldrin	= Aldrin
Alfa-tox	= Diazinon
Alimet	= 2-Hydroxy-4-(methylthio)-butanoic acid
Alkaway liquid alkaline deruster	= Boiler compound, liquid
Alkron	= Methyl parathion
Alkyl(C ₁₁ – C ₁₇)benzenesulfonic acid	= Alkyl(C ₁₁ . C ₁₇)benzenesulfonic acid
Alkylbenzenesulfonic acid, sodium salt	= Sodium alkylbenzenesulfonates
Allene-methylacetylene mixture	= Methyl acetylene, propadiene mixture
Allomaleic acid	= Fumaric acid
Allyl alcohol	= Allyl alcohol
Allyl aldehyde	= Acrolein
Allyl bromide	= Allyl bromide
Allyl chloride	= Allyl chloride
Allyl chlorocarbonate	= Allyl chloroformate
Allyl chloroformate	= Allyl chloroformate
Allyl trichloride	= 1,2,3-Trichloropropane
Allylethylene	= 1,4-Pentadiene
Allylsilicone trichloride	= Allyltrichlorosilane
Allyltrichlorosilane	= Allyltrichlorosilane
alpha,alpha,alpha-trifluoro-2,6-Dinitro- n,n-dipropyl-p-toluidine	= Trifluralin
Alrowet D65	= Dioctyl sodium sulfosuccinate
Alum	= Aluminum sulfate
Aluminum chloride solution	= Aluminum chloride solution
Aluminum chloride	= Aluminum chloride
Aluminum ethyl dichloride	= Ethylaluminum dichloride
Aluminum fluoride	= Aluminum fluoride
Aluminum monophosphide	= Aluminum phosphide
Aluminum nitrate nonahydrate	= Aluminum nitrate
Aluminum nitrate	= Aluminum nitrate
Aluminum phosphide	= Aluminum phosphide
Aluminum sulfate solution	= Aluminum sulfate solution
Aluminum sulfate	= Aluminum sulfate
Aluminum triethyl	= Triethylaluminum
Aluminum triisobutyl	= Triisobutylaluminum
Amchlor	= Ammonium chloride
Amchloride	= Ammonium chloride
American palm kernel oil	= Oils, edible: tucum
3-Amino-1-methylbenzene	= m-Toluidine
2-Amino-1-methylbenzene	= o-Toluidine
4-Amino-1-methylbenzene	= p-Toluidine
2-Amino-1-propanol	= 2-Propanolamine
3-Amino-1-propanol	= n-Propanolamine
1-Amino-2-ethylhexane	= 2-Ethylhexylamine
1-Amino-2-fluorobenzene	= 2-Fluoroaniline
2-Amino-2-methyl-1-propanol (90% or less)	= 2-Amino-2-methyl-1-propanol (90% or less)

SYNONYM	COMPOUND NAMES
1-Amino-2-methylpropane	= Isobutylamine
2-Amino-2-methylpropane	= tert-Butylamine
1-Amino-2-nitrobenzene	= 2-Nitroaniline
1-Amino-2-propanol	= Monoisopropanolamine
1-Amino-4-chlorobenzene	= p-chloroaniline
1-Amino-4-fluorobenzene	= 4-Fluoroaniline
1-Amino-4-nitrobenzene	= 4-Nitroaniline
2-Amino-5-chlorotoluene	= 4-Chloro-o-toluidine
Aminobenzene	= Aniline
1-Aminobutane	= n-Butylamine
Aminocaproic lactam	= Caprolactam
Aminocyclohexane	= Cyclohexylamine
Aminodimethylbenzene	= 2,6-Dimethylaniline
2-Aminodimethylethanol	= 2-Amino-2-methyl-1-propanol (90% or less)
Aminoethane	= Ethylamine
2-Aminoethanol	= Monoethanolamine
beta-Aminoethyl alcohol	= Monoethanolamine
N-Aminoethyl piperazine	= N-Aminoethyl piperazine
Bis-(2-Aminoethyl) amine	= Diethylenetriamine
2-[(2-Aminoethyl) amino] ethanol	= Aminoethylethanolamine
N-(2-Aminoethyl) ethanolamine	= Aminoethylethanolamine
N-(2-Aminoethyl) piperazine	= N-Aminoethyl piperazine
1-(2-Aminoethyl) piperazine	= N-Aminoethyl piperazine
N,N'-bis-(2-Aminoethyl)ethylenediamine	= Triethylenetetramine
Aminoethylethanolamine	= Aminoethylethanolamine
Aminoform	= Hexamethylenetetramine
2-Aminoisobutane	= tert-Butylamine
beta-Aminoisobutanol	= 2-Amino-2-methyl-1-propanol (90% or less)
Aminomercuric chloride	= Mercuric ammonium chloride
Aminomethane	= Methylamine
Aminomethane	= Methylamine solution
3-Aminomethyl-3,5,5-trimethylcyclohexylamine	= Isophorone diamine
1-Aminonaphthalene	= 1-Naphthylamine
2-Aminopropane	= Isopropylamine
1-Aminopropane	= n-Propylamine
4-Aminopyridine	= 4-Aminopyridine
p-Aminopyridine	= 4-Aminopyridine
alpha-Aminotoluene	= Benzylamine
3-Aminotoluene	= m-Toluidine
2-Aminotoluene	= o-Toluidine
4-Aminotoluene	= p-Toluidine
Ammate	= Ammonium sulfamate
Ammoneric	= Ammonium chloride
Ammonia soap	= Ammonium oleate
Ammonia solution	= Ammonium hydroxide (<28% aqueous ammonia)
Ammonia water	= Ammonium hydroxide (<28% aqueous ammonia)
Ammonia, anhydrous	= Ammonia, anhydrous
Ammoniated mercury	= Mercuric ammonium chloride
Ammonioformaldehyde	= Hexamethylenetetramine

SYNONYM	COMPOUND NAMES
Ammonium acetate	= Ammonium acetate
Ammonium acid fluoride	= Ammonium bifluoride
Ammonium amidosulfonate	= Ammonium sulfamate
Ammonium amidosulphate	= Ammonium sulfamate
Ammonium aminoformate	= Ammonium carbamate
Ammonium benzoate	= Ammonium benzoate
Ammonium bicarbonate	= Ammonium bicarbonate
Ammonium bichromate	= Ammonium dichromate
Ammonium bifluoride	= Ammonium bifluoride
Ammonium bisulfite	= Ammonium bisulfite
Ammonium borofluoride	= Ammonium fluoborate
Ammonium bromide	= Ammonium bromide
Ammonium carbamate	= Ammonium carbamate
Ammonium carbazotate	= Ammonium picrate, wet
Ammonium carbonate	= Ammonium carbonate
Ammonium chloride	= Ammonium chloride
Ammonium chromate	= Ammonium chromate
Ammonium citrate, dibasic	= Ammonium citrate, dibasic
Ammonium citrate, dibasic	= Ammonium citrate, dibasic
Ammonium citrate	= Ammonium citrate, dibasic
Ammonium cupric sulfate	= Copper sulfate, ammoniated
Ammonium decaborate octahydrate	= Ammonium pentaborate
Ammonium dichromate	= Ammonium dichromate
Ammonium disulfatonickelate (II)	= Nickel ammonium sulfate
Ammonium ferric citrate	= Ferric ammonium citrate
Ammonium ferric oxalate trihydrate	= Ferric ammonium oxalate
Ammonium ferrous sulfate	= Ferrous ammonium sulfate
Ammonium fluoborate	= Ammonium fluoborate
Ammonium fluoride	= Ammonium fluoride
Ammonium fluorosilicate	= Ammonium silicofluoride
Ammonium formate	= Ammonium formate
Ammonium gluconate	= Ammonium gluconate
Ammonium hydrogen carbonate	= Ammonium bicarbonate
Ammonium hydrogen difluoride	= Ammonium bifluoride
Ammonium hydrogen fluoride	= Ammonium bifluoride
Ammonium hydrogen sulfide solution	= Ammonium sulfide
Ammonium hydrogen sulfite	= Ammonium bisulfite
Ammonium hydrosulfite	= Ammonium bisulfite
Ammonium hydroxide (<28% aqueous ammonia)	= Ammonium hydroxide (<28% aqueous ammonia)
Ammonium hypo solution	= Ammonium thiosulfate solution (60% or less)
Ammonium hypophosphite	= Ammonium hypophosphite
Ammonium hyposulfite solution	= Ammonium thiosulfate solution (60% or less)
Ammonium hyposulfite	= Ammonium thiosulfate
Ammonium iodide	= Ammonium iodide
Ammonium lactate syrup	= Ammonium lactate
Ammonium lactate	= Ammonium lactate
Ammonium lauryl sulfate	= Ammonium lauryl sulfate
Ammonium molybdate	= Ammonium molybdate
Ammonium monosulfite	= Ammonium bisulfite
Ammonium muriate	= Ammonium chloride
Ammonium nickel sulfate	= Nickel ammonium sulfate

