Appendix A - Strategic Capital Investment Planning Process Decision Model

Page Intentionally Left Blank.

Appendix B – Strategic Capital Investment Planning Process Decision Criteria

Improve Safety and Security: VA is dedicated to ensuring its Clients (Veterans) and Customers (VA Staff) are being served and/or work in a safe and secure environment. Mitigating the destruction and injury caused by natural or manmade disasters (including seismic, hurricane, flooding, blast, etc.); improving compliance with safety and security laws, building codes, and regulations; and ensuring VA mission critical buildings are able to provide service in the wake of a catastrophic event, are of paramount importance.

Fixing What We Have (making the most of current infrastructure/extending useful life): VA is committed to managing its buildings in order minimize the extent to which deficiencies in infrastructure (including IT infrastructure) and other area impact the delivery of benefits and services to Veterans. For infrastructure deficiencies, facility condition assessments (FCA) evaluate the condition of VA buildings using scores A through F. Mitigating other deficiencies (such as functional deficiencies and privacy deficiencies) also has a positive impact on the delivery of benefits and services.

Increasing Access: Serving Veterans is at the core of VA’s mission. We strive to increase access for Veterans (our Clients) by reducing the time and distance a Veteran must travel to receive the best quality services and benefits; providing adequate supporting structures at VA facilities, such as parking and gravesite locators; by increasing our ability to handle workload; and by enabling VA staff (our Customers) to work efficiently.

Right-Sizing Inventory: In order to provide the highest quality service to Veterans at the right time and in the right place, VA is managing its space inventory by building new space, converting underutilized space to better suit its mission, and by reducing excess space.

Ensure Value of Investment: As a steward of the public’s trust VA is responsible for making capital investments in the most cost-effective way possible by ensuring new capital investments optimize operating and maintenance costs, in order to create the best value.

Major Initiatives: For improved management and performance across the Department, capital projects should contribute to key major and supporting initiatives from the Department’s strategic plan, including DoD collaboration and complying with energy standards established in law and Executive Orders.

Page Intentionally Left Blank.

**Appendix C - FY 2011 Minor Construction Projects
(Sorted by State, by City)**

Admin	VISN/ MSN/ Region/ SO	City	State	Project Title/Brief Description	Total Estimated Cost	FY 2011 Planned Obligation
NCA	5	Sitka	AK	Construct Columbaria, Erosion Control, Sidewalks	2,245,000	1,360,000

Appendix F - Department's Approved Priority Enhanced-Use Lease Projects

Project Site	Project Type	Project Description	Status
Albuquerque, NM	Assisted Living	Lease for assisted living for spinal cord injury patients; Affordable temporary lodging accommodations for out-of- town/state patients; Alzheimer's patients care center.	Project pending environmental review by Department of the Air Force
Bath, NY	Assisted Living	Lease 50 acres of land for an Assisted Living facility.	Initial EUL site was not feasible for EUL development. Evaluating alternate EUL site
Battle Creek, MI	Laundry	Lease to reduce laundry costs.	On hold - Laundry Board seeking funds for building and equipment upgrades
Viera, Florida Brevard County	Assisted Living	Lease of donated land to establish an assisted living housing complex.	Project pending HUD financing and Lease Execution
Butler, PA	Hospital	Demolition of old hospital and support buildings. Construction of new hospital, cancer center, and medical office buildings.	On hold
Canandaigua, NY	Homeless Housing	Proposes to outlease Building 14 consisting of approximately 23,000 square feet and 1.9 acres of underutilized land for development of homeless housing for Veterans.	Developer pending financing, EUL execution expected 2011
Dayton, OH	Senior Housing	About 55 beds of single occupancy low-income housing.	Developer seeking approval of HUD financing
Hines, IL	School of Nursing and Research with Loyola	Create clinical teaching facility with the Loyola School of Nursing and Research in existing Building 51.	On hold
Houston, TX	Clinical/ Ambulatory Space	Lease to develop clinical and ambulatory space to meet needs of Veterans.	Project being re-evaluated. Developer withdrew interest
Knoxville, IA	Re-use of Campus	Lease for entire 163 acre campus. Knoxville's operations have largely been moved to Des Moines.	RFP issued Dec 2010; closes Feb 15, 2011
Lebanon, PA	Golf Course	Lease to township to reduce VA costs by providing golf therapy to patients.	On hold
Lincoln, NE	Outpatient Clinic	Outpatient clinic to meet all the existing and future workload projected for the Lincoln facility.	Pending responses to RFP

Project Site	Project Type	Project Description	Status
Los Angeles, CA	VHA/VBA Collocation	VBA will exit leased space to collocate at VHA space to better provide one-stop services to Veterans.	On hold
Manhattan, NY	Proton Therapy Center	Multi-gantry radiation therapy center.	Added to Department's List August 2010
Marion, IL	Hotel	Lease to increase access to on site hotel for Veterans and families.	On hold
Marion, IN	Senior Housing	Lease to create low income housing for senior and Veterans.	Project pending reassessment
Memphis, TN	Parking	Lease to develop .69 acres of VA property for a shared parking garage facility.	Pending Phase II Environmental Study
Memphis, TN	Parking II	Lease to develop approximately four acres of underutilize land to construct a 600 space parking garage on the VAMC campus.	Pending Phase II Environmental Study
Milwaukee, WI	Mixed Use	Proposed EUL for assisted living, retail, and entertainment development.	Project pending Developer financing
Montrose, NY	Assisted Living	Lease to develop senior housing, assisted living and mixed use development to reduce maintenance and repair costs to VA.	Pending Developer
Nashville, TN	Research	Lease to Vanderbilt University to provide research facilities to VA.	On hold
Newington, CT	Assisted Living	Lease to develop assisted living facility.	On hold, expect continuation of project in March 2011
Northampton, MA	Park and Ride Lot	Lease to upgrade 1 acre gravel lot for park and ride.	On hold
Northampton, MA	Homeless Housing	Lease to develop homeless housing facility on 13 acre parcel of land.	Pending Public Hearing, tentatively scheduled for late February. 2011
Northport, NY	Assisted Living	Lease to outlease 20.67 acres of underutilized land to develop an assisted living facility.	Pending responses to RFP
Palo Alto, CA	Research	Lease to construct a 250,000 GSF research center. This center would bring world-class cutting edge translational research programs to Stanford University and VA.	On hold
Perry Point, MD	Affordable Housing	Lease to outlease approximately 29 acres for a 60-unit affordable housing development for low income and homeless Veterans and their families.	Third Public Hearing scheduled

Project Site	Project Type	Project Description	Status
Riverside, CA	Transitional Housing	Lease to construct at least 118 beds transitional housing for homeless Veterans.	Project on hold
Riverside, CA	Recycled Water Supply & Stormwater detention facilities	Lease for water supply and the development of stormwater detention facilities on national cemetery property. Extensive irrigation requirements will be provided by the developer in exchange for the use of 40 acres of cemetery land for stormwater detention facilities including a pond.	Developer selected, negotiations underway
Sacramento, CA	Assisted Living	Lease to construct long term care facility with Veterans priority placement.	Negotiations ongoing with preferred developer
Saint Louis, MO	Parking	Public/private partnership to build nine-level parking deck. VA patients, visitors, employees get free parking for duration of lease.	Negotiations on development terms underway
Salt Lake City, UT	Transitional Housing for Homeless Veterans	Lease with the Salt Lake City Housing Authority to establish a new 72-bed transitional housing program. The new 72-bed facility will replace the existing 61-shared bed Valor House facility, currently located on the Salt Lake City VAMC campus in building 3. The proposed new 72-bed unit will be located on the southwest side of the VAMC encompassing one (1) acre of existing VA property.	NOIE was signed on 11/10/10. Pending SHPO concurrence and FONSI
San Francisco, CA	Research	Lease to Northern California Institute for Research and Education (NCIRE) to develop a new research facility on the VAMC campus.	On hold
St. Albans, NY	Mixed Use	In conjunction with the Secretary's CARES decision for the capital plan (BPO #4), the potential enhanced use lease project could include a continuing care retirement community with active senior living apartments, independent living, assisted living, Alzheimer's, skilled nursing units and hospice., small retail and restaurants may be added as mixed use support.	Draft development plan received December 31, 2010

Project Site	Project Type	Project Description	Status
Syracuse, NY	Research	Lease to the State University of New York's (SUNY) Upstate Medical University and College of Environmental Science and Forestry to develop a Biotechnology Research Center.	On hold
Walla Walla, WA	Mixed Use	To perform, in conjunction with the Secretary's CARES decision of July 7, 2006, a comprehensive reuse study to determine reuse potential in-line with VA's mission of the site and move forward with their implementation.	On hold
Washington, DC	Mixed Use	Lease of 5.63 acres of underutilized land, by developing primary care building, ambulatory, research, and parking to result in decreased operational and fee medical costs and increased access to scarce medical specialty services.	On hold
White City, OR	Community College	Lease to create a VA/Community college partnership providing training through tuition vouchers for Veterans and VA staff.	Project pending development plan
Vancouver/ (Portland), WA	Homeless Transitional Housing	EUL to develop 25 to 40 unites of "Green" or Homeless Sustainable Housing.	On hold
National	CARES	Potential to outlease underutilized land and/or buildings for development.	
National	Co-generation	Potential for cost avoidance via national co-generation plan.	
National	Consolidated Mail Out Pharmacy (CMOP)	Potential for reducing cost for VA pharmaceuticals via utilization of CMOPs.	
National	Homeless Housing	Potential to outlease underutilized land and/or buildings for development of highest and best mixed use and homeless housing for Veterans.	
National	Mixed-Use	Potential to outlease underutilized land and/or buildings for developments of highest and best mixed use and homeless housing for Veterans.

¹Alameda Point, CA total estimated cost includes \$2 million in non-construction costs for niche covers from the Compensation and Pensions appropriation.

²Atlanta, GA, 2005 Actual amount reflects the 2005 Recission.

³Biloxi, MS, received \$17.5 million in regular appropriations and another \$292.5 million in emergency supplemental appropriation from P.L. 109-148 in 2006. \$6 million was transferred to the Filipino Veterans Compensation Fund in 2010 per P.L. 111-212.

⁴Denver, CO, received \$25 million in a reprogramming action in 2006.

⁵Des Moines, IA, received \$750,000 in a reprogramming action in 2007.

⁶Additional funding was received in the 2008 Omnibus Appropriation, P.L. 110-161 for: Fayetteville, AR; Gainesville, FL; Orlando, FL (Status of project as of January 15, 2011); Palo Alto, CA Seismic Building 2; and Pittsburgh, PA.

⁷Fayetteville, AR, \$2.4 million were transferred to the Filipino Veterans Compensation Fund in 2010 per P.L. 111-212. Status of project is as of January 15, 2011.

⁸Gainesville, FL, \$7.7 million was reprogrammed to Syracuse, NY in 2009. \$14.8 million were reprogrammed from this project in 2010: \$11.7 million to Long Beach, CA Seismic Buildings 7 & 126 and \$3.1 million to the San Juan, PR Seismic Corrections project from 1999, which is not represented on this History table. Status of project is as of January 15, 2011.

⁹Las Vegas, NV \$6.9 million were transferred to the Filipino Veterans Compensation Fund in 2010 per P.L. 111-212. Status of project is as of January 15, 2011.

