A Voice of the Veterans

Week Ending Sunday, January 03, 2021

Volume 12, Issue 01

This-N-That

Good morning Jim,

I do hope that you had a very Merry Christmas and a Happy New Year!

It's been another week of nearly total silence on news and information regarding Veterans, legislation, and benefits and right now with the election certification beginning it still may be rather quiet again for another week.

Although, personally I'm not thrilled, it will provide us

more time to continue to work on the website and prep, upload and make available more documents.

Last week we added nearly 300 documents and over 90 new weblinks. And we will begin this evening to prep and upload more documents, some many of us have been looking to find for years.

As I mentioned last week, do check the website often, you just never know what will be new or added since your last visit.

And create an account too, it's free and opens the door to thousands of documents not available to the general visitor.

We are still recommending that everyone maintain the face masks and social distancing when you leave your home. The VA has said December was the worst month ever for them when it comes to the COVID-19 virus. So, please be safe!

On behalf of our Volunteers nationwide and myself, we wish you and your family good health!

Respectfully,

Jim Davis

Founder

Jim.Davis@Veterans-For-Change.org

TWO YEARS AFTER THE BLUE WATER NAVY AGENT ORANGE VICTORY AND WE NEED TO KEEP FIGHTING FOR VETERANS

Our priority goal at MVA is to obtain benefits for all victims of military toxic exposure of all types

BY COL. ROB MANESS

Two years ago, Military Veterans Advocacy, Inc (MVA) began 2019 with a major victory in the courts as the Court of Appeals for the Federal Circuit handed down the Procopio v. Wilkie decision in January. This landmark decision forced the Department of Veterans Affairs to begin processing Blue Water Navy Vietnam Veteran Agent Orange claims once the mandate was issued in March. As we were waiting for the mandate, we coordinated with the House Veterans Committee staff to try to ensure any codifying legislation would remain in-line with Procopio and prevent further delays throughout the winter and spring.

For more than a decade, MVA presented evidence to Congress and the VA that runoff from Vietnam included the toxins from Agent Orange, which was ingested into water distillation systems on Navy ships

offshore, affecting servicemen who never set foot on Vietnamese soil.

Despite the Procopio win, Congress last spring passed the Blue Water Navy Vietnam Veterans Act (H.R. 299) to serve these Veterans' needs. The legislation allowed for administrative tinkering with the implementation and included ambiguous language that helped justify the stay in the eyes of Secretary Wilkie and the Courts. MVA reluctantly withdrew its support before passage, but circumstances pressured Congress to pass the measure without regard for the unintended consequences. One of those consequences was VA Secretary Robert Wilkie issuing an administrative stay order through the end of 2019, and MVA sought a legal remedy through *Procopio v. Secretary of Veterans Affairs* (Procopio II).

During the first week of November 2019 the Court of Appeals for the Federal Circuit heard oral arguments in Procopio II. In December, the Judges told the VA they were not to even consider extending the stay. Unfortunately, they also found that the Congressional language authorized Secretary Wilkie to stay proceedings until January 1 2020.

Have we won?

We have confirmed that starting January 21, 2020, as

Secretary Wilkie promised, Blue Water Navy Vietnam Veterans' benefits are being awarded. That is great news.

MVA, now merged with the Blue Water Navy Vietnam Veterans Association, Agent Orange Survivors of Guam, and Thailand Agent Orange Veterans, is a full membership organization and we also know we must continue to fight. Why? Didn't we finally win the day, you ask? Unfortunately, no, we haven't won accountability and benefit awards on ALL toxic exposures. Of course, we're still not finished fighting for herbicide exposure (agent orange or its companion chemical component herbicides produced in the same era) benefits. As an example, some 55,000 Veterans who operated outside of the territorial sea were exposed to herbicide but not covered by the Act or the Procopio decision.

Media reports in 2020 confirm the need for our continued fight. First, in a report in January 2020 by Steve Andrews of WFLA in Florida, he highlighted that "claims languish for Veterans who served in Thailand during the Vietnam War and were exposed to a dangerous herbicide known as Agent Orange" even though "Margarita Devlin, principal deputy undersecretary for Veterans' benefits contends there is no longer a huge back-log of Veterans waiting for their claims to be processed and completed." Devlin

even audaciously asserted the VA freely gives benefits to Veterans, directly contradicting the reality that it took the VA almost 20 years, and only after a precedent setting court case victory and new legislation from Congress to award some blue water navy Vietnam Veterans the benefits they deserve.