SYNONYM	COMPOUND NAMES
Ammonium nitrate-phosphate mixture	= Ammonium nitrate-phosphate mixture
Ammonium nitrate-sulfate mixture	= Ammonium nitrate-sulfate mixture
Ammonium nitrate-urea solution	= Ammonium nitrate-urea solution
Ammonium nitrate	= Ammonium nitrate
Ammonium oleate	= Ammonium oleate
Ammonium oxalate hydrate	= Ammonium oxalate
Ammonium oxalate	= Ammonium oxalate
Ammonium pentaborate tetrahydrate	= Ammonium pentaborate
Ammonium pentaborate	= Ammonium pentaborate
Ammonium pentachlorozincate	= Zinc ammonium chloride
Ammonium perchlorate	= Ammonium perchlorate
Ammonium peroxydisulfate	= Ammonium persulfate
Ammonium persulfate	= Ammonium persulfate
Ammonium phosphate, dibasic	= Ammonium phosphate
Ammonium phosphate	= Ammonium phosphate
Ammonium picrate (yellow)	= Ammonium picrate, wet
Ammonium picrate, wet	= Ammonium picrate, wet
Ammonium picronitrate	= Ammonium picrate, wet
Ammonium rhodanate	= Ammonium thiocyanate
Ammonium rhodanide	= Ammonium thiocyanate
Ammonium silicofluoride	= Ammonium silicofluoride
Ammonium stearate dispersion	= Ammonium stearate
Ammonium stearate	= Ammonium stearate
Ammonium sulfamate	= Ammonium sulfamate
Ammonium sulfate	= Ammonium sulfate
Ammonium sulfhydrate solution	= Ammonium sulfide
Ammonium sulfide solution	= Ammonium sulfide
Ammonium sulfide	= Ammonium sulfide
Ammonium sulfite	= Ammonium sulfite
Ammonium sulfocyanate	= Ammonium thiocyanate
Ammonium sulfocyanide	= Ammonium thiocyanate
Ammonium tartrate	= Ammonium tartrate
Ammonium tetrafluoborate	= Ammonium fluoborate
Ammonium thiocyanate	= Ammonium thiocyanate
Ammonium thiosulfate solution (60% or less)	= Ammonium thiosulfate solution (60% or less)
Ammonium thiosulfate	= Ammonium thiosulfate
Ammonium trioxalatoferrate(III) trihydrate	= Ferric ammonium oxalate
Ammonium zinc chloride	= Zinc ammonium chloride
Amorphous phosphorus	= Phosphorus, red
AMP-95	= 2-Amino-2-methyl-1-propanol (90% or less)
AMP	= 2-Amino-2-methyl-1-propanol (90% or less)
AMS	= Ammonium sulfamate
Amyl acetate (all isomers)	= Amyl acetate (all isomers)
Amyl acetate, mixed isomers	= Amyl acetate (all isomers)
sec-Amyl acetate	= sec-Amyl acetate
tert-Amyl acetate	= tert-Amyl acetate

Diethylzinc	= Diethylzinc
Dieyanomethane	= Propanedinitrile
1,1-Difluoroethane	= 1,1-Difluoroethane
Difluorophosphoric acid	= Difluorophosphoric acid
Difluorophosphorus acid	= Difluorophosphoric acid
Diformyl	= Glyoxal

SYNONYM	COMPOUND NAMES
Diglycidyl ether of Bisphenol A	= Bisphenol A diglycidyl ether
Diglycol monobutyl ether acetate	= Diethylene glycol monobutyl ether acetate
Diglycol monobutyl ether	= Diethylene glycol monobutyl ether
Diglycol	= Diethylene glycol
Diglyme	= Diethylene glycol dimethyl ether
Diheptyl phthalate	= Diheptyl phthalate
1,2-Dihydro-3,6-pyridazinedione	= Maleic hydrazide
2,5-Dihydroperoxy-2,5-dimethylhexane	= Dimethylhexane dihydroperoxide
1,4-Dihydroxy-2-butene	= 1,4-Butenediol
1,4-Dihydroxy-2-butyne	= 1,4-Butynediol
2,2-Dihydroxy-3,3,5,5,6,6-hexachlorodiphenylmethane	= Hexachlorophene
1,2-Dihydroxybenzene	= Catechol
p-Dihydroxybenzene	= Hydroquinone
1,3-Dihydroxybenzene	= Resorcinol
m-Dihydroxybenzene	= Resorcinol
Dihydroxybenzol	= Resorcinol
1,4-Dihydroxybutane	= 1,4-Butanediol
Dihydroxybutane	= Butylene glycol
2,2'-Dihydroxydiethyl amine	= Diethanolamine
p,p'-Dihydroxydiphenyldimethylmethane	= Bisphenol A
2,2'-Dihydroxydipropylamine	= Diisopropanolamine
1,2-Dihydroxyethane	= Ethylene glycol
1,2-Dihydroxypropane	= Propylene glycol
Diisobutyl ketone	= Diisobutyl ketone
Diisobutyl phthalate	= Diisobutyl phthalate
Diisobutylamine	= Diisobutylamine
Diisobutylcarbinol	= Diisobutylcarbinol
Diisobutylene	= Diisobutylene
Diisodecyl phthalate	= Diisodecyl phthalate
Diisononyl adipate	= Diisononyl adipate
Diisononyl phthalate	= Diisononyl phthalate
Diisooctyl phthalate	= Diisooctyl phthalate
Diisopropanolamine	= Diisopropanolamine
Diisopropyl ether	= Isopropyl ether
Diisopropyl naphthalene	= Diisopropyl naphthalene
2,6-Diisopropyl naphthalene	= Diisopropyl naphthalene
Diisopropyl oxide	= Isopropyl ether
Diisopropyl percarbonate	= Isopropyl percarbonate
Diisopropyl peroxydicarbonate	= Isopropyl percarbonate
5-Diisopropylacetone	= Diisobutyl ketone
Diisopropylamine	= Diisopropylamine
Diisopropylbenzene (all isomers)	= Diisopropylbenzene (all isomers)
Diisopropylbenzene hydroperoxide	= Diisopropylbenzene hydroperoxide
Dilauroyl peroxide	= Lauroyl peroxide
Dilithium chromate	= Lithium chromate
Dilute sulfuric acid	= Sulfuric acid, spent
Dimazine	= 1,1-Dimethylhydrazine
1,2-Dimethoxyethane	= Ethylene glycol dimethyl ether
Dimethoxymethane	= Methyl formal
10,11-Dimethoxystrychnine	= Brucine
Dimethyl-1-hexanols	= Isooctyl alcohol
3,3-Dimethyl-2-methylene norcamphane	= Camphene

SYNONYM	COMPOUND NAMES
2,2-Dimethyl-3-methylene norborane	= Camphene
2,6-Dimethyl-4-heptane	= Diisobutyl ketone
2,6-Dimethyl-4-heptanol	= Diisobutylcarbinol
N,N-Dimethyl-n-(2-hydroxyethyl) amine	= Dimethylethanolamine
alpha, alpha-Dimethyl-propionic acid	= Trimethylacetic acid
N,N-Dimethyl acetamide solution (40% or less)	= N,N-Dimethyl acetamide solution (40% or less)
Dimethyl acetone	= Diethyl ketone
Dimethyl adipate	= Dimethyl adipate
N,N-Dimethyl benzene methanamine	= Benzyl dimethylamine
N,N-Dimethyl benzylamine	= Benzyl dimethylamine
Dimethyl carbamic chloride	= N,N-Dimethylcarbamoyl chloride
Dimethyl cellosolve	= Ethylene glycol dimethyl ether
Dimethyl ether	= Dimethyl ether
Dimethyl formal	= Methyl formal
Dimethyl glutarate	= Dimethyl glutarate
Dimethyl hexanedioate	= Dimethyl adipate
Dimethyl hydrogen phosphite	= Dimethyl hydrogen phosphite
Dimethyl ketone	= Acetone
O,O-Dimethyl o-p-nitrophenyl thiophosphate	= Methyl parathion
2,2-Dimethyl octanoic acid	= Neodecanoic acid
Dimethyl phosphite	= Dimethyl hydrogen phosphite
Dimethyl phthalate	= Dimethyl phthalate
O,O-Dimethyl s-[(4-oxo-1,2,3-benzotriazine-3-(4h)-yl)methyl]phosphorodithioate	= Azinphos methyl
Dimethyl silicone fluids	= Dimethylpolysiloxane
Dimethyl silicone oil	= Dimethylpolysiloxane
Dimethyl succinate	= Dimethyl succinate
Dimethyl sulfate	= Dimethyl sulfate
Dimethyl sulfide	= Dimethyl sulfide
Dimethyl sulfoxide	= Dimethyl sulfoxide
Dimethyl terephthalate	= Dimethyl terephthalate
N,N-(Dimethyl) a-tolueneamine	= Benzyl dimethylamine
N,N-Dimethylacetamide	= Dimethylacetamide
Dimethylacetamide	= Dimethylacetamide
Dimethylacetamide	= N,N-Dimethyl acetamide solution (40% or less)
Dimethylacetic acid	= Isobutyric acid
Dimethylacetylenecarbinol	= 2-Methyl-2-hydroxy-3-butyne
Dimethylamine	= Dimethylamine
2-(Dimethylamino)ethanol	= Dimethylethanolamine
a-(Dimethylamino)toluene	= Benzyl dimethylamine
B-Dimethylaminoethyl alcohol	= Dimethylethanolamine
2,6-Dimethylaniline	= 2,6-Dimethylaniline
Dimethylarsinic acid	= Cacodylic acid
alpha, alpha-Dimethylbenzene hydroperoxide	= Cumene hydroperoxide
1,3-Dimethylbenzene	= m-Xylene
1,2-Dimethylbenzene	= o-Xylene
1,4-Dimethylbenzene	= p-Xylene
Dimethylbenzyl hydroperoxide	= Cumene hydroperoxide
2,2-Dimethylbutane	= Neohexane