¹⁰Lee County, FL, received \$4 million in reprogramming action in 2006. \$42 million were transferred to the Filipino Veterans Compensation Fund in 2010 per P.L. 111-212. Status of project is as of January 15, 2011.

¹¹Long Beach, CA, in 2010 \$11.7 million in bid savings were reprogrammed from Gainesville, FL.

¹²Milwaukee, WI, \$3 million were transferred to the Filipino Veterans Compensation Fund in 2010 per P.L. 111-212. Status of project is as of January 15, 2011.

¹³Minneapolis, MN, \$62 thousand were reprogrammed to the working reserve in 2010.

¹⁴New Orleans, LA, was funded through two emergency supplemental appropriations: \$75 million from P.L. 109-148 and another \$550 million from P.L. 109-234.

¹⁵North Chicago, IL, in 2009 \$1.219 million was transferred to the Major Working Reserve.

¹⁶Palo Alto, CA, Ambulatory Care/Polytrauma Rehab and Tampa, FL, Polytrauma/Bed Tower projects received funding in the 2008 emergency supplemental, P.L. 110-252.

¹⁷San Antonio, TX, Polytrauma Center received \$66 million in reprogramming action in 2008. The project was required by P.L. 110-161.

¹⁸San Juan, PR, \$4 million was reprogrammed from this project in 2006 in a reprogramming action.

¹⁹St. Louis (JB), MO, the 2012 request is to fund the VHA portion of the project, which is in the Construction Documents phase. The status is listed as the Construction phase here to represent the NCA portion of the project.

²⁰Syracuse, NY, received \$7.7 million in a reprogramming action in 2009 from the Gainesville, FL project. In 2010 \$2 million was reprogrammed from the Major Working Reserve.

²¹Tampa, FL, SCI Expansion received \$4.36 million in a reprogramming action in 2006.

²²Temple, TX, received \$56 million in 2005. In 2008 a planning decision about the future of the Waco, TX, facility diminished the need for major construction activities at Temple and \$45 million was reprogrammed from the project. The remaining \$10.55 million will construct an IT facility.

²³Tucson, AZ, received \$1.2 million in a reprogramming action in 2006. In 2009 the project was completed under budget with a total estimated cost of \$13.028M. The remaining \$272 thousand were transferred to the Working Reserve.

²⁴West Los Angeles, CA Seismic Retrofit of 12 Buildings, \$20 million will be made available in 2012 from prior year funds in order to complete the renovations of Building 209 to house homeless programs.

Status of Funded VHA Major Construction Projects

Since 2004 (the completion of CARES studies) 58 major construction projects have been funded either for design or for both design and construction to make improvements in the Veterans health system's infrastructure. Seventeen of these projects have been completed and 22 are under construction with seven of these expected to be completed by the end of 2011. Fifteen projects are in the design phase, three projects are in the planning phase, and one was canceled.

The following provides descriptions of the projects listed in the preceding table.

Project Location	Alameda Point, CA
Planned Project Name	Outpatient Clinic and Columbarium
Fiscal Year	2011
BA Requested (\$000)	\$17,332
Total Acquisition Cost (\$000)	\$208,600
Asset Type	Major Construction
Status	Plan

This project requested \$17.33M in 2011 budget authority to begin project planning with a total estimated cost of \$208.6M, of which \$2M in non-construction cost for niche covers is requested in the Compensation and Pension appropriation. This project will construct an Outpatient Clinic (OPC), a Columbarium, administrative space for NCA and VBA and all associated parking on BRAC property at Alameda Point (former Naval Air Station) in Northern Alameda County. VA plans to pursue acquiring the land for this project through a no cost land transfer from the Department of Defense. This project will also construct a US Air Force satellite Primary Care Clinic and a jointly staffed VA/DoD Joint Ambulatory Surgical Center. This new, state-of-the-art OPC and administrative space will be approximately 150,000 GSF and provide Primary Care, Specialty Care, Ancillary Services, Mental Health, Substance Abuse, and Ambulatory Surgery.

Project Location	American Lake, WA
Planned Project Name	Seismic Corrections Building 81
Fiscal Year	2009
BA Received (\$000)	\$5,260
Total Acquisition Cost (\$000)	\$52,600
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$5.26M in 2009 budget authority to begin design, with a total estimated cost of approximately \$52.6M. This project at the American Lake Division of VA Puget Sound Health Care System (VAPSHCS) is twofold. First, new construction of a 70,000 GSF modern outpatient medical facility will replace the existing main hospital built in a historical architectural set which is not

conducive to modern health care delivery standards. Second, the VA will mothball the five floors of the original main sections of Bldg 81, which was built in 1947 leaving the more recently constructed “additions” operational.

This project specifically mitigates numerous seismic deficiencies and structural damage to the existing 93,747 GSF of a five story (with basement) concrete frame main hospital, Bldg 81, with unreinforced concrete masonry infill walls that was built in 1947. The current building poses a life-safety threat to patients and staff without extensive seismic retrofit.

Project Location	American Lake, WA
Planned Project Name	Seismic Corrections, NHCU & Dietetics
Fiscal Year	2007
BA Received(\$000)	\$38,220
Total Acquisition Cost (\$000)	\$38,220
Asset Type	Major Construction
Status	Physically Complete

This project received \$38.22M in 2007 budget authority to complete construction. This project will construct a one story, 83-bed Nursing Home Care Unit (NHCU) with Alzheimer Ward, Dietetics and other associated support functions. The project is intended to improve patient and staff safety by correcting seismic, fire and life safety deficiencies. At the present time, the NHCU and its support functions are housed in buildings first constructed in 1923.

Building 2 contains the NHCU and Building 3 contains the Food Service kitchen that serves the nursing units. These buildings rank on the list of seismically extremely high risk buildings. If VA determines the cook-chill system (where you cook then freeze food immediately) works for patients at the site of construction, they will be able to send the carts of the cook-chill system to the Seattle Campuses, on a daily basis. This will be done for effectiveness. The project would also remove an existing high risk (seismic) from the VA inventory.

Project Location	Anchorage (Elmendorf AFB), AK	
Planned Project Name	Outpatient Clinic and Regional Office	
Fiscal Year	2004	2006
BA Received(\$000)	\$11,755	\$63,510
Total Acquisition Cost (\$000)	\$75,265	
Asset Type	Major Construction	
Status	Physically Complete	

This project received \$11.76M in 2004 for design and an additional \$63.51M in 2006 to complete construction, with a total estimated cost of approximately \$75.265M. This project had a total estimated cost of approximately \$75.27M. This project was to construct a new Outpatient Clinic and Regional Office building adjacent to the Elmendorf Air Force Base Medical Center - a joint VA and Air

Force facility. This new building will replace the current 82,000 gross square foot (gsf) leased facility for the Alaska VA Healthcare Clinic and Regional Office with a new building of approximately 169,000 gsf. The lease expired in 2007. This project integrated several VA functions with existing Air Force functions located at the adjacent hospital, thus reducing the overall construction size from 184,000 gsf to approximately 169,000 gsf. The new facility will provide space in a building adjacent to the current Air Force/VA hospital for collocation of medical and benefits services presently housed in leased space.

Project Location	Atlanta, GA	
Planned Project Name	Modernize Patient Wards	
Fiscal Year	2005	2009
BA Received(\$000)	\$20,534	\$4,000
Total Acquisition Cost (\$000)	\$24,534	
Asset Type	Major Construction	
Status	Construction	

This project received \$20.534M in 2005 budget authority and an additional \$4M in 2009 budget authority, for a total estimated cost of approximately \$24.534M. This project directly supports the VISN 7 marketing plan by renovating existing medical inpatient wards that are below community standards. Improvements include the renovation of approximately 40,000 gross square feet on 2 inpatient floors (7th and 8th) and 20,000 gross square feet on the 10th floor to meet American with Disabilities Act (ADA) accessibility requirements, meet women veterans' needs, correct patient privacy issues, and improve staff efficiencies with improved functional layout. Work will also address infrastructure improvements to utility systems by resolving outstanding deficiencies. These deficiencies include HVAC, plumbing, electrical and fire and safety concerns on these inpatient floors. This project will also include the addition of two elevators in the main building. In addition, this project will also promote the One VA concept by improving access, through the construction of a connecting bridge, for veterans traveling between the VBA Regional Office Building and the VA Medical Center.

Project Location	Bay Pines, FL		
Planned Project Name	Inpatient/Outpatient Improvements		
Fiscal Year	2009	2010	2012
BA Received/Requested (\$000)	\$17,430	\$96,800	\$43,970
Total Acquisition Cost (\$000)	\$158,200		
Asset Type	Major Construction		
Status	Construction Documents		

This project received \$17.43M in 2009 budget authority to begin design, an additional \$96.8M in 2010 to continue the mental health addition, and requests \$43.97M in 2012 budget authority to complete the project, with a total estimated

cost of approximately \$158.2M. This project will construct a multi-story addition to Bay Pines Main Hospital (Building 100), resolving both inpatient psychiatric deficiencies and space gaps in outpatient mental health. This project will construct an outpatient mental health center of excellence and inpatient psychiatric and geriatric psychiatric bed wards. After the existing psychiatric wards in Building 1 are relocated to the new addition, administrative functions currently located in Building 100 will be relocated to Building 1, creating room for an additional outpatient services on the ground level. This project also includes partial renovations to two medical/surgical wards in Building 100; partial renovation to floors two through five in the historic Building 1; and renovation to one wing of Building 102 (Domiciliary).

Project Location	Biloxi, MS
Planned Project Name	Restoration of Hospital/Consolidation of Gulfport
Fiscal Year	2006 2010
BA Received(\$000)	\$310,000 (\$6,000)
Total Acquisition Cost (\$000)	\$304,000
Asset Type	Major Construction
Status	Construction

This project received \$17.5M in 2006 budget authority, an additional \$292.5M in budget authority in Public Law 109-148 the 2006 Emergency Supplemental, and \$6M in bid savings were transferred to the Filipino Veterans Compensation Fund in 2010, for an estimated total estimated cost of approximately \$304M. This project will restore the hospital at Biloxi as a result of damage from Hurricane Katrina and consolidate and co-locate all clinical and administrative functions of a two-division medical center at the Biloxi VAMC campus. On May 7, 2004 the VA Secretary announced the Capital Asset and Realignment to Enhance Services (CARES) plan, included in this plan is the closure of the VAGCVHCS Gulfport campus and the need to build a new Blind Rehabilitation Center on the VAGCVHCS Biloxi campus. This project supports these two major initiatives. This consolidation aligns itself with congressional top priority for VA construction due to the closure of the Gulfport division (campus) and achieves the objectives to realign and decrease the amount of infrastructure maintained and operated by VA by 383,868 gross square feet at Gulfport.

This project will construct a new Mental Health/Clinical Addition, a new nursing home care building, a new gymnasium, an administrative building, a new police and security building, storage and CWT buildings, and various renovations to existing patient care buildings in Biloxi. This project replaces the direct-care programs at Gulfport and consolidates all services at Biloxi. This project will also accelerate the consolidation and other repairs necessitated by the damage done by Hurricane Katrina.

Project Location	Brockton, MA
Planned Project Name	Long-Term Care Spinal Cord Injury
Fiscal Year	2010
BA Received (\$000)	\$24,040
Total Acquisition Cost (\$000)	\$188,000
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$24.04M in 2010 budget authority to begin design, with a total estimated cost of approximately \$188M. This project supports the construction of a new 104 bed Long Term Care Spinal Cord Injury unit and associated clinical and administrative support spaces. The new inpatient SCI unit will be located on a vacant parcel between Buildings 7 and 8. Upon completion of the SCI Building, the existing 60 bed Long Term SCI facility, Building 8, will be renovated to house mission growth for mental health services to mitigate the current mental health space deficiency.