A second report in late January revealed that VA disputes a National Academies of Sciences, Engineering and Medicine, or NASEM, science panel's findings on proposed Agent Orange diseases after a 3-year delay and expects a VA internal "study" won't be ready to make a decision until late 2020. No, the VA drags its feet and has for decades on the matter of toxic exposure in the American military. The evidence proves that fact but let's not stop there.

Yet another and third report was published one day after the second that shows the Department of Defense and the Department of Veterans Affairs continue to actively prevent Veterans' claims being approved for toxic exposure, including for Agent Orange in Thailand. The report stated "The Department of Defense has released a new list of locations outside Vietnam where herbicides like Agent Orange were tested and stored, a compilation that could provide some Veterans proof of exposure needed to support their VA disability claims. But the

list, published Jan. 27 by the Department of Veterans Affairs, omits more than 40 locations previously noted as exposure sites by DoD in 2018 — deletions that could undermine other Veterans' pending claims."

A DoD spokesperson stated the new list replaces the one from 2018 and is "the result of DoD's thorough review of the records for use, storage and testing of Agent Orange and other tactical herbicides outside of Vietnam." Of course, emphasis on the term "tactical herbicides" is likely the way they eliminated some locations. It's important for Veterans and survivors filing claims to remember that this term is used for a herbicide's operational purpose. Agent Orange and the other so-called "tactical herbicides" agents Purple, Pink, Green, Blue, White and their active ingredients were used in non-tactical applications on installations and in war zones but were not necessarily referred to as such. The chemical components of tactical and commercial herbicides are the same. We have direct evidence and soil sample evidence from as late as 2018 that proves these herbicides were used by the military on Guam, for example. Veterans service connection needs to be based on the chemical composition of these herbicides, not the published category. Don't fall into this trap of confusion set by DoD and VA! The list is very important for Veterans outside of Vietnam to prove exposure to the VA so this

new list is likely to cause even more denials and delays for Veterans and survivors who continue to pass away in large numbers every day.

Our priority goal at MVA is to obtain benefits for all victims of military toxic exposure of all types and Veterans harmed by VA inaction or incorrect action through our three mission pillars of legislation, litigation, and education.

We are working with key Congressmen and women on a bill establishing a National Military Toxic Exposure Research Center that will use an epidemiology approach overseen by a DoD Advisory Board. The proposal is based on the successful Australian model that confirmed blue water navy Vietnam Veteran's agent orange exposure almost 20 years before the United States started awarding benefits this year. The system tracks and surveils active duty servicemembers, Veterans, and their families for health research studies in the military and Veteran communities.

The USA needs to establish our own center for a variety of reasons. Claims filed by Veterans continue to be denied, citing an alleged lack of evidence or presumptive status for service-connected disabilities. Bills to require coverage are tied up in Congress awaiting offsets required by the Pay As You Go Act of

2010.

Veterans and their family members are continuing to struggle with and suffer from the effects of toxic exposures. Unlike the more visible wounds of combat, the effects of toxic exposure are often invisible to the onlooker and affect more than the individual service member. Toxin-exposed Veterans and their descendants suffer from complex constellations of cancers, and a multitude of chronic medical disorders.

Over the long term, financial and human resources expenditures will be greatly reduced as exposures and diseases are detected earlier, enabling earlier medical intervention, and reducing or eventually eliminating our current reliance on presumptive exposures.

Of course, we continue to advocate for approval of bills awarding presumptive benefits such as HR 1713, the Lonnie Kilpatrick Central Pacific Herbicide Relief Act to cover herbicide exposures on Guam and other islands, HR 2201 to modify the presumption of service connection for Veterans who were exposed to herbicide agents while serving in the Armed Forces in Thailand during the Vietnam era, and HR4086, the Protection for Veterans Burn Pit Exposure Act but these bills, like the Blue Water Navy Act, can take decades these Veterans and their families don't have

to get passed.

That is why our litigation strategy includes requesting Administrative Procedures Act rulemaking from the VA mirroring the presumptive legislation. We expect we'll be back in court this coming year. This pathway is the same strategy we eventually implemented for the Blue Water Navy presumption benefits which culminated with our winning Procopio court case, finally enabling Blue Water Navy legislation to pass last year after nearly a decade of failure in Congress caused by Pay-Go Rule issues.