SYNONYM	COMPOUND NAMES
2,2-Dimethylcaprylic acid	= 2,2-Dimethyloctanoic acid
N,N-Dimethylcarbamoyl chloride	= N,N-Dimethylcarbamoyl chloride
Dimethylcarbamylochloride	= N,N-Dimethylcarbamoyl chloride
Dimethylcarbinol	= Isopropyl alcohol
N,N-Dimethylchloroformamide	= N,N-Dimethylcarbamoyl chloride
n-Dimethylcyclohexanamine	= N,N-Dimethylcyclohexylamine
N,N-Dimethylcyclohexylamine	= N,N-Dimethylcyclohexylamine
Dimethyldichlorosilane	= Dimethyldichlorosilane
Dimethylethanolamine	= Dimethylethanolamine
1,1-Dimethylethylamine	= tert-Butylamine
Dimethylethynylcarbinol	= 2-Methyl-2-hydroxy-3-butyne
N,N-Dimethylformamide	= Dimethylformamide
Dimethylformamide	= Dimethylformamide
Dimethylhexanals	= Isooctaldehyde
2,5-Dimethylhexane-2,5-dihydroperoxide	= Dimethylhexane dihydroperoxide
Dimethylhexane dihydroperoxide	= Dimethylhexane dihydroperoxide
1,1-Dimethylhydrazine	= 1,1-Dimethylhydrazine
unsym-Dimethylhydrazine	= 1,1-Dimethylhydrazine
sym-Dimethylhydrazine	= 1,2-Dimethylhydrazine
1,2-Dimethylhydrazine	= 1,2-Dimethylhydrazine
Dimethylmethane	= Propane
2,2-Dimethyloctanoic acid	= 2,2-Dimethyloctanoic acid
Dimethylol propane	= 2,2-Dimethylpropane-1,3-diol
Dimethylphenol phosphate (3:1)	= Trixylenyl phosphate
Dimethylphenol	= Xylenol
Dimethylphosphonate	= Dimethyl hydrogen phosphite
Dimethylpolysiloxane	= Dimethylpolysiloxane
2,2-Dimethylpropane-1,3-diol	= 2,2-Dimethylpropane-1,3-diol
1,1-Dimethylpropargyl alcohol	= 2-Methyl-2-hydroxy-3-butyne
Bis(Dimethylthiocarbamyl)disulfide	= Thiram
Dimethyltrimethylene glycol	= 2,2-Dimethylpropane-1,3-diol
Dimethylzinc	= Dimethylzinc
2,4-Dinitraniline	= 2,4-Dinitroaniline
2,4-Dinitro-6-cyclohexylphenol	= 4,6-Dinitro-o-cyclohexyl phenol
2,6-Dinitro-n,n-dipropyl-4-trifluoromethylaniline	= Trifluralin

9. INDEX OF CODES

AAC	Acetic acid	AMH	Ammonium hydroxide (<28% aqueous ammonia)
AAD	Acetaldehyde	AMK	n-Amyl methyl ketone
AAM	Acrylamide solution	AMM	n-Amyl mercaptan
AAN	n-Amyl alcohol	AMN	Ammonium nitrate
AAS	sec-Amyl acetate	AMP	Ammonium perchlorate
AAT	Ammonium acetate	AMR	Ammonium stearate
ABC	Ammonium bicarbonate	AMS	Ammonium sulfate
ABF	Ammonium bifluoride	AMT	Ammonium thiocyanate
ABM	Acetyl bromide	AMY	n-Amyl chloride
ABN	Alkyl (C ₁₁ – C ₁₇) benzenesulfonic acid	ANB	Ammonium bromide
ABR	Allyl bromide	ANI	iso-Amyl nitrite
ABZ	Ammonium benzoate	ANL	Aniline
ACA	Acetic anhydride	ANP	Ammonium nitrate-phosphate mixture
ACB	Ammonium carbonate	ANS	Ammonium nitrate-sulfate mixture
ACC	Acetyl chloride	ANT	n-Amyl nitrate
ACD	Acridine	ANU	Ammonium nitrate-urea solution
ACE	Acetylene	AOL	Ammonium oleate
ACF	Allyl chloroformate	AOX	Ammonium oxalate
ACH	Ammonium chromate	APB	Ammonium pentaborate
ACI	Ammonium citrate, dibasic	APC	Antimony pentachloride
ACL	Aluminum chloride	APE	Ammonium persulfate
ACM	Ammonium carbamate	APF	Antimony pentafluoride
ACN	Acrylonitrile	APH	Aluminum phosphide
ACO	Aluminum chloride solution	API	Ammonium picrate, wet
ACP	Acetophenone	APO	Arsenic pentaoxide
ACR	Acrylic acid	APP	Ammonium phosphate
ACT	Acetone	APR	2-Amino-2-methyl-1-propanol (90% or less)
ACY	Acetone cyanohydrin	APS	Acetyl peroxide solution
ADA	Adipic acid	APT	Antimony potassium tartrate
ADN	Adiponitrile	APY	4-Aminopyridine
AEC	Amyl acetate (all isomers)	ARD	Arsenic disulfide
AEE	Aminoethylethanolamine	ARF	Asphalt blending stocks: roofers flux
AEL	Acetal	ARL	Acrolein
AEP	N-Aminoethyl piperazine	ART	Arsenic trisulfide
AFB	Ammonium fluoborate	ARX	Arsenic
AFM	Ammonium formate	ASA	Arsenic acid
AFR	Ammonium fluoride	ASC	Anisoyl chloride
AGC	Ammonium gluconate	ASF	Ammonium sulfide
AHP	Ammonium hypophosphite	ASL	Ammonium silicofluoride
AID	Ammonium iodide	ASM	Ammonium sulfamate
ALA	Allyl alcohol	ASP	Asphalt
ALC	Allyl chloride	ASR	Asphalt blending stocks: straight run residue
ALD	Aldrin	AST	Arsenic trichloride
ALF	Aluminum fluoride	ASU	Ammonium bisulfite
ALM	Aluminum sulfate	ASX	Aluminum sulfate solution
ALN	Aluminum nitrate	ATA	Acetylacetone
ALS	Ammonium lauryl sulfate	ATB	Antimony tribromide
ALT	Ammonium lactate	ATC	Allyltrichlorosilane
AMA	Ammonia, anhydrous	ATF	Ammonium thiosulfate
AMB	Ammonium molybdate	ATH	Anthracene
AMC	Ammonium chloride		
AMD	Ammonium dichromate		
AMF	Ammonium sulfite		

ATL	Amyl phthalate	BNZ	Benzene
ATM	Antimony trichloride	BOC	Bismuth oxychloride
ATN	Acetonitrile	BPA	Bisphenol A
ATO	Arsenic trioxide	BPC	Barium perchlorate
ATR	Ammonium tartrate	BPD	Benzene phosphorus dichloride
ATS	n-Amyltrichlorosilane	BPE	2-Bromopentane
ATT	Antimony trifluoride	BPF	Bromine pentafluoride
ATV	Ammonium thiosulfate solution (60% or less)	BPH	Butyl benzyl phthalate
ATX	Antimony trioxide	BPM	Barium permanganate
ATZ	Atrazine	BPB	n-Butyl propionate
AYA	tert-Amyl acetate	BPO	Barium peroxide
AZM	Azinphos methyl	BPR	1-Bromopropane
BAB	Bromoacetyl bromide	BPT	Benzene phosphorus thiodichloride
BAC	Boric acid	BRA	n-Butyric acid
BAD	iso-Butyraldehyde	BRC	Barium carbonate
BAI	iso-Butyl acrylate	BRE	Bromoacetone
BAL	Benzyl alcohol	BRO	Bromoform
BAM	n-Butylamine	BRT	Boron trichloride
BAN	n-Butyl alcohol	BRU	Brucine
BAS	sec-Butyl alcohol	BRX	Bromine
BAT	tert-Butyl alcohol	BSC	Benzenesulfonyl chloride
BBR	Benzyl bromide	BTA	sec-Butyl acetate
BBT	2-Bromobutane	BTB	Boron tribromide
BBU	1-Bromobutane	BTC	n-butyl acrylate
BBZ	Bromobenzene	BTD	1,4-Butynediol
BCF	Benzyl chloroformate	BTF	Bromine trifluoride
BCL	Benzyl chloride	BTL	sec-Butylamine
BCN	n-Butyl acetate	BTM	n-Butyl mercaptan
BCP	Boiler compound, liquid	BTN	Butylene
BCR	Barium chlorate	BTO	1,2-Butylene oxide
BCS	Butyltrichlorosilane	BTP	p-tert-Butylphenol
BCY	Barium cyanide	BTR	n-Butyraldehyde
BDE	Bisphenol a diglycidyl ether	BUA	tert-Butylamine
BDI	Butadiene	BUB	Butyl butyrate
BDM	Benzyl dimethylamine	BUC	Butyryl chloride
BDO	1,4-Butanediol	BUD	1,4-Butenediol
BEC	Beryllium chloride	BUE	Butyl toluene
BEF	Beryllium fluoride	BUF	n-Valeraldehyde
BEM	Beryllium	BUG	Butylene glycol
BEN	Beryllium nitrate	BUT	Butane
BEO	Beryllium oxide	BYA	tert-Butyl acetate
BES	Beryllium sulfate	BYC	Butyl chloride
BFN	n-Butyl formate	BZA	Benzoic acid
BFO	n-Butyl chloroformate	BZC	Benzoyl chloride
BGE	n-Butyl glycidyl ether	BZD	Benzaldehyde
BHC	gamma Benzene hexachloride	BZE	Benzyl acetate
BHP	tert-Butyl hydroperoxide	BZI	Benzidine
BIB	Isobutyl isobutyrate	BZL	Benzal chloride
BLE	Butyl lactate	BZM	Benzylamine
BMA	Benzyltrimethylammonium chloride	BZN	Benzonitrile
BMI	Isobutyl methacrylate	BZO	Benzyltrimethyloctadecylammonium chloride
BMN	n-butyl methacrylate	BZP	Benzophenone
BNI	Butyronitrile	BZQ	p-Benzoquinone
BNP	2-Butanone peroxide	BZT	Benzenethiol
BNT	Barium nitrate	CAA	Copper acetoarsenite