Project Location	Bronx, NY
Planned Project Name	Spinal Cord Injury
Fiscal Year	2009
BA Received (\$000)	\$8,179
Total Acquisition Cost (\$000)	\$225,900
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$8.18M in 2009 budget authority to begin design, with a total estimated cost of approximately \$225.9M. This project will establish spinal cord injury/disease center for VISN 3. It will construct a two story structure plus lower level in approximately 121,274 square feet, with 92 beds, outpatient clinic and administrative space. A connection to the main facility would be required and is planned to occur at each level of the new structure. The new SCI center will have a separate street level entrance and dedicated parking.

Project Location	Canandaigua, NY
Planned Project Name	Construction and Renovation
Fiscal Year	2010
BA Received (\$000)	\$36,580
Total Acquisition Cost (\$000)	\$370,100
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$36.58M in 2010 budget authority to begin design, with a total estimated cost of approximately \$370.1M. The project will demolish buildings to allow for the new construction of a new 120-bed community living center (CLC), which will include geropsychiatric services and hospice care.

This project also constructs or renovates a new 50-bed domiciliary/residential rehabilitation facility. Finally, this project renovates Buildings 1, 2, 3, 4, and 9 for outpatient services, behavioral health services and logistic/administrative support departments. Outpatient functions will be housed in Buildings 1 and 2. Building 9 currently contains the domiciliary and will be renovated to provide behavioral health services and other administrative/logistical support functions.

Project Location	Chicago, IL
Planned Project Name	Bed Tower (Modernize Inpatient Space)
Fiscal Year	2004
BA Received(\$000)	\$98,499
Total Acquisition Cost (\$000)	\$98,499
Asset Type	Major Construction
Status	Physically Complete

This project received \$98.5M in 2004 budget authority. This project consolidated the two-inpatient sites of care, Lakeside, and West Side that are located in 50-year old facilities approximately five miles apart. Construction included a new bed tower to house all inpatient beds and operating rooms, at the West Side Division. The building is connected to Building 1, the existing hospital where ancillary support and diagnostic functions will remain. Building 1 renovations provided consolidated inpatient support services. The VISN 12 study for veterans health care needs for 2010 and beyond determined that two separate inpatient care units so close to one another represented unnecessary duplication of services and that significant operating inefficiencies could be eliminated and cost savings achieved by consolidating inpatient care at a single site. This project will reduce operating costs for services and supplies. In addition, there will be improved patient satisfaction by providing veteran patients with a level of care that meets or exceeds community standards and cannot be provided in two separate 50-year old facilities.

Project Location	Cleveland, OH
Planned Project Name	Cleveland-Brecksville Consolidation
Fiscal Year	2004 2006
BA Received(\$000)	\$15,000 \$87,300
Total Acquisition Cost (\$000)	\$102,300
Asset Type	Major Construction
Status	Construction

This project received \$15M in 2004 budget authority for design and \$87.3M in 2006 budget authority to complete the project, for total estimated cost of \$102.3M. This project will consolidate and co-locate all clinical and administrative functions of a two division medical center at the Wade Park VAMC. This consolidation aligns itself as a top priority for construction due to the closure of

the Brecksville VAMC and achieves the objective to realign and decrease the amount of infrastructure maintained and operated by VA by 931,454 gross square feet. This project will require new construction of 268,546 gross square feet at the Wade Park VAMC. The scope of this project includes additional chillers, emergency generators, and boilers as well as the associated incoming utility connection for the new space. Space efficiencies are gained in several ways for the aforementioned items that do not require the new construction of space: 1) there is existing space in the penthouse of the Wade Park VAMC that can accommodate the new chillers and (2) the current energy center is expandable by 1,800 square feet. This project requires the enhanced-use lease of 102 acres at the Brecksville VAMC in exchange for property adjacent to the Wade Park VAMC. Under the enhance-use lease agreement, the lessor will construct a 120-bed domiciliary, a 1,200 space parking garage, and administrative space adjacent to the Wade Park VAMC that will provide the additional infrastructure needed for the consolidation of the Brecksville VAMC at the Wade Park VAMC. The consolidation at the Wade Park Division of the Louis Stokes Cleveland VAMC will allow for the complete vacancy and closure of the Brecksville VAMC. The cost savings of this project are anticipated to exceed \$23 million annually and the quality of clinical care will be significantly enhanced to the more than 80,000 veterans that receive care at these medical centers annually. Additionally, there is the potential consolidation of VHA and VBA that will promote a One VA through efficient processing of VBA claims requiring medical support from VHA for the more than 500,000 veterans residing in Northern Ohio.

Project Location	Columbia, MO
Planned Project Name	Operating Suite Replacement
Fiscal Year	2007
BA Received(\$000)	\$25,830
Total Acquisition Cost (\$000)	\$25,830
Asset Type	Major Construction
Status	Construction

This project received \$25.83M in 2007 budget authority to complete construction. This project will construct 27,000 square feet for replacement of the Operating Room (OR) Suite and renovate 10,000 square feet of space for surgical support. The new space will consist of 2 general OR rooms, 3 Special OR rooms, clean and soiled work areas, equipment storage, clean supply storage, ambulatory surgery, and the necessary scrub areas. The renovated space for support functions will consist of the post anesthetic care unit (PACU), pre-op prep room, pre-op holding area, cystology area, and staff locker / restroom facilities. The project will correct infrastructure deficiencies with the electrical and HVAC systems identified in the Facility Condition Assessment. The project will correct all space deficiencies which are 50% below recommended criteria. Functional deficiencies will be corrected as well, allowing increased efficiencies with OR room

turnaround and increased operator utilization. Gaps in the surgical clinic stops associated with the project are projected to be at 90% in FY 2012 and 65% in FY 2022. It is expected that turnaround time for the OR rooms can be reduced from the current duration of 45 minutes to 25 minutes through proper layout and storage areas. This will allow increased utilization of the OR rooms and a reduction in the projected gap. The current OR facilities are below community standards with a cramped, open PACU that does not provide adequate patient privacy; this project will correct that. The Columbia VA is cardiac referral center for VISN 15. As a highly affiliated teaching hospital, this project will provide state-of-the-art surgical facilities in lieu of the marginally acceptable facilities that currently exist.

Project Location	Columbus, OH
Planned Project Name	Outpatient Clinic
Fiscal Year	2004
BA Received(\$000)	\$94,689
Total Acquisition Cost (\$000)	\$94,689
Asset Type	Major Construction
Status	Physically Complete

This project received \$94.8M in 2004 budget authority. This project relocated and replaced the existing 118,000 square feet Chalmers P. Wylie Outpatient Clinic to the Defense Supply Center, Columbus (DSCC), with new construction of 295,000 square feet on a 20-acre parcel of land on the west side of the base. The old Columbus Outpatient clinic was designed to support 135,000 annual visits, however greater than 208,000 visits were accomplished during FY 2003. The replacement facility will significantly reduce the need for veteran travel to other Network 10 VA's for ambulatory specialty and same-day surgical care, significantly improve continuity of care, increase parking from 470 to a projected 1,000 parking spaces and address 85% of the identified Capacity Gaps for specialty, primary and ancillary care. Annual cost savings of \$1.5 million will be realized in lease expenses for the existing clinic and off site clinical/administrative space. Access to inpatient care will be improved by establishing a contract with a local health care system. The design for the VA replacement clinic includes plans for possible future expansion to add inpatient beds if patient care demands support in future years. The primary impact of the project is establishment of new/expanded specialty care services currently unavailable in Central Ohio.

Project Location	Dallas, TX
Planned Project Name	Clinical Expansion for Mental Health
Fiscal Year	2009
BA Received (\$000)	\$15,640
Total Acquisition Cost (\$000)	\$156,400
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$15.64M in 2009 budget authority to begin design and purchase land, with a total estimated cost of approximately \$156.4M. This project is an estimated 298,462 gross square feet of construction (271,434 GSF new and 27,028 GSF renovations). New construction is added to the main inpatient care structure, Building 2, to allow the expansion of mental health outpatient care and psychiatric inpatient services. Mental Health outpatient care, inpatient acute, SARRTP, PRRTTP and Domiciliary bed services are relocated and consolidated from several buildings across the campus an addition to Building 2. This project is replacing 131 substandard Mental Health/Domiciliary beds that are currently operating in Building 1, with 141 beds to be built in this project. The campus Energy Center (Building 70) will be enhanced and its capacity expanded to support the additional cooling and heating load of the clinical expansion. Structural tie-ins are constructed from the Mental Health addition to the parking garage and Building 72. A roadway access tunnel to Building 2 and 2J docks is constructed along with a covered entrance driveway to the Mental Health addition.

Project Location	Dallas, TX
Planned Project Name	Spinal Cord Injury
Fiscal Year	2009
BA Received (\$000)	\$8,900
Total Acquisition Cost (\$000)	\$89,000
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$8.9M in 2009 budget authority to begin design and purchase land, with a total estimated cost of approximately \$89M. This project includes the construction of a 30 bed long term care spinal cord unit and associated clinical and administrative support spaces. The SCI unit represents approximately 64,000 gross square feet of new construction. The footprint and associated buffer space for this unit may force the relocation/demolition of the following physical structures: Building 44, Warehouse; Temporary Buildings: T-1A/AFGE; T-48/Voluntary Service; T-47/Fiscal; T-46/VA Police, and T51/Human Resource. The 30 bed long term care SCI facility will be operationally integrated with the existing 30 bed acute SCI center at the Dallas

campus by way of a connecting corridor that is constructed by this project. Subsequently, additional modifications to the site are required and may be included in this project, such as: relocation of Recreation Service site functions (purchase of land required); construction of a new campus warehouse (50,000 gross square foot) at a new site adjacent to the laundry plant; renovation of an existing parking garage in the basement of Building 2 for administrative space; and construction of two parking garages to mitigate current parking shortages (purchase of land required).

Project Location	Denver, CO		
Planned Project Name	New Medical Facility		
Fiscal Year	2004-2010	2011	2012
BA Received/Requested	\$307,300	\$450,700	\$42,000
Total Acquisition Cost (\$000)	\$800,000		
Asset Type	Major Construction		
Status	Schematics/Design Development		

This project received \$30M in 2004 budget authority, \$25M in a reprogramming action in 2006, \$52M in 2007 budget authority for design, \$61.3M in 2008 budget authority, \$20M in 2009 budget authority, \$119M in 2010 budget authority, and requests \$450.7M in 2011 and \$42M in 2012 budget authority, with a total acquisition cost of approximately \$800M. This project provides the construction of a new 114 bed inpatient medical center, a 52 bed SCI/CLC, a central utility plant, a research building, and parking facilities on the same campus as the University of Colorado Hospital complex in Aurora, Colorado. In addition, this project includes the remodeling of the recently purchased University of Physicians, Inc. building, the disposal of the current medical center campus, and the addition of renewable energy initiatives as appropriate.

