Subject: Records on UC-123 K " Patches", USAF Museum

(b) (6)

Please send me the contact for (b) (6), or forward this e-mail, so that I can request his assistance in contacting the Air Force Museum at WPAFB to obtain all the records they have on "Patches". The cleaning of the aircraft occurred in 1994 and 1995. We have some of the records, but the sampling data for 1995 is absent. It is crucial for the VA that we obtain the sampling results from the cleaning project for both years, asap. Because it was a public health issue, I am hopeful that the Museum retained the records. The IOM meets on 16 June and I am preparing one of the presentations on behalf of Compensation Service and the Office of Public Health that will be presented on the issue of the former UC-123K and exposures to Agent Orange by Air Force Reserve personnel.

Many thanks for your assistance.

Al Young