CAC	Chloroacetyl chloride	CLP	3-Chloropropionic acid
CAF	Calcium fluoride	CLS	Caprolactam
CAH	Calcium hydroxide	CLT	Copper lactate
CAL	Calcium phosphate	CLX	Chlorine
CAM	Calcium	CMA	Chromic anhydride
CAO	Calcium oxide	CMB	Cadmium bromide
CAP	p-Chloroaniline	CMC	Chromyl chloride
CAR	Carene	CME	Chloromethyl methyl ether
CAS	Calcium arsenite	CMH	Cumene hydroperoxide
CAT	Cadmium acetate	CMN	Cadmium nitrate
CBA	Cobalt acetate	CMO	Carbon monoxide
CBB	Carbon disulfide	CMP	p-Cymene
CBC	Cobalt chloride	CMS	Cadmium sulfate
CBD	Copper bromide (ous)	CNE	1-Chloro-1-nitropropane
CBF	Carbofuran	CNI	Copper nitrate
CBN	4-Chlorobutyronitrile	CNN	Copper naphthenate
CBO	Carbolic oil (mixture)	CNO	o-Chloronitrobenzene
CBR	Cyanogen bromide	CNT	Calcium nitrate
CBS	Cobalt sulfate	COB	Cobalt bromide (ous)
CBT	Carbon tetrachloride	COF	Cobalt fluoride
CBY	Carbaryl	COL	Copper oxalate
CCA	Calcium arsenate	COP	Copper acetate
CCB	Calcium carbide	COS	Cobalt sulfamate
CCC	Calcium chlorate	COU	Coumaphos
CCH	Cyclohexanone	COX	Cadmium oxide
CCL	Cyanogen chloride	CPA	Copper arsenite
CCN	Calcium cyanide	CPB	Copper bromide
CCO	Cobalt nitrate	CPC	Copper chloride
CCP	Calcium peroxide	CPE	Cyclopentene
CCR	Calcium chromate	CPF	Copper fluoroborate
CCT	Creosote, coal tar	CPG	Copper glycinate
CCY	Copper cyanide (ous)	CPH	Camphene
CDA	Cacodylic acid	CPL	Chloropicrin
CDC	Cadmium chloride	CPN	p-Chlorophenol
CDN	Chlordane	CPO	Camphor oil
CDO	Carbon dioxide	CPP	Calcium phosphide
CES	Cupriethylenediamine solution	CPR	Cyclopropane
CFB	Cadmium fluoroborate	CPS	Caustic potash solution
CFM	Cobalt formate	CPT	Captan
CGE	Cresyl glycidyl ether	CRA	Chloroacetophenone
CHA	Cyclohexylamine	CRB	Chlorobenzene
CHC	Charcoal	CRC	Chromous chloride
CHD	Chlorohydrins	CRE	Calcium resinate
CHM	Chloroacetic acid (80% or less)	CRF	Chloroform
CHN	Cyclohexanol	CRH	o-Chlorophenol
CHO	Chloroacetaldehyde	CRL	m-Cresol
CHP	Cyclohexanone peroxide	CRN	p-Chlorotoluene
CHS	Chromic sulfate	CRO	o-Cresol
CHT	Cyclohexenyltrichlorosilane	CRP	Chloroprene
CHX	Cyclohexane	CRS	Cresols
CHY	Calcium hypochlorite	CRT	Chromic acetate
CID	Copper iodide	CSA	Chlorosulfonic acid
CIT	Citric acid	CSC	Cresylate spent caustic solution
CLA	2-Chloropropionic acid	CSF	Copper sulfate
CLC	Calcium chloride	CSN	Copper sulfate, ammoniated
CLD	Collodion	CSO	p-Cresol

CSS	Caustic soda solution	DCM	Dichloromethane
CST	Copper subacetate	DCO	Decanoic acid
CSY	Corn syrup	DCP	2,4-Dichlorophenol
CTA	Crotonaldehyde	DCR	N,N-Dimethylcarbamoyl chloride
CTC	Catechol	DCS	Dodecylbenzenesulfonic acid, calcium salt
CTD	4-Chloro-o-toluidine	DCT	1,1-Dichloro-1-nitroethane
CTF	Chlorine trifluoride	DCV	Dichlorvos
CTM	m-Chlorotoluene	DCY	4,6-Dinitro-o-cyclohexyl phenol
CTO	o-Chlorotoluene	DDB	Dodecylbenzene
CTP	Coal tar pitch	DDC	1-Dodecene
CTT	Copper tartrate	DDD	DDD
CUF	Copper formate	DDI	2,2-Dimethylpropane-1,3-diol
CUM	Cumene	DDM	Dodecylmethacrylate
CWD	Creosote (wood)	DDN	Dodecanol
CXY	Carbon oxyfluoride	DDP	Dodecyl/pentadecyl methacrylate
CYA	Cyanoacetic acid	DDS	Dodecyl sulfate, sodium salt
CYC	Cyclohexyl acetate	DDT	DDT
CYE	Cycloheptane	DDW	Dimethylhexane dihydroperoxide
CYG	Cyanogen	DEA	Diethanolamine
CYP	Cyclopentane	DEB	Diethylbenzene
CYT	1,5,9-Cyclododecatriene	DEC	Diethyl carbonate
DAA	Diacetone alcohol	DED	Dieldrin
DAC	Dimethylacetamide	DEE	2,2-Dichloroethyl ether
DAE	N,N-Diethylethanolamine	DEG	Diethylene glycol
DAI	Dodecylbenzenesulfonic acid, isopropylamine salt	DEH	Di-(2-ethylhexyl) adipate
DAL	Decaldehyde	DEK	Diethyl ketone
DAM	Diphenylamine	DEL	1,2-Dichloroethylene
DAN	n-Decyl alcohol	DEM	Diethylene glycol monobutyl ether acetate
DAP	Di-n-amyl phthalate	DEN	Diethylamine
DAR	n-Decyl acrylate	DEP	Di-(2-ethylhexyl)phosphoric acid
DAS	Dodecyl benzene sulfonic acid, sodium salt	DER	Butyl, decyl, cetyl-eicosyl methacrylate
DBA	Di-n-butylamine	DES	2,4-D esters
DBC	Diisobutylcarbinol	DET	Diethylenetriamine
DBE	Di-n-butyl ether	DEZ	Diethylzinc
DBH	Dibromomethane	DFA	Difluorophosphoric acid
DBK	Di-n-butyl ketone	DFE	1,1-Difluoroethane
DBL	Diisobutylene	DFP	Distillates: flashed feed stocks
DBM	m-Dichlorobenzene	DFM	Dichloromonofluoromethane
DBN	Dibenzyl ether	DGA	Diethylene glycol ethyl ether acetate
DBO	o-Dichlorobenzene	DGD	Diethylene glycol dimethyl ether
DBP	p-Dichlorobenzene	DGE	Diethylene glycol monoethyl ether
DBR	Decaborane	DGL	Diethylene glycol phthalate
DBS	Dodecylbenzenesulfonic acid, triethanolamine salt	DGM	Diethylene glycol monomethyl ether
DBT	Dibutylphenol	DGR	Diethylene glycol methyl ether acetate
DBU	Diisobutylamine	DGT	Dimethyl glutarate
DBZ	n-Decylbenzene	DGY	Dipropylene glycol dibenzoate
DCA	2,4-Dichlorophenoxyacetic acid	DHA	Di-n-hexyl adipate
DCB	Dichlorobutene	DHE	Diethylene glycol n-hexyl ether
DCC	Decane	DHN	Decahydronaphthalene
DCE	1-Decene	DHP	Diheptyl phthalate
DCF	Dichlorodifluoromethane	DHX	1,6-Dichlorohexane
DCH	1,1-Dichloroethane	DIA	Diisopropylamine
DCI	2,2'-Dichloroisopropyl ether	DIB	Dichlobenil
DCL	Dichlone	DIC	Dicamba
		DID	Diisodecyl phthalate
		DIE	Di-(2-ethylhexyl)phthalate

DIF	Dinonyl phthalate	DPE	Diphenyl ether
DIG	Diethylene glycol dibutyl ether	DPF	2,3-Dichloropropene
DIH	Diisopropylbenzene hydroperoxide	DPG	Dipropylene glycol
DII	Diisopropyl naphthalene	DPH	Diethyl phthalate
DIK	Diisobutyl ketone	DPI	Dimethyl hydrogen phosphite
DIL	Diphenyl	DPM	Diphenylmethane diisocyanate
DIM	Dimethyl ether	DPN	Dipentene
DIN	Diisononyl phthalate	DPO	Dibenzoyl peroxide
DIO	Diisooctyl phthalate	DPP	1,2-Dichloropropane
DIP	Diisopropanolamine	DPT	Dicyclopentadiene
DIQ	Diquat	DPU	1,3-Dichloropropene
DIS	Disulfoton	DPY	Dipropylene glycol methyl ether
DIT	Diisobutyl phthalate	DSA	Dodecylbenzenesulfonic acid
DIU	Diuron	DSD	Dodecyl sulfate, diethanolamine salt
DIX	Diisopropylbenzene (all isomers)	DSE	Dimethyl succinate
DLA	Dimethyl adipate	DSF	Dimethyl sulfate
DLP	2,2-Dichloropropanoic acid	DSL	Dimethyl sulfide
DLS	N,N-Dimethyl acetamide solution (40% or less)	DSM	Dodecyl sulfate, magnesium salt
DMA	Dimethylamine	DSR	Distillates: straight run
DMB	Dimethylethanolamine	DSS	Diocetyl sodium sulfosuccinate
DMD	Dimethyldichlorosilane	DST	Dodecyl sulfate, triethanolamine salt
DME	Diethylene glycol monobutyl ether	DSU	Diethyl sulfate
DMF	Dimethylformamide	DSZ	Diammonium salt of zinc edta
DMH	1,1-Dimethylhydrazine	DTC	Dodecyltrichlorosilane
DML	1,2-Dimethylhydrazine	DTE	Dichlorotetrafluoroethane
DMM	2,6-Dimethylaniline	DTH	Dowtherm
DMN	2,6-Diethylaniline	DTL	Dimethyl phthalate
DMO	2,2-Dimethyloctanoic acid	DTM	4,4'-Dichloro-alpha-trichloromethyl benzhydrol
DMP	Dimethylpolysiloxane	DTN	Demeton
DMS	Dimethyl sulfoxide	DTP	Ditridecyl phthalate
DMT	Dimethyl terephthalate	DTS	Dextrose solution
DMX	Dichloropropene, dichloropropane mixture	DTT	2,4-Dinitrotoluene
DMZ	Dimethylzinc	DUP	Diundecyl phthalate
DNA	Di-n-propylamine	DUR	Dursban
DNB	m-Dinitrobenzene	DXN	N,n-Dimethylcyclohexylamine
DNC	Dinitrocresol	DZN	Diazinon
DNE	2,5-Dinitrophenol	DZP	Di-(p-chlorobenzoyl) peroxide
DNH	2,6-Dinitrophenol	EAA	Ethyl acetoacetate
DNL	2,6-Dinitrotoluene	EAC	Ethyl acrylate
DNO	o-Dinitrobenzene	EAD	Ethylaluminum dichloride
DNP	2,4-Dinitrophenol	EAI	2-Ethylhexyl acrylate
DNT	2,4-Dinitroaniline	EAK	Ethyl amyl ketone
DNU	3,4-Dinitrotoluene	EAL	Ethyl alcohol
DNY	Diisononyl adipate	EAM	Ethylamine
DNZ	p-Dinitrobenzene	EAS	Ethylaluminum sesquichloride
DOA	Diocetyl adipate	EBA	N-Ethyl-n-butylamine
DOD	Dodecene	EBK	Ethyl butyl ketone
DOL	Dodecyl phenol	EBR	Ethyl butyrate
DOP	Diocetyl phthalate	EBT	Ethyl butanol
DOS	Dodecyl diphenyl ether disulfonate solution	ECA	Ethyl chloroacetate
DOX	1,4-Dioxane	ECC	N-Ethylcyclohexylamine
DPA	Dibutyl phthalate	ECF	Ethyl chloroformate
DPB	1,1-Dichloropropane	ECH	Ethylene chlorohydrin
DPC	1,3-Dichloropropane	ECL	Ethyl chloride
DPD	Diphenyldichlorosilane	ECS	Ethyldichlorosilane