Project Location	Des Moines, IA	
Planned Project Name	Extended Care Building	
Fiscal Year	2005	2007
BA Received(\$000)	\$24,800	\$750
Total Acquisition Cost (\$000)	\$25,550	
Asset Type	Major Construction	
Status	Physically Complete	

This project received \$24.8M in 2005 budget authority and \$.75M in a reprogramming action in 2007, for a total estimated cost of approximately \$25.6M. This project constructed a new building of approximately 100,000 gross square feet for a 120-bed Nursing Home Care Unit (NHCU), 20-bed Rehabilitation Medicine Unit, 40-bed Domiciliary Unit, Administrative, Employee Education, Clinic and Support space at the Des Moines Division of the VA Central Iowa Health Care System. This project will result in the following outcomes: 1) Locate NHCU,

Rehabilitation Medicine, Behavioral Disorders (SMI) and Acute Psychiatric Care Services adjacent to acute Med/Surg Beds to enhance care delivery to increasingly medically complex extended care and rehabilitation cases. 2) Enhance veteran and family access to services by establishing high demand beds in the area of highest veteran population density in the state. 3) Replace badly deteriorating and aging infrastructure at the Knoxville division of VA Central Iowa with state of the art facilities at the Des Moines campus. 4) Achieve significant operational cost reduction over the life of the project. 5) Enhance staff education and research. 6) Consolidate all inpatient bed care services and other support functions at one location; and 7) allow divestiture of approximately 350,000 gross square feet of outdated infrastructure at the Knoxville Division.

Project Location	Durham, NC
Planned Project Name	Renovate Patient Wards
Fiscal Year	2004
BA Received (\$000)	\$9,100
Total Acquisition Cost (\$000)	\$9,100
Asset Type	Major Construction
Status	Physically Complete

This project received \$9.1M in 2004 budget authority. This project renovated approximately 46,000 gsf of existing space on Ward 7A, Wing 7C, Ward 6A, Wing 6C, Ward 9A, Wing 9C, Ward 5B and Wing 5C. This project renovated the last four of six outdated inpatient wards at the Durham VA Medical Center. Wards 7B and 6B were renovated via an approved 2004 Minor Construction Project. Each Ward that is renovated has 25 inpatient beds except for Ward 9A (Mental Health), which has 30 beds. Included in the renovation was the complete demolition of the interior walls, utilities, floor tile, doors and frames, hardware, etc. and rework of the air conditioning system. The reconfiguration of each ward layout corrected serious patient privacy and space deficiencies that have existed for many years. This allows for greater visibility by the nursing staff, larger patient rooms, and private or semi-private restrooms. An adequate number of private bathrooms were constructed to address the special needs of the female veteran. This project modernized outdated 1950's wards to updated, state of the art patient wards. The project addressed capacity gaps in Inpatient Medicine, Surgery, and Psychiatry.

Project Location	Fayetteville, AR		
Planned Project Name	Clinical Addition		
Fiscal Year	2006	2008	2010
BA Received (\$000)	\$5,800	\$87,200	(\$2,400)
Total Acquisition Cost (\$000)	\$90,600		
Asset Type	Major Construction		
Status	Construction		

This project received \$5.8M in 2006 and \$87.2M in 2008 budget authority, and \$2.4M were transferred to the Filipino Veterans Compensation Fund in 2010, for a total estimated cost of approximately \$90.6M. The project includes the construction of a clinical addition of approximately 160,000 square feet to correct the specialty gap of 168 percent, the ancillary gap of 112 percent, and ensure veterans have access according to VA's mandate for access to specialty care of 60 minutes drive time for urban and 90 minutes drive time for rural areas. Annual cost savings would be realized in the reduction of lease expenses for current off-site space.

Based on the space and functional survey, the total square feet at VAMC Fayetteville will accommodate approximately 25,600 unique veterans. The 2004 projected number of unique veterans was approximately 41,000. The current space and functional survey based on 2003 uniques reflects a gross square feet space deficit of 218,163 square feet. The total space deficit for specialty care and Ancillary care in 2022 is 179,729 square feet (37,018 sq ft ancillary and 142,711 sq ft specialty). At project completion, space will be available to meet the projected growth needs through 2022.

The clinical addition will help address the needs of the growing veteran population and provide a full continuum of patient-centered one-stop quality health care for primary and specialty care with supporting ancillary services. The clinical addition will add space, which will allow the enhancement of services that support both inpatient and outpatient care. Specialty services will be added or enhanced. Examples of ancillary services to be included are pharmacy, physical therapy and improved access to laboratory services.

Project Location	Gainesville, FL		
Planned Project Name	Correct Patient Privacy Deficiencies		
Fiscal Year	2004-2008	2009	2010
BA Received (\$000)	\$136,700	(\$7,700)	(\$14,800)
Total Acquisition Cost (\$000)	\$114,200		
Asset Type	Major Construction		
Status	Construction		

This project received \$8.8M in 2004, \$76.4M in 2006, and \$51.5M in 2008 budget authority, while reprogramming actions in 2009 and 2010 reduced available budget authority by \$7.7M and \$14.8M respectively, for a total estimated cost of approximately \$114.2M. The medical center, an acute care facility, was dedicated in 1967. The inpatient medical, surgical, and psychiatric wards are as originally constructed, consisting of mostly 5-bed rooms, with some 1, 2, and 3-bed rooms, and congregate baths. The inpatient wards are non-CARES functional score of 1.0, which indicates the inpatient wards are non-functional, with virtually no privacy standards being met. Accordingly, the inpatient wards are in non-compliance with the Health Insurance Portability and Accountability Act (HIPAA), Public Law 104-191. Several alternatives were explored and considered as means to increase the functional score. It was determined that the most viable alternative is an approximately 242,000 gross square feet (gsf) addition to the medical center. The addition will consist of four floors, plus a basement level, with connection corridors to the existing medical center. The addition will house 228 inpatient beds consisting of 120 medical beds, 60 surgical beds, 58 psychiatric beds, support space, and Veterans Benefits Administration (VBA) collocation. This project includes renovation of space to expansion of specialty care clinics consisting of Cardiology, Dermatology, Nephrology/Dialysis, Hematology, Otolaryngology, Audiology, Ophthalmology, Urology, Orthopedics, and Vascular Surgery. Construction of the new bed row addition will free up the existing inpatient ward space to partially address the 144,504 dgsf specialty care space gap identified by functional space survey data. Approximately 4,000 gsf of space is also being included in the new addition for collocation of VBA. The project will correct non-functional space, patient privacy deficiencies, handicap deficiencies, and code deficiencies that currently exist in the inpatient wards.

Project Location	Indianapolis, IN
Planned Project Name	7th & 8th Floor Ward Modernization Addition
Fiscal Year	2004
BA Received (\$000)	\$27,400
Total Acquisition Cost (\$000)	\$27,400
Asset Type	Major Construction
Status	Physically Complete

This project received \$27.4M in 2004 budget authority. This project corrected the multiple deficiencies that prevailed in the inpatient wards/bedrooms, 23-hour observation unit, and the inpatient pharmacy. Improvements include the addition of approximately 80,000 gross square feet of space on the 7th and 8th floor of the A-wing of Building 1, along with ancillary utility support. The project replaced all medicine, surgery, and intermediate beds. It provided 52 private and 22 semi-private rooms, negative and positive isolation rooms with the appropriate anterooms, a new inpatient pharmacy, new medical education space and other support space. Within the room allotment, the project replaced 11 beds and allocates an additional 12 beds for 23-hour observation, expanding specialty outpatient capacity. The design will provide the capability for patients to be dialyzed within each patient room providing an opportunity to increase the outpatient dialysis treatment capacity within the existing unit through the elimination of the need for inpatient treatment space. Additional educational space was added on each floor to support the teaching mission of this medical center. It will benefit medical residents, other trainees, and medical center staff by providing a place for learning, a forum for sharing information, and a location for digital capability for distance learning. These rooms will greatly improve the communication and treatment of the patients by providing space for didactic training and learning literally around the corner from the practical application of that training. Three vacated wards were designed and backfilled through this project for outpatient primary care and specialty care space. Design of the backfill occurred during the construction of the vertical addition with backfill beginning upon activation of the new inpatient space. This added 24,000 square feet of outpatient space, which was included as part of the VISN 11 plan for the Indiana market.

Project Location	Las Vegas, NV			
Planned Project Name	New Medical Facility			
Fiscal Year	2004	2006	2008	2010
BA Received (\$000)	\$60,000	\$199,000	\$341,400	(\$6,900)
Total Acquisition Cost (\$000)	\$593,500			
Asset Type	Major Construction			
Status	Construction			

This project received \$60M in 2004, \$199M in 2006, \$341.4M in 2008 budget authority to complete construction, and \$6.9M were transferred to the Filipino Veterans Compensation Fund in 2010, for a total estimated cost of approximately \$593.5M. This project will allow for construction of a comprehensive Medical Center Complex. The project would consist of up to 90 inpatient beds, a 120 bed Nursing Home Care Unit, Ambulatory Care Center, administrative and support functions and provide space for collocated Veterans Benefits Administration offices. The Medical Center Complex would provide a “One Stop Shopping” approach for the veteran whose health care needs cross the continuum of services including primary and specialty care, surgery, mental health, rehabilitation, geriatrics and extended care. The consolidation of clinical and administrative support will increase effectiveness, allow for the sharing of expertise and coordination across all levels of care, ensure patients are provided optimum care in the most appropriate setting. The proposed facility would be appropriately sized with approximately 838,000 square feet. The site for a new facility has been transferred to VA from the Bureau of Land Management, Department of the Interior.

In order to improve access, maximize flexibility and reduce cost, 50% of projected Primary Care and Mental Health workload has been removed from the space program and will be placed in multiple locations throughout the Las Vegas metropolitan area. This improves access to patients for Primary Care and allows for a scalable infrastructure to quickly adapt to anticipated changes in workload.

Project Location	Lee County, FL	
Planned Project Name	Outpatient Clinic	
Fiscal Year	2005-2009	2010
BA Received (\$000)	\$131,800	(\$42,000)
Total Acquisition Cost (\$000)	\$89,800	
Asset Type	Major Construction	
Status	Construction	

This project received \$6.498M in 2005 to acquire 30.53 acres, \$4M in a reprogramming action in 2006, \$9.89M in 2008 budget authority, \$111.412M in 2009 budget authority to design and subsequently construct a new 200,000 gsf

building, and \$42M were transferred to the Filipino Veterans Compensation Fund in 2010, for a total estimated cost of approximately \$89.8M. The new building will provide an Ambulatory Surgery/Outpatient Diagnostic Support Center in the Gulf, South-Submarket of VISN 8 to meet the increased demand for diagnostic procedures, ambulatory surgery, and specialty care (including mental health services), all of which are gaps identified during the (CARES) study.

Project Location	Livermore, CA
Planned Project Name	Realignment and Closure
Fiscal Year	2010
BA Received (\$000)	\$55,430
Total Acquisition Cost (\$000)	\$354,300
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$55.43M in 2010 budget authority to begin design and acquire land, with a total estimated cost of approximately \$354.3M. This project includes the construction of a new East Bay Community Based Outpatient Clinic (CBOC), an Expanded Central Valley CBOC, a new 120-bed CLC and then a Specialty Procedure Center at the Palo Alto VAMC for the consolidation of specialized services. Subsequent to this, this project will support the redevelopment of the current 113-acre Livermore VAMC campus under VA's enhanced-use leasing (EUL) authority.

At the East Bay CBOC, VA will acquire a parcel of land in southern Alameda County and construct a CBOC. Landscape, parking and other exterior revisions associated with utility feeds, cabling and site work is included within the scope of this project.

