Lead Bibliography, Analysis of Samples

USAFA/DFCBS-R (Capt R. Gaesor)
USAF Academy CO 80840

1. The attached bibliography on lead was prepared by Lt Col Larry Klinstiver, USAFSAM/VNE, Brooks AFB TX, in support of a Ph.D. program with Colorado State University. With his concurrence, use it as you wish. I've also attached an article on copper toxicity for your information.

2. The 2 Aug 77 letter from Lt Col Sampson, DFCBS-R, requesting analytical support for your non-potable irrigation study has been received by Maj Lefebvre. We discussed your requirements as outlined in the letter. Although we believe this project is of importance to the Air Force, the magnitude of the requested support requires more manpower than we have available. The analyses of 90 biological or soil samples per month require extensive manpower, instrumentation and supplies. We would recommend that you reevaluate your requirements. We will make every effort to support you with an analytical program of 30-40 samples per month. If this is agreeable with you, please notify us as soon as possible. We will coordinate the appropriate requirements with the McClellan Laboratory.

SIGNED

ALVIN L. YOUNG, Capt, USAF, Ph.D.
Chemist/Biologist Consultant

- 2 Atch
- 1. Lead Bibliography
- 2. Copper Toxicity