ECT	Ethyl chlorothioformate	ETC	Ethylene cyanohydrin
ECY	Ethyl cyclohexane	ETD	Ethoxylated tridecanol
EDA	Ethylenediamine	ETE	2-Ethyl toluene
EDB	Ethylene dibromide	ETG	Ethoxy triglycol
EDC	Ethylene dichloride	ETH	Ethane
EDR	Endrin	ETI	Ethyleneimine
EDT	Ethylenediamine tetracetic acid	ETL	Ethylene
EEA	2-Ethoxyethyl acetate	ETM	Ethyl methacrylate
EEE	Ethylene glycol diethyl ether	ETN	Ethyl nitrite
EEO	2-Ethoxyethanol	ETO	Ethion
EEP	Ethyl-3-ethoxypropionate	ETS	Ethyltrichlorosilane
EET	Ethyl ether	EVO	Epoxidized vegetable oils
EFM	Ethyl formate	FAC	Ferric ammonium citrate
EGA	Ethylene glycol monoethyl ether acetate	FAL	Furfuryl alcohol
EGB	Ethylene glycol dibutyl ether	FAM	Formamide
EGD	Ethylene glycol dimethyl ether	FAN	2-Fluoroaniline
EGE	Ethylene glycol monoethyl ether	FAO	Ferric ammonium oxalate
EGI	Ethylene glycol isopropyl ether	FAS	Ferrous ammonium sulfate
EGL	Ethylene glycol	FCL	Ferric chloride
EGM	Ethylene glycol monobutyl ether	FCP	Ferric glycerophosphate
EGO	Ethylene glycol acetate	FEC	Ferrous chloride
EGP	Ethylene glycol propyl ether	FFA	Furfural
EGT	Ethylene glycol methyl ether acetate	FFB	Ferrous fluoroborate
EGY	Ethylene glycol diacetate	FFX	Ferric fluoride
EHA	Ethylhexaldehyde	FLA	4-Fluoroaniline
EHC	2-Ethylhexyl acetate	FLB	Fluorobenzene
EHE	Ethyl hexyl phthalate	FLT	2-Fluorotoluene
EHM	2-Ethylhexylamine	FMA	Formic acid
EHO	2-Ethylhexanoic acid	FMS	Formaldehyde solution
EHP	Ethoxydihydropyran	FNT	Ferric nitrate
EHT	Ethyl hexyl tallate	FOX	Ferrous oxalate
EHX	2-Ethyl hexanol	FPS	Ferrophosphorus
ELT	Ethyl lactate	FRS	Ferrous sulfate
EMA	Ethylene glycol monobutyl ether acetate	FSA	Fluosulfonic acid
EMC	Ethyl mercaptan	FSF	Ferric sulfate
EME	Ethylene glycol monomethyl ether	FSL	Fluosilicic acid
EMN	n-Ethyl morpholine	FSN	Ferrosilicon
EMX	Ethylenediamine	FTO	3-Fluorotoluene
ENB	Ethylidene norbornene	FTU	4-Fluorotoluene
ENP	Ethoxylated nonylphenol	FUM	Fumaric acid
EOD	Ethoxylated dodecanol	FUR	Furan
EOP	Ethoxylated pentadecanol	FXX	Fluorine
EOT	Ethoxylated tetradecanol	GAC	Glyoxylic acid (50% or less)
EOX	Ethylene oxide	GAK	Gasoline blending stocks: alkylates
EPA	2-Ethyl-3-propylacrolein	GAT	Gasolines: automotive (<4.23g lead/gal)
EPC	Epichlorohydrin	GAV	Gasolines: aviation (< 4.86g lead/gal)
EPD	Ethyl phosphonothioic dichloride	GCM	Glycidyl methacrylate
EPE	Ethylene glycol phenyl ether	GCR	Glycerine
EPL	Ethylphenol	GCS	Gasolines: casinghead
EPP	Ethyl phosphorodichloridate	GLA	Gallic acid
EPR	Ethyl propionate	GOC	Gas oil: cracked
EPS	Ethylphenyldichlorosilane	GOS	Glyoxal
ESC	Ethyl silicate	GPL	Gasolines: polymer
ESF	Endosulfan	GRF	Gasoline blending stocks: reformates
ETA	Ethyl acetate	GSR	Gasolines: straight run
ETB	Ethylbenzene	GTA	Glutaraldehyde solution

HAC	Hexadecyltrimethylammonium chloride	IOC	Isooctaldehyde
HAE	Hexyl acetate	IPA	Isopropyl alcohol
HAI	2-Hydroxyethyl acrylate	IPC	Isopropyl percarbonate
HAL	n-Hexaldehyde	IPD	Isophorone diisocyanate
HAS	Hydroxylamine sulfate	IPE	Isopropyl ether
HBA	2-Hydroxy-4-(methylthio)-butanoic acid	IPH	Isophorone
HBR	Hydrogen bromide	IPI	Isophorone diamine
HCB	Hexachlorobutadiene	IPL	Isophthalic acid
HCC	Hexachlorocyclopentadiene	IPM	Isopropyl mercaptan
HCE	Hexachloroethane	IPP	Isopropylamine
HCL	Hydrochloric acid	IPR	Isoprene
HCN	Hydrogen cyanide	IPT	Isopentane
HCP	Hexachlorophene	IPX	Isopropyl cyclohexane
HCZ	Hexachlorobenzene	ISA	Isodecyl alcohol
HDA	Hydroxylamine	ISP	o-Isopropyl phenol
HDC	Hydrogen chloride	IVA	Isovaleraldehyde
HDQ	Hydroquinone	JPF	Jet fuels: JP-4
HDS	Hydrogen sulfide	JPO	Jet fuels: JP-1
HDZ	Hydrazine	JPT	Jet fuels: JP-3
HEP	Heptanoic acid	JPV	Jet fuels: JP-5
HFA	Hydrofluoric acid	KPE	Kepone
HFS	Hydrofluorosilicic acid (25% or less)	KRS	Kerosene
HFX	Hydrogen fluoride	LAC	Lead acetate
HMD	Hexamethylenediamine	LAH	Lithium aluminum hydride
HMI	Hexamethylenimine	LAL	Linear alcohols
HMT	Hexamethylenetetramine	LAR	Lead arsenate
HPA	Hydroxypropyl acrylate	LBC	Lithium bichromate
HPE	Heptyl acetate	LCL	Lead chloride
HPM	Hydroxypropyl methacrylate	LCR	Lithium chromate
HPO	Hydrogen peroxide	LFB	Lead fluoroborate
HPT	Heptane	LFR	Lead fluoride
HSS	Hexadecyl sulfate, sodium salt	LHD	Lithium hydride
HTC	Heptachlor	LID	Lead iodide
HTE	1-Heptene	LLS	Latex, liquid synthetic
HTN	Heptanol	LNG	Liquefied natural gas
HXA	n-Hexane	LNI	Lactonitrile solution (80% or less)
HXE	1-Hexene	LNT	Lead nitrate
HXG	Hexylene glycol	LPG	Liquefied petroleum gas
HXN	1-Hexanol	LPO	Lauroyl peroxide
HXO	Hexanoic acid	LRA	Lauric acid
HXX	Hydrogen	LRM	Lauryl mercaptan
IAA	Isoamyl alcohol	LSA	Lead stearate
IAC	Isopropyl acetate	LSF	Lead sulfate
IAI	Isodecyl acrylate	LSU	Lead sulfide
IAL	Isobutyl alcohol	LTA	Lactic acid
IAM	Isobutylamine	LTC	Lead thiocyanate
IAT	Isoamylacetate	LTH	Litharge
IBA	Isobutyl acetate	LTM	Lithium
IBL	Isobutylene	LTS	Lead thiosulfate
IBN	Isobutyronitrile	LTT	Lead tetraacetate
IBR	Isobutyric acid	LTU	Lead tungstate
IBT	Isobutane	MAA	Methyl amyl alcohol
IDA	Isodecaldehyde	MAC	Methyl amyl acetate
IGE	Isopropyl glycidyl ether	MAD	Methacrylic acid
IHA	Isohexane	MAE	Methyl acetoacetate
IOA	Isooctyl alcohol	MAK	Methylamyl ketone