At the Central Valley CBOC, VA will acquire a parcel of land in the Central Valley and construct a CBOC and a 120-bed community living center (CLC). Landscape, parking and other exterior revisions associated with utility feeds, cabling and site work is included within the scope of this project.

At the Palo Alto Procedure Center, VA will renovate the Palo Alto VAMC tertiary care campus to establish a specialty procedure center in an effort to consolidate minimally invasive procedures into a single state-of-the-art procedure center.

Project Location	Long Beach, CA			
Planned Project Name	Seismic Corrections to Buildings 7 & 126			
Fiscal Year	2004	2007	2009	2010
BA Received (\$000)	\$10,300	\$97,545	\$10,000	\$11,700
Total Acquisition Cost (\$000)	\$129,545			
Asset Type	Major Construction			
Status	Construction			

This project received \$10.3M in 2004 budget authority for design, \$97.55M in 2007 budget authority, \$10M in 2009 budget authority, and \$11.7M in 2010 budget authority to complete the project, with a total estimated cost of approximately \$129.5M. The VA Long Beach Healthcare System (VALBHS) is proposing a major construction project for the modernization, demolition and seismic upgrade of facilities. Increasing the efficiency of traffic flow and parking will be a high priority included in the site plan. A security plan will also be implemented during the design phase. This project includes the construction of a new and efficient space for those administrative and support services affected by the demolition of seismically deficient Buildings 2, 4, 8, 11 and T162. These buildings contain crucial core support functions: Bldg. 2- Ear, Nose & Throat (ENT), Audiology, Main Library, Chapel, Canteen/Cafeteria, Bldg. 4- Fiscal, Material Management, Equal Employment Opportunity (EEO) & Labor Relations, Human Resources and Credit Union, Bldg. 8- Education, Medical & Surgical Support Offices, Building 11- Employees Education Service (EES) and T162 - Employee Health, TRICARE & Indian Health Clinics and the Veterans Integrated Service Network (VISN 22) Director's and Support Offices. Building 7 will be seismically upgraded and modernized or demolished, rebuilt and expanded as new clinical space based on the consultants' findings. Building 7 was evaluated and deemed essential and placed on the VA national "Exceptionally High Risk" list as seismically deficient (VA Seismic Inventory, Phase 4, EHR Ranked List, October 2003 update). Buildings 2, 4, 8 and 11 are of the same 1943 vintage and design.

Specifically, this project will either: renovate and seismically upgrade existing Building 7 (36,000 gsf) and add 24,000 gsf to Building 7; or demolish and rebuild to the size of 73,600 gsf of clinic space and will consolidate multiple specialty medical and surgical outpatient clinics and pharmacy to prepare for future outpatient demand. The project will demolish approximately 214,000 gsf of seismically deficient and deteriorated inefficient spaces of Buildings 2, 4, 8, 11 and T162 and consolidate services in a new administrative, research administration, and support services building (approximately 137,000 gsf).

In conjunction, the project will construct a 54,000 gsf 24-bed Blind Rehabilitation

Center to serve all of the Southwestern part of the United States blind veteran population. Comprehensive rehabilitation services at VALBHS will be consolidated and placed physically adjacent to the SCI Building in order to improve efficiencies and increase productivity. All new construction shall be connected to Buildings 7 and 126OP, connected to the core patient tower building 126 and the new proposed Blind Rehabilitation Center.

Project Location	Long Beach, CA
Planned Project Name	Seismic Corrections - Mental Health and Community Living Center
Fiscal Year	2010
BA Received (\$000)	\$24,200
Total Acquisition Cost (\$000)	\$258,400
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$24.2M in 2010 budget authority to begin design, with a total estimated cost of approximately \$258.4M. This project constructs a new mental health center, a community living center (CLC), and proposes to demolish two seismically deficient buildings on the VA Long Beach Healthcare System campus. The seismically deficient and replacement buildings are Building 128, an existing 93,939 GSF mental health building that is being replaced with a new building for mental health services, and Building 133, an existing 58,560 GSF nursing home that is being replaced with a new CLC. The new Consolidated Rehabilitation Center will create adjacency of rehabilitation services to our existing SCI building, main hospital building, and new CLC building. The new Consolidated Rehabilitation Center will yield new efficiencies in rehabilitation operations by uniting all rehabilitation-related functions, currently scattered throughout the VA Long Beach campus, into a single building. The Consolidated Rehabilitation Center will also consolidate staff and eliminate staffing deficiencies that occur during peak demand periods. The new buildings will be connected to each other, and to the remainder of existing VA Long Beach healthcare system (VALBHCS) buildings, through a new connecting corridor. Demolition will include asbestos and lead paint abatement.

Project Location	Louisville, KY
Planned Project Name	New Medical Center
Fiscal Year	2009
BA Received (\$000)	\$75,000
Total Acquisition Cost (\$000)	TBD
Asset Type	Major Construction
Status	Planning

This project received \$75M in 2009 budget authority to begin design. This project will acquire land and construct a new medical center. This will include a new inpatient tower downtown with 464,000 GSF, a garage and energy plant and a new Health Care Facility with 688,000 GSF and new garage, demolition and energy plant. It does not include renovations of the existing facility.

The primary objective of this project is the construction of a replacement Medical Center for the current Louisville VAMC. Objective includes the correction of current program space deficiencies. This is reflected in inappropriate patient flow, program deficiencies such as lack of patient privacy, inadequate ADA compliance, infection control issues caused from lack of space necessary to maintain proper separation of clean and dirty environments, and limited ceiling heights for overhead ducts and piping. The current facility does not have adequate space to meet current health care demand and projected workload for outpatient services.

Project Location	Menlo Park, CA
Planned Project Name	Seismic Corrections-Geropsychiatric Nursing Home Replacement (Bldg. 324)
Fiscal Year	2005
BA Received (\$000)	\$32,934
Total Acquisition Cost (\$000)	\$32,934
Asset Type	Major Construction
Status	Physically Complete

This project received \$32.934M in 2005 budget authority. This capital investment project constructed a 120-bed geropsychiatric replacement facility of approximately 80,000 gsf at VA Palo Alto Health Care System's (VAPAHCS) Menlo Park Division (MPD). This project will replace an obsolete, functionally deficient and seismically unsafe psychiatric building, which currently operates as a 109-bed geropsychiatric inpatient facility (Building 324 - Exceptionally High Risk [EHR]). Completion of this project will eliminate a seismically deficient facility that fails to meet current Life/Safety, ADA/Uniform Federal Accessible Standards (UFAS). VAPAHCS' Menlo Park Division is VISN 21's primary referral

center for extended care and psychiatric treatment while the Palo Alto Division is one of two regional referral sites for tertiary care and acute inpatient programs such as surgery, medicine and psychiatry.

Project Location	Milwaukee, WI
Planned Project Name	Spinal Cord Injury (SCI) Center
Fiscal Year	2007 2010
BA Received (\$000)	\$32,500 (\$3,000)
Total Acquisition Cost (\$000)	\$29,500
Asset Type	Major Construction
Status	Construction

This project received \$32.5M in 2007 budget authority to complete construction and \$3M were transferred to the Filipino Veterans Compensation Fund in 2010, for a total estimated cost of approximately \$29.5M. The Spinal Cord Injury Outpatient and Inpatient Center construction project will create a 63,100 gsf building to include 38 patient beds. The purpose of this project is to develop a new geographic base for the Spinal Cord Injury Center at the Milwaukee VA Medical Center. This is a part of the comprehensive Center of Excellence for the physically challenged. This project is designed to improve patient care, maximize patient services and quality of life (including accessibility, privacy, and independence). The project will aim to improve efficiency of hospital staff, particularly nurses and therapists, and to more efficiently utilize scarce resources. The project will also meet the demands for the SCI physical therapy, recreational therapy, GU clinic, kitchen and all administrative and support space in accordance with the VA criteria and will meet the requirements in the VA SCI Design Guide.

Project Location	Minneapolis, MN
Planned Project Name	Spinal Cord Injury/Disease (SCI/D) Center
Fiscal Year	2004 2010
BA Received (\$000)	\$20,500 (\$62)
Total Acquisition Cost (\$000)	\$20,438
Asset Type	Major Construction
Status	Physically Complete

This project received \$20.5M 2004 budget authority and \$62 thousand were transferred to the Working Reserve in 2010, for a total estimated cost of approximately \$20,438. This project established a Spinal Cord Injury/Disease (SCI/D) Center for VISN 23. It constructed a two story structure (plus basement); a 30 inpatient bed unit with Outpatient Clinics and administrative space. A connection to the main facility occurs at each level of the new structure; the new

SCI/D Center has a separate street level entrance and dedicated parking. Previously, outpatient SCI exams were done in the Physical Medicine and Rehabilitation (PM&R) Exam area 2.5 days per week. A VISN 23 SCI Center was supported by the CARES planning model and the draft national CARES plan, as well as the VHA SCI Program Office.

Project Location	New Orleans, LA		
Planned Project Name	New Medical Facility		
Fiscal Year	2006	2011	2012
BA Received/Requested (\$000)	\$625,000	\$310,000	\$60,000
Total Acquisition Cost (\$000)	\$995,000		
Asset Type	Major Construction		
Status	Construction Documents		

This project received \$75M in 2006 budget authority in the 2006 Emergency Supplemental Appropriation, Public Law 109-148, and another \$550M in the 2006 Emergency Supplemental Appropriation, Public Law 109-234, and requires an additional \$310M in 2011 and \$60M in 2012 budget authority to proceed, with a total estimated cost of approximately \$995M. This project will evaluate the damage to the New Orleans VAMC and determine the most efficient and cost effective manner to provide health care services to veterans in the New Orleans Service area. This project may also include connecting a corridor to the LSU (Medical Center of Louisiana) medical facility. Functions may be shared in the LSU and VA facilities, as well as the connecting corridor, consistent with the New Orleans Collaborative Opportunities Study Group Report, dated June 12, 2006, cited in the authorization.

Project Location	North Chicago, IL	
Planned Project Name	Joint VA and Department of Navy Medical Project	
Fiscal Year	2004	2009
BA Received (\$000)	\$13,000	(\$1,219)
Total Acquisition Cost (\$000)	\$11,781	
Asset Type	Major Construction	
Status	Physically Complete	

This project received \$13M in 2004 budget authority and \$1.2M were transferred to the Working Reserve in 2009. This project provides new surgical facilities, including operating rooms and support space, and upgraded Urgent Care/Emergency Services staffed by VA and utilized by both VA and DoD (Navy) beneficiaries. A new Operating Room Suite was constructed and the existing Post Anesthesia Recovery area was renovated. The VISN 12 CARES review encouraged increased collaboration between the North Chicago (NC) VAMC and Naval Hospital Great Lakes. The joint Surgery and Urgent/Emergency Care units address some of the existing unnecessary

duplication of services (these Federal hospitals are less than a mile apart). Consolidating these services at a single site results in considerable savings (about \$3,600,000 a year, mostly due to the minimum staffing required at separate facilities). This project reduces overall operating costs for VA and Navy by consolidating VA and DoD inpatient care. It utilizes vacant patient care space at the NCVAMC. Additionally, VA beneficiaries have increased access to surgical procedures closer to their homes and families.

