Description Notes Included with the Herbs Tape printout is a memo from the veterans Education Project explaining how to use the printout.

MEMO ON OBTAINING AND USING HERBS TAPE PRINTOUT

The HERBS tape is a computerized record of the herbicide spraying missions conducted in Vietnam between August 1965 and February 1971. It is a record of approximately 86 percent of the missions conducted by the Air Force. Using these records is one way to establish exposure to Agent Orange.

Note, however, that these records do not include locations of those areas sprayed from trucks or by hand. Just because exposure cannot be documented with the HERBS tape printout does not prove there was no exposure.

The Air Force has stated that a *typical* spraying mission covered a path 280 feet wide by 8.7 miles. No data within the printout indicates possible drift of the spray due to winds. Some estimates state the drift could have been 20 kilometers (12 miles). In addition, the veteran would not have to have been in the path of the mission on the same day the mission was conducted. Exposure may have occurred if the veteran had been in the area up to 30 days after the mission. Clearly, the means of being exposed are not limited simply to being sprayed directly.

TO OBTAIN THE PRINTOUT AND MAPS

Direct a Freedom of Information Act request to:

Office of the Assistant Secretary of
Defense (Health Affairs)
ATTN: Captain Peter Flynn
Department of Defense
Washington DC 20301

Printouts from the tapes have been produced in two formats: one is a 316-page listing day-by-day of the missions; the other is a 448-page listing by province of the missions (and within each province, day-by-day).

Maps that show the Universal Transverse Mercator grids are necessary to be able to plot the missions. Captain Flynn may be able to send them. An alternate source is the Defense Mapping Agency. Send \$7.40 (in a check payable to the "U.S. Treasurer") to:

Director, DMAODS
ATTN: DDCP
6500 Brooks Lane
Washington DC 20315

Order the following four maps to cover all of South Vietnam:

Stock No. 1301XND4849
Stock No. 1301XNC4849
Stock No. 1301XNE48
Stock No. 1301XNE49

You can expect a 4-6 week delay.

The Veterans Education Project also will provide the day-by-day printout and xeroxed copies of the South

Vietnam portion of the maps for \$12 (pre-paid; write VEP, 1346 Connecticut Avenue NW, Washington DC 20036).

EXPLANATION OF DATA IN PRINTOUT

Each page of the printout is broken down into nine columns. The headings and their explanation follow:

DATE: year, month, day

CTZ: Combat Tactical Zone or Military Region (1, 2, 3 or 4)

MISSION: Mission project number

AGN: Type of herbicide (O for Orange; B for Blue; W for White)

GALS: Number of gallons of herbicide sprayed during a mission

TYP: Type of mission flown (C for crop mission/fixed wing and helicopter; D for defoliation/fixed wing only; E for enemy ground supply route/helicopter only; F for friendly line of communication/helicopter only; P for perimeter of military installation/helicopter only; S for enemy cache site/helicopter only; W for waterway/landing zone/helicopter only)

AREA: Calculated area in hectares of area sprayed

LEG: Mission leg (*see more detailed explanation below*)

UTM: Universal transverse mercator grid coordinate (*see more detailed explanation below*)

MORE DETAILED EXPLANATION OF COLUMN HEADINGS "LEG" AND "UTM"

In providing a more detailed explanation of these two categories of data, readings from page 2 of the day-by-day printout for August 15, 1965, are used.

LEG	UTM
1A	YD350155
1B	YD450150

1A means the starting point of the first spraying mission. Some flights may have had two drops or there may have been more than one flight on that day; the beginning point of the second drop would be designated 2A.

1B is the ending point. Some missions might not have been in a straight line like this one; they might include turns designated C or D and so on. The ending point then would be the last alphabetical letter on that mission.

YD is the label for the square on the map in which the mission began; these labels are peculiar to maps marked off with universal transverse mercator grids. The squares on the maps provided by DOD measure 100,000 by 100,000 meters.