MAL	Methyl alcohol	MLI	Maleic acid
MAM	Methyl acrylate	MLL	Methyl allyl alcohol
MAN	N-methylaniline	MLP	3-Methylpyridine
MAP	Methyl acetylene, propadiene mixture	MLT	Malathion
MAT	Mercuric acetate	MMC	Methyl mercaptan
MBA	a-Methylbenzyl alcohol	MME	Monomethyl ethanolamine
MBE	Methyl tert-butyl ether	MMM	Methyl methacrylate
MBK	Methyl n-butyl ketone	MNA	1-Methylnaphthalene
MBL	Methyl butenol	MNS	Mineral spirits
MBO	3-Methyl-2-butanone	MNT	Mercuric nitrate
MBU	Methyl butyrate	MOA	3-Methoxybutyl acetate
MBY	Methyl butynol	MOC	Methoxychlor
MBZ	Methyl benzoate	MOX	Mercuric oxide
MCA	Chloroacetic acid	MPA	Monoisopropanolamine
MCC	Mercuric ammonium chloride	MPC	Magnesium perchlorate
MCD	Mercaptodimethur	MPD	Methyl phosphonothioic dichloride
MCF	Chlorodifluoromethane	MPE	2-Methyl-1-pentene
MCK	Methylcyclopentadiene dimer	MPF	4-Methylpyridine
MCL	Methallyl chloride	MPK	Methyl isopropenyl ketone
MCM	Monochlorotrifluoromethane	MPL	Morpholine
MCN	Mercuric cyanide	MPR	2-Methylpyridine
MCO	Metolachlor	MPT	Methyl parathion
MCP	Methyl cyclopentane	MPY	1-Methylpyrrolidone
MCR	Mercury	MRC	Mercuric chloride
MCS	Methyldichlorosilane	MRE	Myrcene
MCT	Methylcyclopentadienylmanganese tricarbonyl	MRN	Mercurous nitrate
MCX	o-Methylcyclohexanone	MRR	Mercurous chloride
MCY	Methylcyclohexane	MRS	Mercuric sulfate
MDC	Methyl dichloroacetate	MRT	Mercuric thiocyanate
MDE	Methyl diethanolamine	MRX	Mirex
MEA	Monoethanolamine	MSA	Methanearsonic acid, sodium salt
MED	Methyl chloroacetate	MSF	Mercuric sulfide
MEK	Methyl ethyl ketone	MSO	Mesityl oxide
MEN	2-Methyl-6-ethyl aniline	MSR	alpha-Methylstyrene
MEP	Methylethylpyridine	MSZ	Methylamine solution
MES	Methyl salicylate	MTA	Methylamine
MET	Methacrylonitrile	MTB	Methyl bromide
MFA	Lead alkyls	MTC	Methyl chloride
MFM	Methyl formate	MTE	Monochlorotetrafluoroethane
MGN	Magnesium nitrate	MTF	Methyl formal
MGX	Magnesium	MTH	Methane
MHB	2-Methyl-2-hydroxy-3-butyne	MTN	4-Methyl-1-pentene
MHC	Methyl chloroformate	MTO	Molybdic trioxide
MHK	Methyl heptyl ketone	MTS	Methyltrichlorosilane
MHX	2-Methylcyclohexanol	MTT	Methyl acetate
MHZ	Methylhydrazine	MVK	Methyl vinyl ketone
MIC	Methyl isobutyl carbinol	NAA	Nitrilotriacetic acid and salts
MID	Mercuric iodide	NAB	Nabam
MIK	Methyl isobutyl ketone	NAC	Nitric acid
MIO	Methyl iodide	NAE	Nonyl acetate
MIS	Methyl isocyanate	NAL	4-Nitroaniline
MIT	Methyl isothiocyanate	NAN	Nonane
MKE	Methyl propyl ketone	NAO	1-Naphthylamine
MLA	Maleic anhydride	NAS	Nickel ammonium sulfate
MLH	Maleic hydrazide	NBR	Nickel bromide
		NCL	Nickel chloride

NCN	Nickel cyanide	OET	Octyl epoxy tallate
NCS	Nicotine sulfate	OFR	Oils, fuel: 4
NCT	Naphtha: coal tar	OFS	Oils, edible: fish
NEA	Neodecanoic acid	OFV	Oils, fuel: 5
NFB	Nickel fluoroborate	OIL	Oils: crude
NFM	Nickel formate	OLA	Oleic acid
NHX	Neohexane	OLB	Oils, miscellaneous: lubricating
NIC	Nicotine	OLD	Oils, edible: lard
NIE	o-Nitrotoluene	OLM	Oleum
NIP	3-Nitrophenol	OLS	Oils, miscellaneous: linseed
NKA	Nickel acetate	OMN	Oils, miscellaneous: mineral
NKC	Nickel carbonyl	OMS	Oils, miscellaneous: mineral seal
NKH	Nickel hydroxide	OMT	Oils, miscellaneous: motor
NKS	Nickel sulfate	ONF	Oils, miscellaneous: neatsfoot
NLD	Naled	OOD	Oils, fuel: 1-D
NMT	Nitromethane	OOL	Oils, edible: olive
NNE	1-Nonene	OON	Oils, fuel: no. 1
NNN	Nonanol	OPI	Oil, misc: pine
NNP	Nonylphenol	OPM	Oils, edible: palm
NNT	Nickel nitrate	OPN	Oils, edible: peanut
NON	Nonene	OPT	Oils, miscellaneous: penetrating
NOX	Nitrogen tetroxide	ORD	Oils, miscellaneous: road
NPH	4-Nitrophenol	ORG	Oils, miscellaneous: range
NPN	1-Nitropropane	ORN	Oils, miscellaneous: rosin
NPP	2-Nitropropane	ORS	Oils, miscellaneous: resin
NSS	Naphtha: stoddard solvent	OSB	Oils, edible: soya bean
NSV	Naphtha: solvent	OSD	Oils, miscellaneous: spindle
NTA	2-Nitroaniline	OSF	Oils, edible: safflower
NTB	Nitrobenzene	OSP	Oils, miscellaneous: sperm
NTC	Nitrosyl chloride	OSX	Oils, fuel: no. 6
NTE	Nitroethane	OSY	Oils, miscellaneous: spray
NTI	Naphthenic acids	OTA	Octanol
NTL	Nitralin	OTB	Oils, miscellaneous: turbine
NTM	Naphthalene	OTC	Oils, edible: tucum
NTO	Nitrous oxide	OTD	Oils, fuel: 2-D
NTP	2-Nitrophenol	OTE	1-Octene
NTR	m-Nitrotoluene	OTF	Oils, miscellaneous: transformer
NTT	p-Nitrotoluene	OTL	Oils, miscellaneous: tall
NTX	Nitric oxide	OTN	Oils, miscellaneous: tanner's
NVM	Naphtha: VM & P	OTW	Oils, fuel: 2
NXX	Nitrogen	OVG	Oils, edible: vegetable
OAA	Octanoic acid	OXA	Oxalic acid
OAC	Oleic acid, sodium salt	OXY	Oxygen
OAL	Octyl aldehydes	PAA	Peracetic acid
OAN	Octane	PAC	Phosphoric acid
OAP	Oleic acid, potassium salt	PAD	Propionaldehyde
OAS	Oils, miscellaneous: absorption	PAH	Propionic anhydride
OCA	Oils, edible: castor	PAL	n-Propyl alcohol
OCC	Oils, edible: coconut	PAM	2-Propanolamine
OCF	Oils: clarified	PAN	Phthalic anhydride
OCN	Oil, misc: cashew nut shell	PAS	Potassium arsenate
OCR	Oils, miscellaneous: croton	PAT	n-Propyl acetate
OCS	Oils, edible: cottonseed	PBO	Potassium binoxalate
OCT	Oils, miscellaneous: coal tar	PBP	Propylene butylene polymer
ODP	Octyl decyl phthalate	PBR	Phosphorus tribromide
ODS	Oils: diesel	PBZ	n-Propylbenzene