Project Location	Omaha, NE
Planned Project Name	Replacement Facility
Fiscal Year	2011
BA Requested (\$000)	\$56,000
Total Acquisition Cost (\$000)	\$560,000
Asset Type	Major Construction
Status	Schematic Design

This project is requesting \$56M in 2011 budget authority to begin project planning. This project is for new construction of healthcare space; renovation of a portion of the existing outpatient space; demolition of the existing main hospital; and construction of new parking and site work. The new construction will include inpatient bed units; surgical suites; a Supply, Processing, and Distribution (SPD); expanded space for clinical and administrative services; and an energy center.

Project Location	Orlando, FL			
Planned Project Name	New Medical Facility			
Fiscal Year	2004	2008	2009	2010
BA Requested (\$000)	\$25,000	\$49,100	\$220,000	\$371,300
Total Acquisition Cost (\$000)	\$665,400			
Asset Type	Major Construction			
Status	Construction			

This project received \$25M in 2004 and \$49.1M in 2008, \$220M in 2009 budget authority, and an additional \$371.3M in 2010 budget authority to complete the project, with a total estimated cost of approximately \$665.4M. This project provides the land acquisition, construction of a new medical center consisting of a 134-bed hospital, a large medical clinic, 120-bed community living center (CLC), 60-bed domiciliary, and full support services, utilities and infrastructure on a new site.

Project Location	Palo Alto, CA
Planned Project Name	Seismic Corrections Building 2
Fiscal Year	2005 2008
BA Received (\$000)	\$34,000 \$20,000
Total Acquisition Cost (\$000)	\$54,000
Asset Type	Major Construction
Status	Construction

This project received \$34M in 2005, and an additional \$20M in 2008 budget authority to complete construction, with a total estimated cost of approximately \$54M. This project will replace an obsolete, functionally deficient and seismically unsafe acute psychiatric inpatient building by constructing an 80-bed, 78,000 GSF replacement facility at VA Palo Alto Health Care System's (VAPAHCS) Palo Alto Division (PAD). Upon completion of the 80-bed acute psychiatric inpatient replacement facility, Building 2 (77,100 GSF) will be decommissioned, razed and the parcel converted to patient parking. Landscaping and exterior revisions have been included within this project.

Project Location	Palo Alto, CA		
Planned Project Name	Centers for Ambulatory Care/Polytrauma/Blind Rehabilitation/Research		
Fiscal Year	2008	2011	2012
BA Received/Requested (\$000)	\$164,877	\$30,000	75,900
Total Acquisition Cost (\$000)	\$716,600		
Asset Type	Major Construction		
Status	Construction		

This project received \$164.9M in 2008 budget authority from the 2008 emergency supplemental appropriation, Public Law 110-252, to begin design, and requires an additional \$30M in 2011 and \$75.9M in 2012 budget authority to proceed, with a total estimated cost of approximately \$716.6M. This project will construct Centers for Ambulatory Care and Polytrauma Rehabilitation at VA Palo Alto Health Care System's (VAPAHCS) Palo Alto Division. An Ambulatory Care Replacement Center will accommodate most of the ambulatory care clinics at the Palo Alto Division, many of which are currently located in former inpatient psychiatric buildings originally constructed in 1960. This proposal will consolidate approximately 240,000 ambulatory care encounters and translational research programs into state-of-the-art facilities. In addition to the Ambulatory Care Replacement Center, this project will construct a Polytrauma Rehabilitative Center. The new Polytrauma Rehabilitation Center will house both inpatient and outpatient treatment programs. Today, Palo Alto's existing Polytrauma Rehabilitation Center is located in former inpatient psychiatric buildings originally constructed in 1960. As one of VA's five Polytrauma Rehabilitation Centers, modern treatment facilities are required to treat patients diagnosed with complex multi-trauma injuries related to combat.

This proposal will replace six buildings [three buildings are classified as Exceptionally High Risk (EHR) and the remaining three are large, temporary clinical modular buildings]. The abatement and demolition include Buildings 4, 23, 54, and clinical Modular Buildings (MB2, MB3, and MB4). Collectively, razing these six buildings will eliminate nearly 300,000 GSF of structurally deficient Exceptionally High Risk (EHR) and potentially hazardous buildings from VA Palo Alto Health Care System.

In addition to new construction and demolition, this project includes asbestos abatement, hazardous material mitigation, site restoration and the construction of a parking structure. Landscape and other exterior revisions, associated with site work, utility feeds, cabling, impact moves and emergency generators are included within the scope of this project.

Project Location	Pensacola, FL - Cory Naval Air Station,
Planned Project Name	Joint VA & Department of Navy Outpatient Clinic
Fiscal Year	2005
BA Received (\$000)	\$55,056
Total Acquisition Cost (\$000)	\$55,056
Asset Type	Major Construction
Status	Physically Complete

This project received \$55.056M in 2005 budget authority to replace the existing leased outpatient clinics in Pensacola, Florida with a joint/shared VA/DoD (Navy) outpatient clinic. The new clinic consists of approximately 200,000 gsf and replaces the previous VA outpatient clinic (lease expired in 2006) and the Navy Corry Station Branch Clinic. The projected outpatient primary care gap for 2022 is 77,386, the outpatient mental health gap is 27,343, the outpatient specialty care gap is 117,498, and the outpatient ancillary/diagnostic gap is 152,941. The services to be provided in the VA/DoD joint clinic include: Primary Care, Mental Health, Women's Clinic, Audiology, Optometry, Dental, Pain Clinic, Cardiology and Urology. The ancillary services including Radiology (with MRI), Laboratory and Pharmacy will be provided jointly. At this time VA has sharing agreements with DoD (Navy Hospital) for inpatient services, emergency room services, orthopedics (including joint replacements), OB and ancillary services. VA is exploring additional sharing arrangements.

Project Location	Perry Point, MD
Planned Project Name	Replacement Community Living Center
Fiscal Year	2010
BA Received (\$000)	\$9,000
Total Acquisition Cost (\$000)	\$90,100
Asset Type	Major Construction
Status	Planning

This project received \$9M in 2010 budget authority with a total estimated cost of \$90.1M. This proposal is to construct a 155 bed community living center (CLC). The construction will include new parking space on grade as well as a connecting service tunnel for transporting meals and supplies to the building via electric tow tractors. In addition, it is proposed that the existing 1920's nursing home care unit be demolished.

Project Location	Pittsburgh, PA			
Planned Project Name	Consolidation of Campuses			
Fiscal Year	2004	2006	2008	2009
BA Received (\$000)	\$19,994	\$82,500	\$130,700	\$62,400
Total Acquisition Cost (\$000)	\$295,594			
Asset Type	Major Construction			
Status	Construction			

This project received \$20M in 2004, \$82.5M in 2006, \$130.7M in 2008, \$62.4M in 2009 budget authority, for a total estimated cost of approximately \$295.6M. The purpose of this project is to consolidate a three division health care delivery system into two divisions, to accommodate the current and projected workload and to provide a state-of-the-art, improved care environment while reducing operating expenses, and enhancing services. Specifically, this proposal identifies closure and divestiture/enhanced use of the Highland Drive division, a fifty-year-old campus-style facility, composed of more than 20 buildings on 169 acres. Phase 1 included the design/build of the parking structure and design of all other VHA space. Phase 2 includes construction of all remaining VHA space.

Construction will take place at both the University Drive Division and the H.J. Heinz Division locations in order to relocate the current functions at Highland Drive Division. Construction at the University Drive Division will be approximately 218,000 square feet and a 1,500 car-parking garage. At the H.J. Heinz Division construction will consist of approximately 265,000 square feet.

Project Location	Reno, NV
Planned Project Name	Correct Seismic Deficiencies and Expand Clinical Services in Building 1
Fiscal Year	2012
BA Requested (\$000)	\$21,380
Total Acquisition Cost (\$000)	\$213,800
Asset Type	Major Construction
Status	Planning

This project requires \$20.38M in 2012 budget authority to begin design, with a total estimated cost of approximately \$213.8M. This project proposes to completely renovate Building 1, consisting of 138,007 gross square feet (GSF) of space, by seismically correcting the building as well as correcting all facility condition assessment (FCA) deficiencies. Additionally, this project proposes to construct a 30,102 GSF clinical expansion, as well as a 5,000 GSF research expansion, to correct space deficiencies identified in the 2018 projected space gap. Upon completion, Building 1 will be transformed into a 165,000 GSF modern structure supporting healthcare for Veterans.

The following programs will be impacted and will benefit from the proposed project: Mental Health, Dental, Compensation and Pension, Audiology, Patient Admissions and Testing, Surgical Service, Quality Management, Veteran Service Officers, Warehouse, Voluntary Services, Veterans Eligibility Center, Geriatrics and Extended Care, Dietetics, In-patient Kitchen, Morgue, Laboratory and Pathology Services, Research, Surgical Service, Medical Service, Ambulatory Care (Patient Centered Medical Home), OEF/OIF, and the Women's Health Clinic.

Project Location	San Antonio, TX
Planned Project Name	Ward Upgrades and Expansion
Fiscal Year	2004 2009
BA Received (\$000)	\$19,094 \$1,900
Total Acquisition Cost (\$000)	\$20,994
Asset Type	Major Construction
Status	Construction

This project received \$19.1M in 2004 budget authority and an additional \$1.9M in a 2009 reprogramming action, for a total estimated cost of approximately 20.994M. This project will construct 26,000 square feet of new space and provide necessary renovations of approximately 62,800 square feet at the Audie L. Murphy Veterans Memorial Hospital (San Antonio VAMC) to relocate 25 medical acute care beds from Kerrville VAMC and consolidate all acute care hospital beds at San Antonio. It will also increase the number of acute care medical and psychiatric detoxification beds at San Antonio VAMC by 10 beds to meet present and future inpatient gaps at the San Antonio VAMC. All nursing units will be

renovated to meet current patient privacy standards and space requirements. Each bedroom will have a dedicated, handicapped accessible toilet/shower room instead of congregate bathrooms as currently exists.

Project Location	San Antonio, TX
Planned Project Name	Polytrauma Center
Fiscal Year	2008
BA Received (\$000)	\$66,000
Total Acquisition Cost (\$000)	\$66,000
Asset Type	Major Construction
Status	Construction

This project received the total estimated cost of \$66M in a reprogramming action in 2008 to complete design and construction. This project will provide a new 84,000 NUSF state-of-the art Polytrauma Healthcare and Rehabilitation Center. It will consist of a polytrauma ward, transitional housing, Physical Medicine and Rehabilitation Service, Prosthetics Service, and polytrauma research and support programs. In addition the spaces vacated by programs moving to the new center will be renovated. Parking deficiencies will also be addressed.

Project Location	San Diego, CA
Planned Project Name	Seismic Corrections-Bldg. 1
Fiscal Year	2005
BA Received (\$000)	\$47,874
Total Acquisition Cost (\$000)	\$47,874
Asset Type	Major Construction
Status	Physically Complete

This project received \$47.874M in 2005 budget authority. This project seismically strengthened the 854,900 sq-ft Medical Center (Building 1) with an integrated exterior stair and braced frame system. This system created a structurally efficient seismic bracing solution with minimal disruption to the interior of the Building and its operations. In order to install the braced frames, portions of modular Building 23 and MRI Building 14 were demolished and reconstructed including the two-stop elevator serving Building 14. This seismic upgrade abates a significant risk to life safety and meets Department of Veterans Affairs Seismic Design Requirements (H-18-8), the California Code of Regulations, Title 24, Part 2 and California Senate Bill 1953 requirements. Asbestos abatement was required for connections to the existing structure and abatement in the stair towers to be demolished.