350155 is the geographic coordinate (within square YD) for the start of the mission. The six-digit figure is actually two 3-digit coordinates; the first three digits mark the distance along the horizontal axis; the second three digits mark the distance along the vertical axis.

450150 is the coordinate for the end of the mission. A line drawn between these two points produces the flight path of the mission.

The following steps are designed to enable the reader to plot the spraying missions and assist the veteran document exposure to Agent Orange. They are based on using the day-by-day printout and the maps noted above. These suggestions will change as better maps become available or other methods of using the printout are developed.

NOTE: Useful mechanical aids in working with the maps are two 6-inch clear plastic rulers with metric marks on them. The centimeter marks on the ruler match the grid marks in each square on the maps.

STEP 1: FIND VET'S POSITION(S) ON MAP

Any map of Southeast Asia can be used—as long as the UTM grid squares are overlaid on it (or you can transfer a location on another map to a UTM map). The vet needs to either point to a location or locations on a map or else have some other recollection of an operation or unit's name that can be tied to a specific location.

One major problem with the maps we have now is that NO American-named base camps or fire bases, etc., are shown on them; these maps show only Vietnamese names for villages and geographic features. You also have to use a separate key to determine names of provinces. Other maps showing locations of divisions and companies may be available. Even if those maps do not have UTM grids on them, it may be possible to "transfer" the location to a UTM map.

It may also be possible to locate in the veteran's service records a list of operations in which he participated or units to which he was attached. With such a list, it then may be possible to either make an official request to the Defense Department for the UTM coordinates of the operation or unit or to request copies of those operation or unit records.

The bottom line needs to be pinpoints on the map with corresponding dates the vet was there.

STEP 2: LOCATE VET'S POSITION IN THE PRINTOUT

First, start with those pages of the printout corresponding to the dates of the vet's tour of duty.

However, as noted before it's unclear how long dioxin may remain in the soil or water; you may want to review the previous 30 days for spraying missions.

Second, scan the 2-letter labels in the UTM column for the label of the squares within which the vet was located.

Third, once you've located the square's label in the printout, plot the spraying missions and mark them on the map as explained in Step 3.

STEP 3: PLOT SELECTED SPRAYING MISSIONS

As noted above, the six-digit UTM is actually two 3-digit coordinates; the first three digits mark the distance along the horizontal axis; the second three digits mark the distance along the vertical axis.

First, because of the scale of these maps (1:1,000,000), round-off to the nearest zero and eliminate the last digit of the horizontal and vertical coordinates within the squares selected. In the example used above (starting point of YD 350 155 and ending point of YD 450 150) that would mean horizontal axis measurements of 3.5 and 4.5 and vertical axis measurements of 1.6 and 1.5).

Second, use the ruler and the rounded off, 2-digit coordinate for the starting point to move along the bottom line of the square (the horizontal axis) to the 3.5 mark. Then use the second ruler to move up on the vertical axis to the 1.6 mark. Mark the intersection of the rulers with an "x."

Repeat this for the mission's ending point (4.5 and 1.5). Draw a line between the points. This line, then, plots the flight of that spraying mission.

Drift of the spray due to winds may have been up to 20,000 kilometers (2 centimeters on the map). ■

VA POLICY REGARDING "ALLEGATION OF EXPOSURE"

Early in April a change to DVB Circular 21-80-1 (February 7, 1980), "Review of Agent Orange Exposure Claimants," was issued to all VA Regional Offices. The change added the following paragraph:

"4. It is VA policy to resolve any reasonable doubt in favor of the claimant. Consistent with this policy, given the considerable uncertainties as to the deposition of defoliants in Southeast Asia and troop positions at pertinent times, we will accept in the absence of positive evidence to the contrary a Vietnam veteran's contention of exposure. . . . If there is positive evidence that veteran could not have been exposed, such as a headquarters assignment in Saigon or a desk job at the Da Nang Air Force Base, such facts should be cited. Otherwise it will be assumed that veteran was exposed to defoliants as alleged and the claim for service connection will be resolved on the basis of the relationship of the disability in question to such exposure."