PCB	Polychlorinated biphenyl	PPT	Phosphorus trichloride
PCE	Pentachloroethane	PPW	Phosphorus, white
PCH	Potassium chromate	PPZ	Piperazine
PCL	Perchloric acid	PRA	n-Propylamine
PCM	Perchloromethyl mercaptan	PRC	n-Propyl chloride
PCN	Propionitrile	PRD	Pyridine
PCP	Pentachlorophenol	PRE	n-Propyl ether
PCR	Potassium chlorate	PRG	Propargite
PDC	Pentadecanol	PRO	Propargyl alcohol
PDE	1,3-Pentadiene	PRP	Propane
PDH	Paraldehyde	PRR	Pyrethrins
PDL	Phenyldichloroarsine	PTA	Pentane
PDN	1,4-Pentadiene	PTB	Pentaborane
PDT	Potassium dichloro-s-triazinetriene	PTC	Potassium cyanide
PEB	Polyethylene polyamines	PTD	Potassium dichromate
PEN	Pentaethylenehexamine	PTE	1-Pentene
PET	Pentaerythritol	PTH	Potassium hydroxide
PFA	Paraformaldehyde	PTI	Potassium iodide
PGA	Pyrogalllic acid	PTL	Petrolatum
PGC	Polypropylene glycol	PTM	Potassium
PGM	Polypropylene glycol methyl ether	PTN	Petroleum naphtha
PGN	Propylene glycol methyl ether acetate	PTO	Parathion
PGY	Propylene glycol ethyl ether	PTP	Potassium permanganate
PHD	Phosdrin	PTR	Propylene trimer
PHE	Phenylhydrazine	PTS	Potassium oxalate
PHG	Phosgene	PTT	Propylene tetramer
PHH	Phenylhydrazine hydrochloride	PXE	1-Phenyl-1-xylyl ethane
PHN	Phenol	PXP	n-Propoxypropanol
PII	Propyleneimine	QNL	Quinoline
PIN	Pinene	RSC	Resorcinol
PLA	n-Propanolamine	SAB	Sodium alkylbenzenesulfonates
PLB	Polybutene	SAC	Sulfuric acid, spent
PLP	Polypropylene	SAL	Salicylaldehyde
PLT	beta-Propiolactone	SAM	Sodium amide
PMA	Phenylmercuric acetate	SAR	Sodium arsenite
PME	Propylene glycol methyl ether	SAS	Sodium alkyl sulfates
PMN	n-Propyl mercaptan	SAT	Sodium fluoroacetate
PNA	Propionic acid	SAU	Sodium aluminate solution (45% or less)
PNE	2-Pentanone	SAZ	Sodium azide
PNI	n-Propyl nitrate	SBF	Sodium bifluoride
PNR	Potassium nitrate	SBH	Sodium borohydride
POA	Potassium arsenite	SBS	Sodium bisulfite
POC	Pentanoic acid	SBT	Sorbitol
POE	Potassium oleate	SBX	Sodium hydroxide solution
POP	Potassium peroxide	SCD	Sodium cacodylate
POX	Propylene oxide	SCH	Sodium chromate
PPA	Polyphosphoric acid	SCL	Sulfuryl chloride
PPB	Phosphorus, black	SCM	Strontium chromate
PPD	Propanedinitrile	SCN	Sodium cyanide
PPE	n-Pentyl propionate	SCR	Sodium dichromate
PPG	Propylene glycol	SCY	Sodium thiocyanate
PPI	Polymethylene polyphenyl isocyanate	SDA	Sodium arsenate
PPL	Propylene	SDB	Sodium borate
PPO	Phosphorus oxychloride	SDC	Sodium chlorate
PPP	Phosphorus pentasulfide	SDD	Sodium chlorate solution
PPR	Phosphorus, red	SDF	Sodium fluoride

SDH	Sodium hydride	TCB	1,2,4-Trichlorobenzene
SDN	Sodium nitrate	TCE	Trichloroethane
SDS	Sodium sulfide	TCF	Trichlorofluoromethane
SDT	Sodium dichloro-s-triazinetriene	TCH	Trichloroacetaldehyde
SDU	Sodium	TCL	Trichloroethylene
SFA	Sulfuric acid	TCM	1,1,2-Trichloroethane
SFC	Sodium ferrocyanide	TCN	1,2,3-Trichloropropane
SFD	Sulfur dioxide	TCO	Tricresyl phosphate ($\geq 1\%$ ortho isomer)
SFL	Sulfolane	TCP	Tricresyl phosphate ($<1\%$ ortho isomer)
SFM	Sulfur monochloride	TCS	Trichlorosilane
SFR	Sodium silicofluoride	TCT	Trichloro-s-triazinetriene
SHC	Sodium hypochlorite	TDA	Toluenediamine
SHD	Sodium hydroxide	TDB	Tetradecylbenzene
SHP	Sodium hypochlorite solution	TDC	1-Tridecene
SHR	Sodium hydrosulfide solution	TDI	Toluene 2,4-diisocyanate
SHX	Sodium hydrogen sulfite solution (35% or less)	TDN	Tridecanol
SLA	Salicylic acid	TEA	Triethanolamine
SLD	Selenium dioxide	TEB	Triethylbenzene
SMB	Sodium 2-mercaptobenzothiazol solution	TEC	Tetrachloroethane
SML	Sodium methylate	TED	Tetraethyl dithiopyrophosphate
SNI	Sodium nitrite solution	TEG	Triethylene glycol
SNT	Sodium nitrite	TEL	Tetraethyl lead
SOX	Sodium oxalate	TEN	Triethylamine
SPC	Sodium pentachlorophenate	TEP	Tetraethyl pyrophosphate
SPH	Sodium phosphate, tribasic	TES	2,4,5-T esters
SPP	Sodium phosphate	TET	Triethylenetetramine
SRA	Stearic acid	TFA	Tallow fatty alcohol
SRS	Sucrose	TFC	Trifluorochloroethylene
SSC	Sodium silicate	TFE	Tetrafluoroethylene
SSE	Sodium selenite	TFR	Trifluralin
SSF	Sodium sulfite	TGC	Tripropylene glycol
STC	Silicon tetrachloride	TGD	Triethylene glycol di-(2-ethylbutyrate)
STF	Stannous flouride	TGE	Triethylene glycol ethyl ether
STN	Strontium nitrate	TGM	Tripropylene glycol methyl ether
STO	Selenium trioxide	TGY	Triethylene glycol methyl ether
STR	Strychnine	THA	Trimethyl hexamethylene diamine
STS	Sodium thiocyanate solution (56% or less)	THB	Thallium carbonate
STY	Styrene	THC	Thiocarbamide
SVA	Silver acetate	THF	Tetrahydrofuran
SVC	Silver carbonate	THI	Trimethylhexamethylene diisocyanate
SVF	Silver fluoride	THN	Tetrahydronaphthalene
SVI	Silver iodate	THR	Thiram
SVN	Silver nitrate	TIA	Triisobutylaluminum
SVO	Silver oxide	TIB	Triisobutylene
SVS	Silver sulfate	TIP	Triisopropanolamine
SXX	Sulfur	TLA	Thallium acetate
TAA	Trimethylacetic acid	TLI	o-Toluidine
TAL	Triethylaluminum	TLO	Tallow
TAP	p-Toluenesulfonic acid	TMA	Trimethylamine
TAS	2,4,5-Trichlorophenoxyacetic acid, sodium salt	TMC	Trimethylchlorosilane
TBP	Tributyl phosphate	TME	1,2,4-Trimethylbenzene
TBT	Tetrabutyl titanate	TML	Tetramethyl lead
TBZ	1,2,3-Trichlorobenzene	TMP	1-Isobutyrate
TCA	2,4,5-Trichlorophenoxyacetic acid	TNA	Tannic acid
		TNI	Thallium nitrate
		TNM	Tetranitromethane

TOD	p-Toluidine	VTS	Vinyltrichlorosilane
TOF	Tall oil, fatty acid	WCA	Waxes: carnauba
TOI	m-Toluidine	WPF	Waxes: paraffin
TOL	Toluene	WSL	White spirit (low (15-20%) aromatic)
TPA	2-(2,4,5-Trichlorophenoxy) propanoic acid	XLM	m-Xylene
TPE	Isooctyl ester	XLO	o-Xylene
TPG	Thiophosgene	XLP	p-Xylene
TPH	Trichlorophenol	XYL	Xylenol
TPI	Triethyl phosphite	ZAC	Zinc ammonium chloride
TPO	Tris(Aziridinyl)phosphine oxide	ZAR	Zinc arsenate
TPP	Trimethyl phosphite	ZBC	Zinc bichromate
TPS	Triethyl phosphate	ZBO	Zinc borate
TPT	Turpentine	ZBR	Zinc bromide
TRB	Tridecylbenzene	ZCA	Zirconium acetate
TRC	Trichlorfon	ZCB	Zinc carbonate
TRD	Tridecane	ZCL	Zinc chloride
TRL	Tripropylamine	ZCN	Zinc cyanide
TRN	Thorium nitrate	ZCO	Zirconium oxychloride
TRP	Trixylenyl phosphate	ZCR	Zinc chromate
TSU	Thallium sulfate	ZCS	Zirconium sulfate
TTB	1,2,3,5-Tetramethylbenzene	ZCT	Zirconium tetrachloride
TTD	1-Tetradecene	ZDP	Zinc dialkyldithiophosphate
TTE	Tetrachloroethylene	ZEC	Zectran
TTF	1,1,2-Trichloro-1,2,2-trifluoroethane	ZFB	Zinc fluoroborate
TTG	Tetraethylene glycol	ZFM	Zinc formate
TTN	Tetradecanol	ZFX	Zinc fluoride
TTP	Tetraethylenepentamine	ZHS	Zinc hydrosulfite
TTT	Titanium tetrachloride	ZIR	Zirconium nitrate
TXP	Toxaphene	ZNA	Zinc acetate
UAN	Uranyl nitrate	ZNT	Zinc nitrate
UAS	Urea, ammonium nitrate soln (w/aqua ammonia)	ZPC	Zinc potassium chromate
UDA	Undecanoic acid	ZPF	Zirconium potassium flouride
UDB	n-Undecylbenzene	ZPP	Zinc phosphide
UDC	1-Undecene	ZPS	Zinc phenolsulfonate
UND	Undecanol	ZSF	Zinc sulfate
UPO	Urea peroxide	ZSL	Zinc silicofluoride
URA	Uranyl acetate		
URE	Urea		
URP	Uranium peroxide		
URS	Uranyl sulfate		
VAL	Valeraldehyde		
VAM	Vinyl acetate		
VBL	Vanillan black liquor		
VCH	Vinylcyclohexene		
VCI	Vinylidene chloride		
VCM	Vinyl chloride		
VEE	Vinyl ethyl ether		
VFI	Vinyl fluoride		
VME	Vinyl methyl ether		
VND	Vinyl neodecanoate		
VNO	Vanadium oxide		
VNT	Vinyl toluene		
VOT	Vanadium oxytrichloride		
VOX	Vanadium pentoxide		
VSF	Vanadyl sulfate		

10. DATA SOURCES

The source of every item of data contained in section 11 is recorded in master data files and is available on request. The principal sources are listed below. Many other sources were consulted, but most of them provided only a few items and are not given here. In a few cases the information given is based on an analogy with that for a closely related chemical; the analogy was drawn by an expert in the field, whose identity appears in the master data files.

Where a source was used for a single category of data, the source is given in Section 3 ("Explanation of Terms") and is not repeated here.