Project Location	San Diego, CA
Planned Project Name	Spinal Cord Injury and Seismic Deficiency
Fiscal Year	2010
BA Received (\$000)	\$18,340
Total Acquisition Cost (\$000)	\$195,000
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$18.34M in 2010 budget authority to begin design, with a total estimated cost of approximately \$195M. The first phase of the project will involve construction of a Spinal Cord Injury (SCI) Unit, which will provide approximately 46 private inpatient rooms, an outpatient clinic, a genito-urinary (GU) clinic, and a therapy clinic. This project will also construct a new parking garage. This structure will be built on a current surface parking lot to mitigate the loss of parking from the new building's footprint. The existing SCI building, Building 11, will be structurally and non-structurally upgraded to meet the immediate occupancy performance objective of the American Society of Civil Engineers standard A.S.C.E. 31-03. After the seismic upgrade, the first floor will be renovated to provide a 50 bed community living center (CLC) and hospice unit. The basement space will remain as administrative space and functions will be relocated to the first floor during construction to allow for the completion of the seismic work.

Project Location	San Francisco, CA
Planned Project Name	Seismic Corrections Building 203
Fiscal Year	2005
BA Received (\$000)	\$41,168
Total Acquisition Cost (\$000)	\$41,168
Asset Type	Major Construction
Status	Physically Complete

This project received \$41.168M in 2005 budget authority. This project seismically retrofitted Building 203, a five story, 335,000 gsf concrete structure housing all acute care beds at San Francisco VA Medical Center, to meet current VA standards for seismic safety. SFVAMC's Building 203 ranked high in the Nation in terms of the degree of seismic risk and need for retrofitting as evaluated by the consultant Degenkolb Engineers (March, 2003 Update). The project included functional and technical improvements for patient privacy, disabled accessibility, building efficiency, and bringing the structure into compliance with current codes. These changes will meet additional goals of: providing appropriate patient privacy, increasing customer access through barrier-free facilities, an increased bed assignment flexibility, improving customer satisfaction, and improving staff satisfaction through an improved working environment. The primary goal of this project was to fulfill the VA's

mandate to provide seismically safe buildings and ensure continued medical center operation after a major earthquake.

Project Location	San Francisco, CA
Planned Project Name	Correct Seismic Deficiencies in Buildings 1, 6, 18, & 12
Fiscal Year	2012
BA Requested (\$000)	\$22,480
Total Acquisition Cost (\$000)	\$224,800
Asset Type	Major Construction
Status	Planning

This project requires \$22.48M in 2012 budget authority to begin design, with a total estimated cost of approximately \$224.8M. This project proposes to demolish Building 12 and then construct a new, state-of-the-art medical facility at an expanded size of 75,000 gross square feet (GSF) at the San Francisco VA Medical Center (SFVAMC). The project also proposes to seismically retrofit Buildings 1, 6 and 8 to correct potentially hazardous seismic, life safety and infrastructure deficiencies. As part of this project, research program space will be transferred from Buildings 1 and 6 to the new, replacement Building 12. Building 1 will be renovated to house clinical office space in order to allow decompression of Building 203, the main hospital, and Building 200, the main ambulatory care support building. Building 6 will retain administrative services, while Building 8 will retain ambulatory mental health and research functions. Finally, 250 additional parking spaces will be provided to reduce the current 750-space deficiency at SFVAMC.

Project Location	San Juan, PR	
Planned Project Name	Seismic Corrections-Bldg. 1	
Fiscal Year	2005-2010	2012
BA Received (\$000)	\$176,280	\$100,720
Total Acquisition Cost (\$000)	\$277,000	
Asset Type	Major Construction	
Status	Construction	

The project received \$14.88M in 2005, was reduced by \$4M in a reprogramming action in 2006, received \$59M in 2008, received \$64.4M in 2009, received \$42M in 2010, and requires an additional \$100.72M in 2012 budget authority to complete, with a total estimated cost of approximately \$277M. This project will complete the seismic corrections in the main hospital building to comply with VA immediate occupancy standards. Asbestos abatement and fire protection are integral parts of the scope of the project. The first phase provided approximately 120,000 square feet, of new construction, which will house administrative functions to meet VA life safety standards. Renovation of 10,000 square feet will

occur as backfill. Phase two will provide approximately 125,000 square feet of new construction that will house outpatient clinic space on top of the existing outpatient clinic. Phase three will demolish the existing tower of Building 1, provide seismic bracing, fire protection and asbestos abatement and renovation of approximately 222,000 square feet. The 2010 funding will construct the new parking structure.

Project Location	Seattle, WA
Planned Project Name	Mental Health Building 101
Fiscal Year	2009
BA Received (\$000)	\$17,870
Total Acquisition Cost (\$000)	\$211,700
Asset Type	Major Construction
Status	Schematics/Design Development

This project received \$17.87M in 2009 budget authority to begin design, with a total estimated cost of approximately \$211.7M. This project is for the demolition of 63,464 GSF of existing space and the creation of 165,000 GSF of a new multi-story Mental Health Services and Research building at the Seattle Division of VA Puget Sound Health Care System (VAPSHCS). A separate 566 space parking deck will be constructed to bring the parking at the Seattle campus closer to the prescribed amounts.

This space designated for Mental Health will include clinical research and clinical care. It will house the Mental Illness Research, Education and Clinical Center (MIRECC), the Center for Excellence in Substance Abuse Treatment and Education (CESATE), the mental health components of the Hepatitis C Resource Center (Hep C RC), the clinical treatment programs of our existing outpatient mental health services including General Psychiatry, Chronic Mental Illness (CMI), Post Traumatic Stress Disorder (PTSD), Substance Abuse and Addictions Treatment, Day Treatment and Mental Health Intensive Case Management (MHICM). Additionally, Mental Health has developed a primary care clinic for their patients with medical comorbidities, which requires additional exam rooms.

The proposed new building will also incorporate space allocated to Clinical Research, Rehabilitation Research and Development (RR&D), Health Services Research and Development (HSR&D), and Biomedical Research. Because so much of the focus of the VAPSHCS Research program is dedicated to Mental Health disorders common in the VA such as PTSD, addictions, schizophrenia and mental incapacity of the aging veteran population such as Alzheimer's disease, the proposed new building will expand clinical, laboratory, health care utilization and outcomes research in mental health. Other major programs that would be housed in this area are: amputation and prosthetic limb development

to support OIF/OEF; neurology, including Alzheimer’s Disease; endocrinology and metabolism (diabetes and obesity); gastroenterology, (chronic diseases of the liver, bile ducts, and pancreas); cancer (colorectal, pulmonary, and prostate malignancies); and pulmonary disease. In addition, research related to special disabilities will also be accommodated in this new building and will include programs examining clinical, basic and translational aspects of spinal cord injury, PTSD, chronic mental illness and prosthetics, including amputation.

Project Location	Seattle, WA		
Planned Project Name	Correct Seismic Deficiencies Building 100 Nursing Tower and Community Living Center		
Fiscal Year	2009	2012	
BA Received (\$000)	\$4,300	\$47,500	
Total Acquisition Cost (\$000)	\$51,800		
Asset Type	Major Construction		
Status	Schematics/Design Development		

This project received \$4.3M in 2009 budget authority to begin design and requires an additional \$47.5M in 2012 budget authority to complete, for a total estimated cost of approximately \$51.8M. This project at the Seattle Division of VA Puget Sound Health Care System (VAPSHCS) is to replace all braced frame members in Building 100 Nursing Tower (NT) and Nursing Home Care Unit (NHCU), with buckling restrained braces. The Bldg 100 NT comprises 180,528 GSF and the NHCU 38,226 GSF of an eight story (with basement) steel bracing and moment frame main hospital that was built in 1985. The purpose of this seismic renovation project is to continue delivering world-class health care to veterans in a seismically safe environment of care.

Project Location	St. Louis (JB), MO			
Planned Project Name	Medical Facility Improvements and Cemetery Expansion			
Fiscal Year	2007	2009	2010	2012
BA Received/Requested (\$000)	\$7,000	\$5,000	\$19,700	\$80,000
Total Acquisition Cost (\$000)	\$346,300			
Asset Type	Major Construction			
Status	Construction			

This project received \$7M in 2007, \$5M in 2009, \$19.7M in 2010 budget authority, and requires an additional \$80M in 2012 budget authority, for a total project cost of approximately \$346.3M. The project will decrease the amount of infrastructure maintained and operated by the Veterans Health Administration through demolition of underutilized buildings (290,000 GSF) adjacent to the cemetery. The demolition of these buildings will provide approximately 30 acres to the National Cemetery Administration (NCA) for expansion of the

Jefferson Barracks National Cemetery (without this land, there will be an interruption of service delivery for St. Louis area Veterans). The remaining phases of the project will relocate all clinics from Building 1; construct a new tenants building for the relocation and consolidation of the VA Employee Education Service (EES) as well as a space for the NCA National Training Center; replace the existing deteriorated, obsolete central boiler/chiller plant with energy efficient HVAC systems for all remaining buildings on the JB Campus; and construct facilities to relocate the patient aquatic and therapy facility, main chapel, engineering shops, and a consolidated warehouse.

Project Location	St. Louis (JC), MO
Planned Project Name	Replace Bed Tower & Clinic Expansion
Fiscal Year	2010
BA Received (\$000)	\$43,340
Total Acquisition Cost (\$000)	\$433,400
Asset Type	Major Construction
Status	Planning

This project received \$43.34M in 2010 budget authority to begin design, with a total estimated cost of approximately \$433.4M. This project constructs new building space and renovates associated vacated existing space at the John Cochran (JC) Division, VAMC, St. Louis, MO for private in-patient bed wards, in-patient SCI beds, new ICU beds, inpatient mental health, a methadone clinic, expanded women's clinic, a new Emergent Response (ER) unit, replacement education and multi-media facilities, and consolidated medical research facilities. Necessary buildings will be demolished to provide usable ground on the north and west sides of the JC campus for new construction. This project will provide for improved patient care by replacing the deteriorated environment with new space and providing for patient privacy by having single occupant in-patient rooms with non-shared bathrooms. It will expand the SCI program to eliminate the need for transporting these critical patients back and forth between the two divisions of the St. Louis VAMC.

Project Location	Syracuse, NY			
Planned Project Name	Construct Addition for Spinal Cord Injury (SCI) Center			
Fiscal Year	2005	2008	2009	2010
BA Received (\$000)	\$53,469	\$23,800	\$7,700	\$2,000
Total Acquisition Cost (\$000)	\$86,969			
Asset Type	Major Construction			
Status	Construction			

This project received \$53.469M in 2005, \$23.8M in 2008 budget authority, and \$7.7M in a 2009 reprogramming action, and \$2M in a 2010 reprogramming action, for a total estimated cost of approximately \$86.969M. This project will

provide space for a 30-bed Spinal Cord Injury program in the addition. There is no currently available space within the main hospital building to allow effective incorporation of SCI patients. This requires relocation of some existing functions out of the main hospital. The existing 6,000 SF former laundry structure will be demolished to accommodate a new 6 floor building addition of approximately 21,500 GSF per floor (Basement, Ground, 1, 2, 3, & 4th floor levels.) The addition will be configured to meet the needs of the functions displaced in the existing hospital building. The 4th floor of the existing building (36,000 SF) will be completely gutted and configured for inpatient and outpatient SCI support functions. Approximately 10,000 SF of the new structure will also be dedicated to the SCI therapeutic pool and solarium. The existing parking structure will be expanded to mitigate the loss of parking associated with the projects.