Our 2021 education mission is a continuing legal education for attorneys and Veteran service officer training offering on Blue Water Navy Claims education seminar. We just completed our first one in Tampa, Florida and plan to accomplish at least four more throughout the country this year.

Our fight continues. That is why MVA became a founding member of Toxic Exposures in the Military (TEAM) and fully supports the TEAM Toxic Exposure legislation. Shamefully, the reality is the DoD and VA are not being held accountable regarding military toxic exposures of all types: radiation, chemical, or biological and we must keep working together from all angles to find solutions to this decades long

challenge.

Two years ago, Military Veterans Advocacy, Inc (MVA) began 2019 with a major victory in the courts as the Court of Appeals for the Federal Circuit handed down the Procopio v. Wilkie decision in January. This landmark decision forced the Department of Veterans Affairs to begin processing Blue Water Navy Vietnam Veteran Agent Orange claims once the mandate was issued in March. As we were waiting for the mandate, we coordinated with the House Veterans Committee staff to try to ensure any codifying legislation would remain in-line with Procopio and prevent further delays throughout the winter and spring.

For more than a decade, MVA presented evidence to Congress and the VA that runoff from Vietnam included the toxins from Agent Orange, which was ingested into water distillation systems on Navy ships offshore, affecting servicemen who never set foot on Vietnamese soil.

Despite the Procopio win, Congress last spring passed the Blue Water Navy Vietnam Veterans Act (H.R. 299) to serve these Veterans' needs. The legislation allowed for administrative tinkering with the implementation and included ambiguous language that helped justify the stay in the eyes of Secretary Wilkie and the Courts. MVA reluctantly withdrew its

support before passage, but circumstances pressured Congress to pass the measure without regard for the unintended consequences. One of those consequences was VA Secretary Robert Wilkie issuing an administrative stay order through the end of 2019, and MVA sought a legal remedy through *Procopio v. Secretary of Veterans Affairs (Procopio II)*.

During the first week of November 2019 the Court of Appeals for the Federal Circuit heard oral arguments in *Procopio II*. In December, the Judges told the VA they were not to even consider extending the stay. Unfortunately, they also found that the Congressional language authorized Secretary Wilkie to stay proceedings until January 1 2020.

COVID-19 Vaccinations Begin at the Veterans Homes of California

SACRAMENTO – The California Department of Veterans Affairs (CalVet) announced that COVID-19 vaccinations are underway for skilled nursing facility residents and staff at the Veterans Home of California-Yountville. Walgreens began administering the vaccines at the Home yesterday and will continue the clinic through today. CalVet's eight Homes are enrolled in the state and federal [Pharmacy Partnership Program](#) with Walgreens and CVS.

"The relief at our Home is palpable," said CalVet Secretary Vito Imbasciani MD. "As we roll out vaccinations to all eight of our Veteran Homes' residents and staff, we are continuing our efforts to protect one of the state's most vulnerable populations."

Vaccinations are scheduled to begin over the course of the next few weeks at CalVet's seven other Homes, with additional Homes scheduled to receive vaccines as soon as next week.

"Walgreens is very proud to be a part of this historic milestone to begin administering the COVID-19 vaccine to our most vulnerable populations in California and across the country," said John Standley, president of Walgreens. "With more than a decade of experience administering various vaccines, we have the deep expertise to support this unprecedented effort to allow our nation to emerge from this pandemic."

Both the Food and Drug Administration and an independent scientific safety review group formed by California and comprised of experts from California, Washington, Oregon, and Nevada have found the vaccine to be safe and effective.

"The rollout of COVID-19 vaccines to CalVet facilities across the state demonstrates our continued commitment to the health of those who have given so much in service to our country," said David Casey, Chief Diversity Officer for CVS Health and Gulf War Veteran. "We're grateful for our partnership with CalVet and for our health care professionals who will be deployed throughout California to bring peace of mind to the state's Veteran Homes residents, staff, and their loved ones."

Due to limited availability, the vaccine is being given first to CalVet health care workers and residents in

skilled nursing, the first two groups prioritized in the state's guidelines for distribution. As vaccine supplies increase over the next few weeks, CalVet will provide the vaccine to additional prioritized residents in the Veterans Homes.

"Despite this positive news, the pandemic is far from over," said Secretary Imbasciani. "The vaccine requires two doses for full efficacy, and it could take months before enough of the state's population has received them to reach the safe threshold of community immunity."