10.1 GENERAL SOURCES

The following sources contained data for many of the 13 data categories used:

1. Manufacturers' Technical Bulletins - This is usually the best single source of general information about the chemical. The bulletins contain the most recent data. Bulletins were not available for a few chemicals that are not items of commerce but are intermediates shipped from one manufacturing site to another.
2. Material Safety Data Sheets - These were provided by the manufacturer using the U.S. Department of Labor Form OSHA-20 or an approved modification.
3. Code of Federal Regulations - Office of the Federal Register, Archives and Record Service, Washington, D.C., 1972. Titles 46 (Shipping) and 49 (Transportation) were used in the most recent revision available, October 1, 1996.
4. Chemical Safety Data Sheets - Chemical Manufacturers Association, Washington, D.C.
5. Industrial Safety Sheets - National Safety Council, Chicago, Illinois.
6. International Maritime Dangerous Goods Code - International Maritime Organization (IMO), London, January 1, 1990.
7. Petroleum Products Handbook - V.B. Guthrie (ed.), McGraw-Hill, New York, 1960.
8. Glossary of Terms Used in Petroleum Refining - 2nd edition, American Petroleum Institute, New York, 1962.
9. The Handling and Storage of Liquid Propellants - Office of Defense Research and Engineering, U.S. Government Printing Office, Washington, D. C., 1963.
10. Industrial Chemicals - W.L. Faith, D.B. Keyes, and R.L. Clark, 3rd edition, Wiley, New York, 1965.
11. Chemical Technology of Petroleum - W.A. Gruse and D.R. Stevens, 3rd edition, McGraw-Hill, New York, 1960.
12. Chemical Rocket/Propellant Hazards - CPIA Publication No. 194, Vol. III, 1970.
13. Organic Solvents - J.A. Riddick and W.B. Bunger, 3rd edition, Wiley-Interscience, New York, 1970.
14. Transport of Dangerous Goods - (4 vols) United Nations, New York, 1981.

15. Kirk-Othmer Encyclopedia of Chemical Technology - 1st edition (1947 - 1960) and 2nd edition (1963 - 1970), Interscience-Wiley, New York.
16. Matheson Gas Data Book - 5th edition, Matheson Gas Products, East Rutherford, New Jersey, 1971.
17. Explosive and Toxic Hazardous Material - J.H. Meidl, Glencoe Press, Beverly Hills, California, 1969.
18. Dangerous Properties of Industrial Materials, 7th edition, N.I. Sax, Van Nostrand Reinhold Company, New York, 1989.
19. Organic Phosphorus Compounds - G.M. Kosolapoff and L. Maier (6 Vols.), Wiley-Interscience, New York.
20. The Chemistry of Organo-Phosphorus Pesticides - C. Fest and K.J. Schmidt, Springer-Verlag, New York, 1973.

10.2 CHEMICAL DESIGNATIONS

1. Commercial Organic Chemical Names - Compiled by the Synthetic Organic Chemical Manufacturers Association (SOCMA), Chemical Abstracts Service, Columbus, Ohio, 1965.
2. Chemical Synonyms and Trade Names - W. Gardner and E.I. Cooke, 7th edition, CRC Press, Cleveland, Ohio, 1971.
3. The Merck Index of Chemical and Drugs - 11th edition, Merck and Co., Rahway, New Jersey, 1989.

10.3 HEALTH HAZARDS

1. Industrial Hygiene and Toxicology - F.A. Patty, 3rd edition, Vol. II, Interscience, New York, 1981.
2. Toxicity and Metabolism of Industrial Solvents - E. Browning, Elsevier, New York, 1965.
3. Practical Toxicology of Plastics - R. Lefaux, CRC Press, Cleveland, Ohio, 1968.
4. Industrial Toxicology - L.T. Fairhall, Williams and Wilkins, 2nd edition, Baltimore, Maryland, 1957.
5. Toxicology of Drugs Chemicals - W.B. Deichman and H.W. Girarde, Academic Press, New York, 1969.
6. Clinical Toxicology of Commercial Products - M.N. Gleason, et al., 4th edition, Williams and Wilkins, Baltimore, Maryland, 1981.
7. Handbook of Toxicology: Acute Toxicities of Solids, Liquids and Gases to Laboratory Animals - W.S. Spector, Saunders, Philadelphia, Pa., 1956.
8. Occupational Diseases: A Guide to their Recognition - U.S. Department of Health, Education, and Welfare. Public Health Service Publication No. 1097. Superintendent of Documents, Washington, D.C., 1964.

9. First Aid Textbook - American National Red Cross, Washington, D.C., 1972.
10. Electrical Safety Practice: Odor Warning for Safety - Monograph 113 Instrument Society of America (ISA), Pittsburgh, Pa., 1972.
11. Toxic Substances - Annual List 1971 - H.E. Christensen, U.S. Department of Health, Education, and Welfare, Superintendent of Documents, Washington, D.C., 1971.
12. Hygienic Guide Series - American Industrial Hygiene Association, Detroit, Michigan, 48227.
13. Toxicity of Industrial Metals - E. Browning, 2nd Edition, Appleton-Century-Crofts, New York, 1969.

10.4 FIRE HAZARDS

1. The Fire and Explosion Hazards of Commercial Oils - W. Vlachos and C.A. Vlachos, Vlachos and Co., Philadelphia, Pa., 1921.
2. 1972 Annual Book of ASTM Standards - American Society for Testing and Materials, Philadelphia, Pa., 1972.
3. Fire Protection Guide on Hazardous Materials - 10th edition, Nos. 325A, 325M, 49, 491M, and 704M, National Fire Protection Association (NFPA), Boston, Mass., 1991.
4. Fire Protection Handbook - A. E. Cote (ed.), 17th edition, National Fire Protection Association (NFPA), Boston, Mass., 1991.
5. Handbook of Industrial Loss Prevention - 2nd edition, Factory Mutual Engineering Corp., McGraw-Hill, New York, 1967.

10.5 WATER POLLUTION

1. Water Quality Criteria Data Book - Vol. 1 - Organic Chemicals (1970) and Vol. 2 - Inorganic Chemicals (1971), United States Environmental Protection Administration, Superintendent of Documents, Washington, D.C.
2. Engineering Management of Water Quality - P.H. McGauhey, McGraw-Hill, New York, 1968.
3. The BOD of Textile Chemicals - Proceedings of the American Association of Textile Chemists and Colorists, American Dyestuff Reporter, August 29, 1966, p. 39.
4. Biodegradable Surfactants for the Textile Industry - American Dyestuff Reporter, January 30, 1967.
5. Water Quality Criteria - J.E. McKee and M.W. Wolf, 2nd edition, California State Water Quality Control Board, Sacramento, California, 1963.
6. Water Quality Criteria - National Technical Advisory Committee, Federal Water Pollution Control Administration, Washington, D.C. 1968.
7. Water Quality Characteristics of Hazardous Materials - R.W. Hann, Jr., and P.A. Jensen, Environmental Engineering Division, Texas A and M University, College Station, Texas, 1974.

10.6 PHYSICAL AND CHEMICAL PROPERTIES

1. Solubilities of Inorganic and Organic Compounds - H. Stephen and T. Stephen, Macmillan, New York, 1963, Vol. 1, Part 1.
2. The Critical Constants of Organic Compounds - A.P. Kudchadker, G.H. Alani and B.J. Zwolinski, Chemical Reviews, 68,659 (1968).
3. Physical Properties of Hydrocarbons - Vol. 1 (1968) and Vol. 2 (1970), R.W. Gallant, Gulf Publishing Co., Houston, Texas.
4. International Critical Tables - McGraw-Hill, New York, 1926.
5. Handbook of Chemistry and Physics - R.C. Weast (ed.), 62nd edition, CRC Publishing Co., Cleveland, Ohio, 1982.
6. The Properties of Gases and Liquids - R.C. Reid and T.K. Sherwood, 2nd edition, McGraw-Hill, New York, 1966.
7. Thermal Conductivity of Gases and Liquids - N.V. Tsederburg, MIT Press, Cambridge, Mass., 1965.
8. Lange's Handbook of Chemistry - N.A. Lange, 12th edition, McGraw-Hill, New York, 1979.
9. The Chemical Thermodynamics of Organic Compounds - D.R. Stull, et al., Wiley, New York, 1969.
10. Matheson Gas Data Book - 4th edition, Matheson Co., Inc., 1966.
11. Physical Properties of Chemical Compounds - Vol. 1 (1955), Vol. 2 (1959), and Vol. 3 (1961), R.R. Dreisbach, American Chemical Society, Washington, D.C.
12. Beilsteins Handbuch der Organischen Chemie - Springer, Berlin, Germany.
13. Gmelins Handbuch der Anorganischen Chemie - Verlag Chemie, Weinheim, Germany.
14. Solubilities of Inorganic and Organic Compounds - 3rd edition and supplement, A. Seidell and W.F. Linke, Van Nostrand, New York, 1941 - 1952.
15. Selected Values of Physical and Thermodynamics Properties of Hydrocarbons and Related Compounds - F.D. Rossini, et.al., American Petroleum Institute Project 44, American Petroleum Institute, Pittsburgh, Pa., 1953.
16. Heat of Combustion and Formation of Organic Compounds - E.S. Domalski, Journal of Physical and Chemical Reference Data, 1,221 (1972).
17. Surface Tension of Pure Liquid Compounds - J.L. Jasper, J. Phys. Chem. Ref. Data, 1,841 (1972).
18. JANAF Thermochemical Tables - NSRDS - NBS - 37 (1970); 1974 Supplement and complete index, J. Phys. Chem. Ref. Data, 3,311 (1974).

19. Physical and Thermodynamic Properties of Aliphatic Alcohols - R.C. Wilhoit and B.J. Zwolinski, J. Phys. Chem. Ref. Data, 2 (1973), Supplement 1.
20. Critical Constants of Hydrocarbons - C.A. Passut and R.P. Danner, Ind. Eng. Chem., Pro. Des. Devel., 12,365 (1973).