Project Location	Tampa, FL	
Planned Project Name	Spinal Cord Injury Center (SCI)	
Fiscal Year	2005	2006
BA Received (\$000)	\$7,043	\$4,364
Total Acquisition Cost (\$000)	\$11,407	
Asset Type	Major Construction	
Status	Physically Complete	

This project received \$7.043M in 2005 budget authority and \$4.364M in a reprogramming action in 2006, for a total estimated cost of approximately \$11.407M. This project will provide for the construction of a 30-bed, approximately 17,100 gross square footage (gsf), Spinal Cord Injury Extended Care addition at the James A. Haley Veterans' Hospital. It is a VISN 8, Central Market, and special emphasis program gap Planning initiative. As background, Major Construction Project 673-087A, "Spinal Cord Injury Addition" was originally designed as a 100-bed project. A subsequent decision, however, reduced the project scope and deleted the originally planned 30 Extended Care Beds. The remaining 70 Acute Bed Spinal Cord Injury facility was activated in 2002. This project constructs those 30 Extended Care or LTC beds. SCI Long Term Care (LTC) patients have better outcomes under VA care, rather than in contract facilities. Few facilities will accept this category of patient as required staff ratios are high, yet reimbursement rates are barely above those for more typical patients.

Project Location	Tampa, FL
Planned Project Name	Upgrade Essential Electrical Distribution Systems
Fiscal Year	2004
BA Received (\$000)	\$49,000
Total Acquisition Cost (\$000)	\$49,000
Asset Type	Major Construction
Status	Physically Complete

This project received \$49M in 2004 budget authority. This project established and upgraded normal, emergency and standby electrical distribution systems at the James A. Haley Veterans' Hospital, Tampa, Florida. The main campus currently comprises approximately 1.3 million square feet of air-conditioned space. This project directly addressed Facility Condition Assessment (FCA) cited deficiencies, which received grades of D and F. Each system component was addressed, including: sub-stations, risers, transformers, network protectors, automatic transfer switches, bus duct or cabling distribution, circuit protective devices, panel boards and circuit breakers.

Project Location	Tampa, FL
Planned Project Name	Polytrauma and Bed Tower
Fiscal Year	FY 2008
BA Received (\$000)	\$231,500
Total Acquisition Cost (\$000)	\$231,500
Asset Type	Major Construction
Status	Construction

This project received \$231.5M in 2008 budget authority in the 2008 emergency supplemental appropriation, Public Law 110-252. This project consists of three parts that will focus on service delivery enhancements and infrastructure upgrades while providing expanded space for special emphasis areas. Part 1 is the construction of a state-of-the-art polytrauma health care center. This will consist of one floor of polytrauma ward space, one floor of polytrauma and multi-purpose rehabilitation space and a mechanical penthouse for infrastructure support.

Part 2 is the complete renovation of ward, procedure and exam room space in the top four floors of the main hospital Building 1. This renovation will transform the existing four and two bed rooms of the existing space into single bed rooms. It will also provide an opportunity to remedy several infrastructure problems that could otherwise only be remedied by building a new hospital bed tower, including asbestos removal, fire sprinkling, indoor air quality upgrades, electrical upgrades, health care environment upgrades, physical security (hurricane and blast hardening) upgrades.

Part 3 of this project will construct a parking garage that will provide up to 1500 parking spaces for patients, family, visitors and staff. The most recent parking study produced by VACO estimates that there is a current deficit for parking of 1,053 spaces and a deficit of 2,333 spaces by the completion of this project.

Project Location	Temple, TX	
Planned Project Name	Information Technology Facility	
Fiscal Year	2005	2008
BA Received (\$000)	\$55,552	(\$45,000)
Total Acquisition Cost (\$000)	\$10,552	
Asset Type	Major Construction	
Status	Construction	

This project received \$55.552M in 2005 budget authority and was decreased by \$45M in a reprogramming action in 2008. A planning decision about the future of the Waco, TX facility diminished the need for major construction activities at Temple. The remaining \$10.55M will be used to construct an information technology facility at Temple.

Project Location	Tucson, AZ		
Planned Project Name	Mental Health Clinic		
Fiscal Year	2004	2006	2009
BA Received (\$000)	\$12,100	\$1,200	(\$272)
Total Acquisition Cost (\$000)	\$13,028		
Asset Type	Major Construction		
Status	Physically Complete		

This project received \$12.1M in 2004 budget authority, \$1.2M in a reprogramming action in 2006, and transferred \$272,000 to the working reserve in 2009, for a total estimated cost of approximately \$13.028M. This proposal created approximately 42,485 gross square feet (gsf) of new construction for mental health programs to be located west of the current mental health inpatient building (Building 67) and enhanced an associated 8,983 gsf of renovated backfill space in Building 2, allowing for a six-bed expansion of inpatient mental health facility. Completion of this project provided appropriately sized and configured space for all outpatient mental health services that are presently scattered throughout the 116 acre campus in Buildings 2, 7, 66, and 67. This project houses the Mental Health Clinic, Drug and Alcohol Rehabilitation, Day Treatment, Vocational Rehabilitation, Seriously Chronically Mentally Ill (SMI), Post Traumatic Stress Disorder (PTSD), Family Mental Health, Biofeedback Therapy, Gero-psychiatry, Mood Disorder, Psychosis, Compensated Work Therapy (CWT), Outpatient Psychiatry Resident Program, Psychology Intern Program, Social Work Program, Women's Trauma, and the Homeless programs, as well as providing needed

space for overall programmatic administrative areas for mental health. In addition, the new facility creates space to effectively continue VA/DoD sharing programs for both inpatient and outpatient mental health services. This project adds space for two additional mental health primary care teams and allows for an expansion of telepsychiatry program, as well as permit development of a telepsychiatry center of excellence, which will enhance delivery of mental health outpatient services to our Community Based Outpatient Clinics. The new building is located on the main campus of the Southern Arizona VA Health Care System (SAVAHCS) in Tucson, AZ. Completion of this project addresses existing service gap and presently forecasted service gaps of 54% in FY 2012 and 23% in FY 2022. Analyses indicated space deficiencies for all years through 2022. Backfill of vacated Building 2 space included enhancement and expansion of the existing mental health inpatient activities in the adjacent Building 67, including six additional beds, group rooms, and associated necessary programmatic spaces, as well as utilization of the remaining space for other identified space deficient functions.

Project Location	Walla Walla, WA
Planned Project Name	Multi-Specialty Care
Fiscal Year	2009
BA Received (\$000)	\$71,400
Total Acquisition Cost (\$000)	\$71,400
Asset Type	Major Construction
Status	Construction

This project received \$71.4M in 2009 budget authority to complete design and construction. This project will construct a new Outpatient Clinic Building (66,000 GSF) to house primary, specialty, primary mental health care, ancillary services, and associated support and administrative functions; renovate Building 86 (approx 47,303 BGFSF, circa 1929) to accommodate other clinical, administrative, and support functions coming from outlying campus buildings and to improve its antiquated and energy inefficient infrastructure; upgrade antiquated utility distribution systems to include electrical, steam, water and sanitary; upgrade site grading and landscaping; add approximately 175 parking spaces; and demolish four buildings (quarters 48, 49, 7 and 8) located adjacent to building 86 and the new proposed OPC. This project also allows the campus to realign to 24 acres on this 88 acre campus. Under this realignment, the remaining 64 acres will be offered for reuse through the Enhanced Use Lease process.

Project Location	West Los Angeles, CA	
Planned Project Name	Seismic Corrections of 12 Buildings	
Fiscal Year	2009	2012
BA Received/Requested (\$000)	\$15,500	\$20,000
Total Acquisition Cost (\$000)	\$346,900	
Asset Type	Major Construction	
Status	Schematics/Design Development	

This project received \$15.5M in 2009 budget authority to begin design and requires \$20M in a 2012 reprogramming action to seismically retrofit 12 buildings located on the campuses of the West Los Angeles and Sepulveda Medical Centers, with a total estimated cost of approximately \$346.9M. . The 2012 reprogramming action will make it possible to complete the renovations of Building 209 to house homeless programs. Based on the Degenkolb Seismic Safety Report updated 7/27/2010, these buildings are currently designated as "exceptionally high risk" and are at risk of substantial damage and/or possible collapse in the occurrence of a seismic event. The following buildings will be renovated within this project:

- B209 (46,708 gsf) Swing/Vacant
- B212 (69,400 gsf) Research/ Salvation Army Haven
- B257 (57,386 gsf) Mental Health Programs
- B114 (69,921 gsf) Research
- B115 (60,314 gsf) Research
- B205 (53,047 gsf) Mental Health Program
- B258 (64,715 gsf) Mental Health Clinics, Admin, Sharing Agr.
- B207 (47,015 gsf) Mental Health Program
- B208 (47,285 gsf) Mental Health Program
- B300 (68,824 gsf) VISN22 Nutrition and Food Center
- B206 (47,099 gsf) Multiple Mental and Social Programs
- B222 (23,226 gsf) Future IRM Consolidated Site

The buildings associated with this project encompass the relocation and consolidation of numerous departments and will involve extensive phasing and a multitude of space and functional changes for research and mental health programs within the 12 buildings.

Project Location	West Los Angeles, CA
Planned Project Name	Construct New Essential Care Tower/ Seismically Correct and Renovate Building 500
Fiscal Year	2012
BA Received (\$000)	\$50,790
Total Acquisition Cost (\$000)	\$1,027,000
Asset Type	Major Construction
Status	Planning

This project requires \$50.79M in 2012 budget authority to begin design, with a total estimated cost of approximately \$1.03B. This project will construct a new bed tower, consisting of approximately 450,000 gross square feet (GSF). It will then seismically retrofit Building 500, the 930,000 GSF existing hospital building, and Building 501, the facility's chiller plant.

Upon completion of the new patient care tower, a phased renovation of Building 500 will be performed to meet seismic standards mandated by Federal and State law for all acute care facilities throughout California and to provide state-of-the-art outpatient facilities. Upon completion of the project, numerous clinical outpatient services from the north side of the West Los Angeles campus will be relocated to Building 500.

Page Intentionally Left Blank.

Appendix J - VHA Priority Summary

FY 2011 VHA Major Construction Projects in Priority Order

VISN	Location		Project Title - Brief Description	Priority #
21	Alameda	CA	Outpatient Clinic and Columbarium	1

VA 2012 Total Leases						\$712,893

*Lease/GSA Space Assignment projects are not included in the construction programs budget request because they are funded from individual Administration's and Staff Office operating accounts. The leases listed in the table above are expected to be awarded in 2012.

**Lease costs represent build out costs plus the annual unserviced rent for the loan period as provided in the SCIP Action Plan.

¹This Lease requires Congressional authorization; see Budget Chapter 6 VA Lease Notifications, Major Medical Facility Project & Lease Authorizations for a more detailed description.

Appendix M – 2013-2021 SCIP Potential Project Listings

(Sorted by State, by City, by Investment Type)

Total estimated costs included are magnitude cost only; these may change as projects are further refined through VA capital investment process. Sharing, EUL, or Disposal projects with “\$0” estimated costs are projects with no expected capital costs to VA. This does not include existing (prior to SCIP) partially funded major construction projects or under-threshold and out-year planning lump-sums.