Even after vaccines have been made available to all employees and residents of each CalVet Home, the Homes will continue to follow strict infectious disease control protocols and conduct regular testing to ensure the safety of residents and staff. Each Home will also work with county public health officials to determine how and when to adjust policies for visitations and social activities.

Veterans-For-Change Web Site

The Veterans-For-Change website has been around since 2009. The looks pretty much stay the same for now, but in the background our new webmaster has been working on a whole new look and feel, a facelift so-to-speak.

Constant improvement and change are being done to make our website the most user friendly “**One-Stop-Shop**” website to find almost everything you might have tried to find searching the internet.

Almost a hundred people have been involved; collecting web links to documents now houses on the VFC website, collecting thousands of web links for various issues, illnesses and benefits. Creating forums for all eras of service and two forums one just for men and one just for woman where you can go question, comment, share medical and personal concerns, what ever you'd like it to be.

We also have a forum with for Mental Health and are currently seeking a new Licensed Mental Health Worker, where you can seek help or just ask questions.

We average **1,884** hits per day, and downloads average **2,637** per day with a total **7,001,819** visitors as of Saturday morning.

If you subscribe you will have full access to the entire website and best of all it's **FREE of charge!** You just need a valid E-mail address so the system can notify us and once we approve the system will send you a confirmation E-Mail.

VA launches single access point to all VA contact centers

The U.S. Department of Veterans Affairs (VA)

announced today, the formal launch of 1-800-MyVA411 (1-800-698-2411), a single access point to all VA contact centers.

The number is available 24 hours-a-day, 365 days-a-year to serve Veterans, their families, caregivers and survivors. According to VA, 1-800-MyVA411 provides easy access to specialized contact centers as well as an option to immediately talk to a live agent.

Responding to Veteran feedback on the challenges of knowing the right number for VA assistance, 1-800-MyVA411, serves all members of the Veteran community seeking information or help.

Veterans and their families can still reach the Veterans Crisis Line directly at 1-800-273-8255 and pressing 1, by [Chat](#) or by texting 838255. The White House VA Hotline is also still available at 1-855-948-2311 for Veterans and their families to share compliments and concerns.

When dialing 1-800-MyVA411, callers have the option of pressing 0 to be immediately connected with a customer service agent to answer questions or provide a warm-handoff to the appropriate VA expert.

During the pilot phase from Oct. 1, 2019-Sep. 31, 1-800-MyVA411 connected more than 1.3 million callers

with VA contact centers and experts.

1-800-MyVA411 provides information on:

- COVID-19 updates.
- Health care eligibility and enrollment.
- VA benefits, such as disability, compensation and pension, education programs, caregiver support, insurance, home loans, and burial headstones and markers among others.
- The nearest VA medical centers, benefits offices or cemeteries to Veterans, VA Medical Center operational updates and connection to VA Medical Center operators.
- Directory assistance and technical support for www.VA.gov.
- Debt and payment options.

For more information contact the Veterans Experience Office at Vets-Experience@VA.gov

Tax & Credit Information

1. Treasury and IRS begin delivering second round of Economic Impact Payments to millions of Americans
2. IRS issues standard mileage rates for 2021
3. Year-end reminder: Expanded tax benefits help individuals and businesses give to charity during 2020
4. How people can give back by becoming an IRS-certified volunteer

SOUND OFF!
SHARE YOUR STORIES AND COMMENTS WITH US:

We know most Veterans have had issues both current and in the past with the Veterans Affairs, and we'd really like to hear from you!

So now is your chance to voice your concerns, opinions, problems, compliments, advice, etc., anything you'd like to have heard.

We will be creating another category in the "NEWS" section of the website called "SOUND OFF" and

instead of us continually sending this type of information in fax blasts to all 535 members of Congress, we will be adding to the website as we know many members of Congress do watch us, and this makes it a lot easier for us to track the number of people reading the issues.

In addition, it might even open the door for your fellow Veteran's to see they're not alone, and they too might voice their concerns.

Your story can be as long or as short as you'd like to express what you have to say, we can post as anonymous, or if you want we can post your name to the article, just tell us how you would like for us to post your story and we will adhere to your request.

We only ask that you keep it clean from foul language, and we will edit only to correct grammar, and if need be to edit out any foul language as that is an almost immediate cut off from Congress to pay attention.

Send your story to JIM.DAVIS@VETERANS-FOR-CHANGE.org and we will get it posted as quickly as we can. And if you have a title for your story that would be fantastic, as we will be providing the story title and link to Congress.
